

RTP Parking Lot:

Outstanding Issues Needing Further Discussion By June 2008

Regional Bridges
Who should have primary responsibility for addressing operations and maintenance and other transportation needs of regional bridges? What funding sources should be used to address these needs?

ODOT District Highways
Who should have primary responsibility for addressing transportation needs on ODOT's district highways, many of which complement regional mobility corridors and serve as the primary means of multi-modal access to 2040 centers and employment?

Functional Classification Maps
What role should modal functional maps (e.g., bike, pedestrian, freight and transit) serve in the RTP and what are the implications of moving them from the policy chapter to the implementation chapter?

TPR Section 0060
What are the implications of recent TPR amendments on the ability of the RTP and local TSPs to comply with OAR 660-012-0060 which requires land use and transportation plans to be balanced?

Performance Measures
What are the best measures for evaluating the RTP policy framework to determine how well the system of investments achieve the policy goals? What new information is needed for this evaluation?

Regional HCT Study
How will the RTP frame the scope of Metro's HCT study? Currently, HCT routes are defined with the function of connecting the 2040 Growth Concept central city, regional centers and passenger intermodal facilities.

Regional/Local Responsibilities
How does the RTP relate to local TSPs in terms of funding, project types and 2040 implementation?
