STAFF REPORT

IN CONSIDERATION OF RESOLUTION NO. 05-3642 FOR THE PURPOSE OF AUTHORIZING THE CHIEF OPERATING OFFICER TO RENEW A NON-SYSTEM LICENSE ISSUED TO THE FOREST GROVE TRANSFER STATION FOR DELIVERY OF PUTRESCIBLE SOLID WASTE TO THE RIVERBEND LANDFILL

November 7, 2005

Prepared by: Steve Kraten

BACKGROUND

Description of the Resolution

Approval of Resolution No. 05-3642 will authorize the Chief Operating Officer to renew a non-system license (NSL) to the Forest Grove Transfer Station to deliver up to a maximum of 160,000 tons annually of mixed solid waste, including putrescible waste, to the Riverbend Landfill located in McMinnville, Oregon. The Forest Grove Transfer Station is located in Metro District 4. An NSL has been in place since 1990 with an unrestricted tonnage. The existing license will expire on December 31, 2005. The renewal application was filed on November 7, 2005 with a requested authorization of 160,000 tons. The Forest Grove Transfer Station and the Riverbend Landfill are both subsidiaries of Waste Management of Oregon.

ANALYSIS/INFORMATION

1. Known Opposition

There is no known opposition to the proposed license renewal.

2. Legal Antecedents

Section 5.05.035(c) of the Metro Code provides that, when determining whether or not to approve an NSL application, the Council shall consider the following factors to the extent relevant to such determination.

- (1) *The degree to which prior users of the non-system facility and waste types accepted at the non-system facility are known and the degree to which such wastes pose a future risk of environmental contamination;*

The Riverbend Landfill first came into use during the mid-eighties. When the Riverbend became a Subtitle D landfill in 1993, the original unlined cells were capped. Since 1993, the landfill has been filling only lined cells and operating with the required environmental controls required by the Oregon Department of Environmental Quality (DEQ). The landfill has no known history of landfilling wastes that pose a future risk of environmental contamination.

- (2) *The record of regulatory compliance of the non-system facility's owner and operator with federal, state and local requirements including but not limited to public health, safety and environmental rules and regulations;*

The Riverbend Landfill is permitted by the DEQ. The DEQ considers the landfill to be a well-run facility that is in compliance with federal, state and local requirements. The facility has a good compliance record with public health, safety and environmental rules and regulations.

- (3) *The adequacy of operational practices and management controls at the non-system facility;*

The Riverbend Landfill uses operational practices and management controls that are typical of Subtitle D landfills and considered by the DEQ to be adequate for the protection of health, safety, and the environment.

- (4) *The expected impact on the region's recycling and waste reduction efforts;*

The Forest Grove Transfer Station toploads mixed solid waste, including putrescible waste, directly into transfer trailers for delivery to a general purpose landfill. The facility does not perform materials recovery. Granting the requested license will not impact the region's recycling and waste reduction efforts.

- (5) *The consistency of the designation with Metro's existing contractual arrangements;*

Riverbend Landfill is a Waste Management facility. Thus, under a disposal agreement that has been in force since 1999, waste delivered under the proposed license is included as waste delivered to Metro's contract operator for purposes of Metro's disposal contract. The requested license does not appear to conflict with Metro's disposal contract or any other of its existing contractual arrangements.

- (6) *The record of the applicant regarding compliance with Metro ordinances and agreements or assistance to Metro in Metro ordinance enforcement and with federal, state and local requirements including but not limited to public health, safety and environmental rules and regulations; and*

In 1999, Waste Management of Oregon (at that time called USA Waste of Oregon, Inc.) acquired the Forest Grove Transfer Station. Since that time there have been no incidents of non-compliance with its NSLs or its facility franchise. The applicant is also in compliance with its Department of Environmental Quality solid waste facility permit and local land use authority.

- (7) *Such other factors as the Chief Operating Officer deems appropriate for purposes of making such determination.*

Solid waste delivered to the Riverbend Landfill counts toward the declining block fee schedule stipulated in Metro's disposal contract with Waste Management. FGTS has been disposing of solid waste at the Riverbend Landfill under the authority of a Metro-issued NSL since 1990.

Conclusion

The Chief Operating Officer finds that the proposed license satisfies the requirements of Metro Code Section 5.03.035 for the requested Solid Waste Facility License.

3. Anticipated Effects

The effect of Resolution No. 05-3642 will be to authorize the Chief Operating Officer to issue an NSL to the Forest Grove Transfer Station to deliver putrescible waste to the Riverbend Landfill.

4. Budget Impacts

The Forest Grove Transfer Station's NSL will continue the status quo with no additional budget impact. The regional system fee will continue to be collected by the transfer station on all solid waste received from within the Metro boundary. The excise tax is collected on all waste regardless of where it is generated.

RECOMMENDED ACTION

The Chief Operating Officer recommends approval of Resolution No. 05-3642.
