

# **I-5 Partnership Update**

11/29/01 Bi-State Committee

Kate Deane, ODOT Region 1

# Introduction

- Bi-state planning project
- Sponsored by ODOT, WSDOT and FHWA
- Led by a 28-member bi-state Task Force
- Purpose of Project:
  - Develop a strategic plan for I-5 corridor between Portland and Vancouver

# **Project Overview/Purpose**

- Multi-faceted plan looking not only at freeway, but also...
  - transit service in the corridor
  - managing demand
  - freight and passenger rail

# **Status of Project**

- In January a 28-member bi-state task force began its work.
- Members of the committee include elected, business, neighborhood and community representatives.
- The Task Force spent January June working with the public and one another to determine what improvements should be studied.
- Results are now available.

# **Option Packages Evaluated**

- Baseline (2020)
- Express Bus/3 Lanes
- LRT/3 Lanes
- Express Bus/4 Lanes
- LRT/4 Lanes
- West Arterial
- Commuter Rail

# **Next Steps**

# January 2002:

- Public review of draft recommendations
- Bi-State Committee review and comment on draft recommendations
- Task Force adopts draft recommendations

# February - May 2002:

Plan refinements including additional technical review & developing finance plan

# **Next Steps - Continued**

# June 2002:

- Public review of draft recommendations
- Task Force adopts final recommendations and strategic plan

# Post 2002:

- Review by JPACT and RTC
- Adoption into Regional Transportation Plans
- EIS if major improvements are recommended

# "Working Draft Strategic Plan Recommendations for Public Review"

### **About this Document**

This document is a work-in-progress. It **does not** contain final recommendations. This document **does** contain working draft recommendations in the following areas: Corridor-Wide Freeway Capacity, Transit, River Crossing Capacity, Bridge Influence Area, Spot Improvements, West Arterial and Land Use. Following public input on these working draft recommendations, the Task Force is expected to discuss and <u>adopt</u> "**Draft Strategic Plan Recommendations for the I-5 Corridor**" on January 29, 2001.

This document also highlights areas needing additional work before the Task Force adopts a "Final Strategic Plan Recommendations for the I-5 Corridor" in June 2002. Areas for additional work and recommendations include: the bridge and its influence area, land use agreements, transportation demand management (TDM) actions, environmental justice and community enhancements, rail improvements, and a financing and implementation strategy. The Task Force is continuing to work on these areas and will seek public input as they develop additional recommendations.

The "Final Strategic Plan Recommendations for the I-5 Corridor" is expected to be adopted by the Task Force in June 2002, following further public input and discussion. The recommendations are expected to be a "package deal." They will be inter-related and contingent upon each other. The Task Force's "Final Strategic Plan Recommendations for the I-5 Corridor" will be sent to the Oregon and Washington Transportation Commissions and to the metropolitan planning organizations in Portland and SW Washington for review and potential adoption into their transportation plans. After adoption, the environmental review and project development phase may begin.

## **Introduction: Working Draft Strategic Plan**

The I-5 Partnership brought together Washington and Oregon citizens and leaders to respond to concerns about growing congestion on I-5. Governors Gary Locke and John Kitzhaber have appointed a bi-state Task Force of community, business and elected representatives to develop a Recommended Strategic Plan for the I-5 Corridor between I-84 in Oregon and I-205 in Washington. In developing the strategic plan, the Task Force has been guided by the following Problem, Vision and Values Statement:

#### Problem

The Interstate 5 Corridor is the most critical segment of the regional transportation system in the Portland/Vancouver metropolitan area. The Corridor provides access to many of the Region's most important industrial sites and port facilities, and is a link to jobs throughout the

Portland/Vancouver Region. Due to infrastructure deficiencies, lack of multi-modal options, land use patterns, and increasing congestion, businesses and individuals experience more frequent and longer delays in the Corridor. Without attention, the Corridor's problems are likely to increase significantly, further impacting the mobility, accessibility, livability and economic promise of the entire Region.

#### Vision and Values

This plan is a multi-faceted, integrated plan of transportation policies, capital expenditures, personal and business actions, and incentives to address the future needs of the I-5 Corridor.

The final plan, when implemented, will improve our quality of life by:

- Providing travel mobility, safety, reliability, accessibility and choice of transportation modes for users whether public, private, or commercial and recognizing the varied requirements of local, intra-corridor, and interstate movement;
- Supporting a sound regional economy by addressing the need to move freight efficiently, reliably, and safely through the corridor;
- Supporting a healthy and vibrant land use mix of residential, commercial, industrial, recreational, cultural and historical areas;
- Respecting and protecting natural resources including air quality, wildlife habitat and water resources;
- Supporting balanced achievement of community, neighborhood, and regional goals for growth management, livability, the environment, and a healthy economy with promise for all;
- Distributing fairly the associated benefits and impacts for the region and the neighborhoods adjacent to or affected by the Corridor; and
- Protecting our future with an improved and equitable balance of: livability, mobility, access, public health, environmental stewardship, economic vitality and environmental justice.

### **Overall Recommendation**

Physical improvements in the I-5 Corridor, beyond those already in the region's transportation plans, are warranted and necessary to meet the transportation, economic, and livability needs of the Portland/Vancouver Region. These working draft recommendations are designed to address those needs. The specific plan elements follow.

## Plan Elements

in

## I. Corridor-Wide Freeway Capacity

- a. Working Draft Recommendation:
  - 1. The Task Force considered expanding the capacity of the Corridor to 4 through lanes in each direction, but does **not** recommend this option.

### V. Spot Improvements

### a. Working Draft Recommendations:

- 1. I-5 should be widened to three through lanes in each direction between the Delta Park and Lombard interchanges in Oregon. This project should go to construction as quickly as possible.
- 2. The Columbia Blvd. interchange in Oregon should be made into a full interchange (add ramps for southbound traffic to exit at Columbia Blvd. and for northbound traffic to enter the freeway from Columbia Blvd.).
- 3. Both the Delta Park to Lombard project and the Columbia Blvd. interchange project should be considered for design at the same time. As part of this design effort, there needs to be a phasing and financing plan, with the recognition that the Delta Park project is the first priority.
- 4. The transportation issues south of the I-5/Fremont Bridge junction must be addressed and solved. The Mayor of Portland, the Governor of the State of Oregon, and JPACT should join together to appoint a group of public and private sector stakeholders to study and make recommendations for long-term transportation solutions for the entire I-5/I-405 freeway loop.

#### VI. Land Use

#### a. Working Draft Recommendations:

- 1. To protect existing capacity and support economic development, jurisdictions and agencies in the Corridor need to agree on a plan to manage land development to avoid adversely impacting I-5 or the Region's growth management plans.
- 2. Before construction of any additional cross-river transportation capacity is initiated in the Corridor, jurisdictions and agencies must have a documented, complementary understanding for a functionally integrated, regional transportation and land use system.

#### b. Notes:

- 1. The Portland/Vancouver region's transportation and land use systems are integrally related, each impacting and influencing the other.
- 2. Each jurisdiction has the right and responsibility to control its own planning, development and enforcement processes.
- 3. Effectively managing the transportation/land use relationship is critical to: a) efficiently and fairly using transportation capacity, b) supporting each government's adopted growth management plans, and c) preserving and protecting the sizeable public investment in the Region's transportation system.
- 4. As land values in the Corridor increase, especially around interchanges and transit station areas, requests for zone changes are likely. Unless action is taken now, the Corridor's transportation and economic development opportunities will erode, especially with the loss of industrial lands.

#### c. Additional Work (Jan-June 2002):

- 1. Prior to June 30, 2002, the Task Force will develop a Model Intergovernmental Agreement (IGA) to preserve the I-5 Corridor's transportation system, especially for trade. The model IGA will focus on protecting the capacity and functionality of interchanges and transit station areas even if no cross-river transportation capacity is added now.
- 2. Prior to June 30, 2002, the Task Force will <u>outline the key elements of Comprehensive Regional Accord</u> to achieve the fundamental goals for a functionally integrated, regional transportation and land use system. As the post-Task Force planning process proceeds, local jurisdictions whose land use decisions may impact the Corridor, will further develop and agree to a workable Accord before new cross-river transportation capacity is added to the Corridor.

# VII. Transportation Demand Management/Transportation System Management (TDM/TSM)

### a. Working Draft Recommendation:

1. Transportation demand management and transportation system management actions are important, need to be consistent, and will be made a part of the "Final Strategic Plan Recommendations for the I-5 Corridor."

#### b. Additional Work (Jan-June 2002):

- 1. The Task Force will develop recommendations by the Spring of 2002 for bi-state TDM/TSM actions to be implemented in the Corridor before new cross-river transportation capacity is added.
- 2. The Task Force will further explore the use of congestion pricing as one of the tools for managing demand.

### VIII. Freight and Passenger Rail

#### a. Additional Work (Jan-June 2002):

- 1. Work is currently underway to identify the capital and operating needs of the freight and passenger rail system. This work is expected to be complete in April 2002.
- 2. As part of the freight and passenger rail analysis, the estimated cost, ridership, and viability of a commuter rail system will be completed, and following public input, discussed by the Task Force.
- 3. The Task Force will develop and recommend a plan for improving Corridor heavy rail in the Spring of 2002 after further public input and discussion.

## IX. Environmental Justice and Community Enhancements

#### a. Additional Work (Jan-June 2002):

- 1. The Task Force recognizes the need to address environmental justice and community concerns resulting from these working draft recommendations. The Task Force directs project staff to: a) continue conducting the environmental justice analysis, b) work with the affected communities to collaboratively explore potential community concerns regarding these working draft recommendations and c) develop measures to address those concern, such as neighborhood connectivity, a community foundation, air quality monitoring, etc. As a part of addressing environmental justice and community enhancements, a plan for addressing the needs of local streets will also be developed.
- 2. The Task Force will develop and recommend a plan based on the environmental justice analysis and community concerns in the Spring of 2002 after further public input and discussion.

• **Public Open Houses** – to give input on these Working Draft Strategic Plan Recommendations

January 14, 2002 4:30 - 8:00 p.m. Hudson's Bay High School Co

#### - REVISED -

November 2, 2001

Chair Steven Corey and Oregon Transportation Commission Members 355 Capitol Street, N.E., Room 101 Salem, OR 97301-3871

Via Fax: 503-986-3291

Dear Chair Corey:

Re: 2001 Oregon Transportation Investment Act (HB 2142); Metro Area Recommended Projects

The Joint Policy Advisory Committee on Transportation (JPACT) for the Portland Metropolitan Area has now reviewed the candidate metro area project lists related to the 2001 Oregon Transportation Investment Act. This letter provides our recommendations for the Lane Capacity and Interchange projects; recommendations for Bridge projects; and reiterates our previous recommendations for full funding of metro area Preservation projects. We feel it is important that the Commission review our list comprehensively to better understand the needs and equity considerations of the Portland Metropolitan Area.

#### Background

Under the process set up by the Oregon Transportation Commission (OTC), the following funding programs were established:

- \$200 million for Lane Capacity and Interchange projects, of which \$70 million is intended for ODOT Region 1.
- \$120 million for Bridge projects of which 73 percent (\$87.6 million) is intended for ODOT bridges and 27 percent (\$32.4 million) is intended for local government bridges statewide based upon the state bridge ranking system.
- \$60 million for Pavement Preservation projects, of which \$21 million is intended for ODOT Region 1.
- \$20 million uncommitted, at the discretion of the OTC.

#### Recommendations

Group 1

At our meeting on November 1, 2001, JPACT unanimously recommended the following:

Within the amounts provided, we recommend that the OTC endorse projects in the following categories.

#### Lane Capacity/Interchange Recommendations

As a First Priority, fund the following project groups:

Jackson School Rd. Interchange (Washington Co.)	\$ 16.133 million
US 26 – 217 to Camelot (Washington Co.)	\$ 20.599 million
Columbia Blvd./Lombard Connector (Multnomah Co.)	\$ 19.765 million
I-5/Nyberg Interchange (Washington Co.)	\$ 1.172 million
Sub-total:	\$ 57.669 million
Group 2	
Boeckman Road (Wilsonville)	\$ 7.793 million

Boeckman Road (Wilsonville) \$ 7.793 million
Sunnyside Road to 152<sup>nd</sup> Ave. (Clackamas Co.) \$ 13.000 million
Sub-Total: \$ 20.793 million
TOTAL Group 1 & 2 \$ 78.462 million

For a number of reasons, JPACT requests the OTC to provide funding beyond the \$70 million target for lane capacity and interchange projects within Region 1, and the Metro area specifically. While JPACT strongly endorses the Group 1 projects as our top priority, we are as strong in our endorsement for funding of the Boeckman Road and Sunnyside Road projects. Both projects address key state mandates. The Sunnyside project will provide critical arterial-level road infrastructure in to areas that have been added to the Metro Urban Growth Boundary (UGB) or are under consideration for possible addition to the UGB in 2002. UGB decisions in our region have and will follow state requirements to first consider "exception" lands when a need has been determined for UGB expansion. Sunnyside Road serves a significant amount of former exception land now in the UGB and may serve even more land beyond 2002. The road is a key facility to address current mobility needs and future growth in the southeast portion of the metro area.

Boeckman Road is a new facility that will provide critical access to the Dammasch Hospital redevelopment site. As you know, Dammasch is a state-owned facility and the site will be re-developed consistent with state and regional growth management objectives for complete communities. The Dammasch re-development will represent one of the largest mixed-use development projects in the region's history. In addition, the City of Wilsonville has been a good partner with the state in accommodating the location of the recently opened Coffee Creek Correctional Institute, originally planned for the Dammasch site. Location of the prison and major re-development of Dammasch will fulfill major state objectives. Boeckman Road is needed to meet those objectives.

Funding Sunnyside and Boeckman Roads, in addition to selected Preservation and Bridge needs identified below, would go a long toward providing an equitable share of bond funding for Region 1. Based on the Region 1 targets for Lane Capacity/Interchange and Preservation targets, and

considering the state and local bridge rankings, Region 1 would receive 25.4 percent of the overall program. HB 2142 calls for the overall program to equitably balanced throughout the state. At 25.4 percent, Region 1 is <u>not</u> receiving its equitable share. We outline a more equitable distribution for all the funding categories in the final section of our letter.

Finally, there is an acknowledgement that some smaller projects outside the metropolitan area are within Region 1 will be funded and should be further considered into the Region 1 target.

In sum, JPACT requests the OTC fully allocate the \$70 million targeted to Lane Capacity/Interchange projects to the Group 1 and Group 2 projects identified above. We further request that the OTC commit \$8.46 million from their \$20 million Discretionary Fund to make whole the Boeckman and Sunnyside Road projects.

#### **Pavement Preservation Recommendations**

Last month, JPACT provided our recommendations for the Preservation portion of the OTIA. We reiterate those priorities and request full funding for all projects.

1.	Boones Ferry Rd. (Tualatin)	\$	2.581 million
2.	McLoughlin Blvd. (Milwaukie)	\$	2.000 million
3.	Sandy Blvd. (Portland)	\$	7.902 million
4.	Government Camp Loop	\$	.583 million
5.	Farmington Rd. (Washington Co.)	\$_	3.688 million
	,	\$1	6.754 million

In addition, JPACT requests the OTC to allocate \$4.787 million from their \$20 million Discretionary Fund to fully fund the remaining Region 1 Pavement Preservation Projects, as follows:

1.	Farmington Rd. (Washington Co.) – remainder	\$ 1.241 million
2.	Sandy Blvd. (Gresham-Multnomah)	\$ 1.346 million
3.	TV Highway (Forest Grove)	\$ 2.200 million
	TOTAL	\$ 4.787 million

#### Local Bridge Recommendations

1. Broadway Bridge (Multnomah Co.)	\$ 7.000 million
2. SW Champlain viaduct (Portland)	\$ .258 million
3. Graves Rd./Mill Creek (Clackamas Co.)	\$ 1.139 million
4. Beaver Creek Bridge (Multnomah Co.)	\$ 1.295 million
5. Corbett Hill Viaduct (Multnomah Co.)	\$ .690 million
6. NE 33 <sup>rd</sup> Ave./Slough Bridge (Portland)	\$ 1.291 million
7. NE 33 <sup>rd</sup> /RR Bridge (Portland)	\$ 3.114 million
TOTAL	\$14.787 million

In addition, JPACT requests the OTC fund four bridge projects for which local match was applied for from the \$20 million Discretionary Fund:

<ol> <li>Zigzag River (Clackamas Co.)</li> <li>Bybee/McLoughlin Boulevard</li> </ol>	\$ .180 million
4. Bybee/SPRR	\$ .180 million
TÓTAL	\$ 3.718 million

When the process was established, it allowed local governments to apply for local match on federally funded bridge projects. This was subsequently denied.

Finally under the bridge category, we request the OT fund from their \$20 million Discretionary Fund the next priority project on the Local Bridge priority list:

Minter Bridge Rd./Tualatin River (Washington Co.)

\$ 1.255 million

#### Discretionary Fund Recommendations/Equity Considerations

As noted above, a series of allocations from the \$20 million Discretionary Fund are being sought. They are summarized as follows:

TOTAL	\$ 18.22 million
<ul> <li>Modernization</li> </ul>	<u>\$ 8.460 million</u>
Bridge	\$ 4.973 million
<ul> <li>Pavement Preservation</li> </ul>	\$ 4.787 million

With any funds left in the \$20 million Discretionary Fund, consider allocation to the following list:

a) US 26 – Murray to Cornell (Washington Co.)	\$ 2.811 million
b) Powell Blvd. (Gresham)	\$ 5.250 million
c) US 26/Cornelius Pass (Hillsboro)	\$ 2.250 million
d) Murray Extension (Beaverton)	\$ 4.024 million
e) 209 <sup>th</sup> /TV Hwy. (Washington Co.)	\$ .885 million
f) Sunnyside Rd. 152 <sup>nd</sup> to 172 <sup>nd</sup> (Clackamas Co.)	\$ 8.810 million
g) 162 <sup>nd</sup> /Foster (Portland)	\$ 1.500 million
TOTAL	\$ 25.53 million

This is recommended because overall the Bond Program is disproportionately weighted against ODOT Region 1. Assuming the Base Program amounts described above, Region 1 would receive the following amounts:

•	Modernization TOTAL	 70.000 million <b>01.541 million</b>
	State Bridge	0
•	Local Bridge	\$ 14.787 million
•	Pavement Preservation	\$ 16.754 million

As indicated above, within the current targets for Lane Capacity/Interchange and Preservation targets and the Bridge ranking, the program results in an inequitable share for Region 1. Based upon these Base allocations, Region 1 would receive 25.4 percent of the overall program. HB 2142 calls for the overall program to be equitably balanced throughout the state. At 25.4 percent, Region 1 is not receiving its equitable share. We understand that this is due to the high priority for upgrading deficient bridges outside Region 1, principally on the Interstate System. This request is not intended to suggest that these bridges do not need attention. Rather, that the remaining \$20 million of Discretionary Funds could be used to counterbalance the current inequity. Additional allocations from the Discretionary Fund of \$18.22 million would result in Region 1 receiving \$119.76 million or 30 percent, still well below an equitable share. Further, use of the full \$20 million Discretionary Fund in Region 1 would be justified, resulting in a 30.4 percent share.

In conclusion, we thank you for the opportunity to comment on this important piece of legislation. In addition, we wish to acknowledge the hard work put in by the Commission and ODOT staff, particularly ODOT Region 1 staff, and the Metro Area Community Solutions Team. As a result of that effort, we feel the recommended projects both reflect the legislative intent of HB 2142 and the land use/ transportation policy objectives outlined in our 2040 Growth Concept, the Regional Transportation Plan and the Oregon Highway Plan.

Sincerely,

Rod Monroe

Dear Mr. Collins:

Thank you for writing to the Oregon Transportation Commission to express your views about using Oregon Transportation Investment Act (OTIA) funds in support of the East Columbia – Lombard Connector Project.

The Transportation Commission will rely on the recommendations of regional advisory groups, such as Area Commissions on Transportation, Metropolitan Planning Organizations, and the Joint Policy Advisory Committee on Transportation (JPACT).

I will provide a copy of your letter to JPACT and to the Oregon Transportation Commission. Thank you again, for writing to the Oregon Transportation Commission.

Sincerely,

Patrick J. Cooney

RE: East Columbia-Lombard Connector Project

Dear Mr. Corey,

United Parcel Service would like to express our strong enthusiasm for constructing the E. Columbia Boulevard-Lombard Street Connector using ODOT bond program funds. The project is critical to maintaining good access to Columbia Blvd. businesses and for industries exporting and importing goods through out the region via air freight. The E. Columbia-Lombard intersection has been identified repeatedly as a transportation bottleneck that must be solved to keep goods moving on the system.

Currently traffic accessing I-205 from Columbia Blvd. backs up over a mile during the PM peak. As a result, traffic from businesses on Columbia Blvd. has to seek alternative routes to access the freeway. Columbia Blvd. is a two-lane facility that connects with I-205 through a signalized intersection at a rail road underpass. The intersection is very close to the I-205 interchange, limiting turning movements and constraining traffic flow. The proposed project that you would help fund would improve access from Columbia Blvd. to US 30 (Killingsworth St.) and I-205 through improved interchanges at 87th Ave. at Columbia Blvd. and Killingsworth St.

Our business is serving ground and air cargo. Air Cargo activity is highly dependent upon the land-side transportation system for good access to shippers, freight forwarders, reload facilities and the air cargo terminals. The majority of the region's air-related facilities are located in the Columbia Corridor and rely heavily on Columbia Blvd and I-205.

Addressing the needs of this area through strategic investments in transportation infrastructure is critical to maintaining an economic catalyst, a role Columbia Corridor serves for the City, the metropolitan region and the state.

We appreciate your consideration of this important project.

Sincerely,

Thad Collins, Employee Relations

October 29, 2001

Steven Corey, Chair OR Transportation Commission 355 Capitol St. NE, Room 101 Salem, OR 97301-3871

RE: East Columbia-Lombard Connector Project

Dear Mr. Corey:

I would like to express support for funding the East Columbia-Lombard Connector Project using Transportation Investment Act (TIA) funds. This project has been identified as a priority project in the Columbia Corridor Transportation Plan and has continued to be a high priority for the Columbia Corridor Association.

The East Columbia-Lombard Connector Project is critical to providing good access to Columbia Boulevard business and for industries that need to access airfreight facilities. The current problem is acute and the Port of Portland and the City of Portland have already committed close to \$5 million to address the problem. Columbia Boulevard is currently a two-lane facility that connects with I-205 through a signalized intersection at a railroad underpass close to the I-205 interchange. Turning movements and traffic flow are severely constrained at this intersection and traffic accessing I-205 from Columbia Boulevard backs up over a mile during the PM peak hour. An alternative analysis has been completed for this project and design and construction are ready to begin.

It is recognized that there is not enough money to fund the huge transportation infrastructure needs in the Portland area. However, it is important that the limited monies that are available be equitably distributed throughout the Metro region. The East Columbia-Lombard Connector Project is a priority project for businesses in the Columbia Corridor and is the only major freight project being considered for funding under the Oregon Transportation Investment Act.

We appreciate your consideration to make this project a reality through the 2001 Oregon Transportation Investment Act.

Sincerely,

B.D. Dutton

RF:

TIA Funding for East Columbia-Lombard Connector Proiect

Dear Mr. Corev:

We recommend that the East Columbia-Lombard Connector Project be considered for funding under the Oregon Transportation Investment Act.

As part of the 2040 Growth Concept, vital industrial areas have been identified to serve as "sanctuaries" for longterm industrial activity. The Columbia Corridor is, and will remain, one of the region's most important industrial sanctuaries. This project should be considered a necessity for the future growth of businesses and industry in the Columbia Corridor.

Building on the Columbia Corridor Transportation Study (adopted by City Council in 1999) and on the 1992 update of the City of Portland's Transportation Element of the Comprehensive Plan, the East Columbia-Lombard Connector Reconnaissance Study developed and analyzed improvement alternatives for the traffic congestion at the existing Columbia/Killingsworth intersection in NE Portland. The study team represented ODOT, City of Portland, Port of Portland and specialist consultants.

The recommendations report, published in July 2000, addressed issues of street network connectivity, transit, congestion, freight mobility, safety, alternative modes and reviewed the findings of a public outreach program. A preferred alternative, meeting all of the study objectives, was also recommended. The proposed solution is compatible with ODOT and Union Pacific Railroad requirements, and the goals of the City of Portland, Port of Portland and Metro. A variation of that proposed alternative is currently on the table.

The proposed improvements remove a traffic "bottleneck", improve access and mobility for cyclists and pedestrians, improve transit access to employment and industrial areas, maximize the utilization of existing streets and enhance east-west movement of freight in the Columbia Corridor.

We consider this project a worthy candidate for your consideration for funding under the 2001 Oregon Transportation Investment Act.

Sincerely,

Andrew Haliburton, PE

RE:

House Bill 2142 Bond Program

At the December 12, 2001 meeting, the Oregon Transportation Commission accepted the ODOT staff recommendations for the list of projects to be funded with HB 2142 funds. Included in the recommendation was funding for the Sunnyside Road Project <u>rather than</u> the Boeckman Road Project.

(NOTE: JPACT's recommendation was to fund Sunnyside Road <u>and</u> Boeckman Road by allocating a portion of the discretionary \$20 million reserve. The OTC has decided <u>not</u> to allocate any portion of this \$20 million reserve for any modernization projects.)

The OTC has directed that JPACT recommend whether the Sunnyside Road <u>or</u> the Boeckman Road project should be funded. Please come prepared to address this issue at the December 13, 2001 JPACT meeting.

Re: JPACT - House Bill 2142 Bond List

Clarification: ODOT presented their recommendation to the OTC which was different from JPACT's but the OTC did not officially "accept" it, and certainly did not make any decision relative to the ODOT recommendation. Also, in further discussion among OTC members it was clear that their main objective was getting a recommendation from JPACT that did not exceed the allotted Region One dollar amount, not necessarily choosing one project or the other.

#### Reneé Castilla,

I just received your message, and unfortunately am unable to attend JPACT this morning. I am meeting with Federal Transit Administration officials regarding the Commuter Rail project from 7:30 - 9:30 a.m.

From the perspective of the Commuter Rail project, the Boeckman Road interchange is important because it would provide direct freeway access from I-5 to the large Commuter Rail Park & Ride in Wilsonville.

#### BEFORE THE METRO COUNCIL

REBECCA V. Shoemaku METRO COUNCIL ARCHIVIST

FOR THE PURPOSE OF APPROVING	)	RESOLUTION NO. 01-3034A
PORTLAND REGIONAL FEDERAL	)	Introduced by Councilor Monroe
TRANSPORTATION PRIORITIES FOR	)	
FFY 2002 APPROPRIATIONS	)	

WHEREAS, the Portland metropolitan region relies heavily on various federal funding sources to adequately plan for and develop the region's transportation infrastructure, and

WHEREAS, Metro must comply with a wide variety of federal requirements related to transportation planning and project funding, and

WHEREAS, Metro has annually developed a listing of federal transportation funding and regulatory priorities for submittal to the Oregon Congressional delegation, and

WHEREAS, JPACT has approved Exhibit A to this resolution, entitled, "Portland Regional Federal Transportation Priorities," NOW, THEREFORE,

BE IT RESOLVED,

The Metro Council approves Exhibit A of this resolution, entitled "Portland Regional Federal Transportation Priorities" and directs that it be submitted to the Oregon Congressional delegation.

ADOPTED by the Metro Council this

day of March, 2001.

David Bragdon, Presiding Officer

Approved as to Form:

Daniel B. Cooper, General Counsel

APPROVIDE APPROVIDED THE PROPERTY OF THE PROPE

#### Portland Regional Federal Transportation Priorities

It is important that Metro and its partners on JPACT articulate its federal transportation priorities to the congressional delegation. These priorities should be in the context of the FFY 2002 Appropriations Bill and anticipate a new six-year Authorization Bill starting in FFY 2004. A full position paper on the new six-year Authorization Bill will follow.

The region's priorities are described below:

- I. High-Capacity Transit: The Portland region is pursuing an aggressive agenda to implement a high-capacity transit system. This effort involves implementing three projects within the next 3-5 years at the same time: Interstate MAX, South Corridor Transit Improvement Program and Washington County Commuter Rail.
  - **INTERSTATE MAX:** Interstate MAX is Segment #1 of the South/North A. Corridor. Tri-Met recently signed a Full-Funding grant agreement with the Federal Transit Administration and construction is under way. The project is seeking an appropriation of a minimum of \$70 million in Section 5309 "New Start" funds as required in the Full-Funding Grant Agreement.

The first year appropriation for Interstate MAX was \$7.5 million for the FY 2001. Future appropriations are anticipated to complete the project at \$70 million in FFY 2002 and 2003 and \$70 million in FFY 2004 and \$41 million in FFY 2005. If appropriations do not keep pace with this schedule, the consequence is a higher interest cost to the region. If appropriations are dramatically short of this schedule (i.e., half or less of the annual funding need), the interest cost implication to the region would likely jeopardize other projects.

- В. **SOUTH CORRIDOR TRANSIT IMPROVEMENT PROGRAM:** The South Corridor is Segment #2, of the South/North Corridor. The region will incrementally implement improvements in the South Corridor that are a part of an overall South Corridor improvement project. The South Corridor project will be the region's #1 priority for Section 5309 "New Start" authorization and funding in the next six-year Authorization Bill.
  - For the FY 2002 federal transit appropriations bill, seek up to \$7.0 million of Section 5309 "Bus" funding by working with the Oregon transit community to establish a list of statewide bus appropriations requests which produces this amount of funding for South Corridor improvements. This would allow the region to complete the Milwaukie Transit Center (\$.35 million) and construct a Milwaukie Park-and-Ride (\$2.65 million) and Clackamas Town Center Transit Center (\$4.0 million).

C. COMMUTER RAIL: The Washington County Commuter Rail Project is the region's priority for authorization for construction in this FY 2002 Appropriation Bill.

The region is committed to pursuing the Washington County Commuter Rail. Federal environmental requirements have been met and Preliminary Engineering is underway and scheduled to be complete by Summer 2001. Project implementation is scheduled to begin in March 2002. The project's finance plan calls for the first increment of federal Section 5309 "New Starts" appropriations in FY 2003.

- II. Other Major Regional Priorities: The following projects are also high priority in the next fiscal year.
  - A. I-5 TRADE CORRIDOR: In the Portland/Vancouver region, Oregon and Washington are continuing their collaborative effort to address the transportation needs of the I-5 corridor from I-84 in Oregon to I-205 in Washington.

Governors John Kitzhaber of Oregon and Gary Locke of Washington have appointed a 28-member Task Force that is charged with developing a bi-state strategic plan on how to manage and improve transportation and freight mobility in the I-5 corridor between Portland and Vancouver. The strategic plan will address freeway, transit, heavy rail, and arterial street needs in the corridor. The plan will also address how to manage demand for transportation in the corridor. This public planning effort is funded with a \$2 million grant from FHWA's National Corridor Planning and Development Program. The grant is matched with \$500,000 each from the Washington and Oregon Departments of Transportation. The strategic plan is expected to be complete by the fall of 2002.

Based on the strategic planning effort, the region anticipates that federal funding will be sought through the reauthorization of TEA-21. Funding could be requested from the National Corridor Planning and Development program, other transportation programs or "High Priority Project" earmarks. Funding may also be sought through the Water Resources Development Act, as appropriate, for improvements to structures crossing the Columbia River.

B. COLUMBIA RIVER CHANNEL DEEPENING: In 1999, Congress authorized the deepening of the Columbia River Channel to 43 feet and the Corps of Engineers completed a Final EIS and Chief's Report on the project. Congress appropriated \$4.5 million for construction in the FFY 2001 Energy and Water Appropriations Act, but construction cannot begin until the National Marine Fisheries Service approves a new Biological Opinion. Whether the sponsoring ports will seek additional construction appropriations in FFY2002 depends upon the schedule for completing the Biological Opinion.

C. WILLAMETTE RIVER BRIDGE FUNDING: Multnomah County is seeking an additional \$20 million in Bridge Discretionary funds to complete the painting of the historic Broadway Bridge.

Multnomah County is implementing a \$200 million, 20-year rehabilitation program for the historic Willamette River Bridges. Approximately \$20 million has been secured through Federal Highway Bridge funds and Highway "Demo" funds to complete six of the seven phases of the Broadway Bridge rehabilitation. The Broadway Bridge is a critical link for the freight system between the eastside industrial area and central Portland. Maintaining this bridge is vital to the transportation system in the Portland region. The last component of the rehabilitation is to paint the bridge above deck. This work will preserve the structure and avoid more costly repairs later.

D. REGIONAL HIGHWAY PROJECTS: The limited availability of state modernization funds is delaying the construction of highway projects in the Portland region for years, if not decades. Federal earmarks will be needed if priority projects are to move forward in a timely fashion consistent with the Region 2040 Growth Concept and economic development needs.

Typically, Congress has not earmarked highway projects except when a new six-year Authorization Bill is adopted (although earmarking <u>did</u> occur in the FY 2001 Appropriations Bill). The following requests for FY 2002 earmarks (in the event they are undertaken) are part of a regional strategy to begin developing priority projects to better take advantage of earmarking opportunities in the next authorization bill.

- The region supports the following requests if there is an opportunity to earmark federal funds in the FY 2002 Transportation Appropriations Bill beyond the normal program categories for highway projects. The Port of Portland requests \$2 million for right-of-way acquisition for the "Columbia-Killingsworth Eastend Connector." Clackamas County requests \$3 million for Preliminary Engineering for "Sunnyside Road" and \$10 million for Preliminary Engineering for the "Sunrise Corridor Phase 1." Multnomah County requests \$2 million for Preliminary Engineering for the "242<sup>nd</sup> Avenue Connector." Washington County is requesting \$1.5 million for Preliminary Engineering of the Sunset Highway eastbound climbing lane from Hwy. 217 to Sylvan. The City of Portland is seeking \$1.0 million for Preliminary Engineering of Sandy Boulevard to convert it from a state highway to a boulevard.
- The region is not requesting federal funding in FY 2002 for the "I-5 Delta Park Lombard" project which, in addition to the ones listed above, is a likely priority for earmarking in the next authorization bill.

E. AMTRAK SOUTH STATION: The region is seeking capital funding of \$750,000 federal matching funds for a new Amtrak station.

Clackamas County, in cooperation with Oregon City, ODOT and Amtrak, has selected Oregon City as the location for a new Amtrak station in the south portion of the metropolitan region to complement existing stations in downtown Portland and Vancouver, Washington. This station is part of an incremental strategy to upgrade high-speed rail service between Eugene, Portland, Seattle and Vancouver, B.C. The overall project will entail construction of a 700-foot long platform, relocation of a rail depot, lighting and adjacent parking for a total of \$1.5 million. Oregon City is proceeding to implement Phase I of this project this year. This funding would allow Phase 2 to be completed.

- F. HIGH SPEED RAIL: Passenger rail is an important component of the state's transportation system. As one of eight designated high-speed rail corridors in the nation, the Pacific Northwest Passenger Rail Corridor is eligible for federal funding. The region supports efforts to secure federal appropriations for improvements in the Corridor. The region also urges the Congressional delegation to support the Amtrak bond proposal introduced last year in the Senate. The proposal will be considered again this year.
- G. INTERSTATE MAX REVITALIZATION PROGRAM (TCSP): Metro is seeking a \$1 million Congressional earmark for the Kenton Feed and Seed project.

Metro, the city of Portland, and Tri-Met are working together to develop a revitalization plan for Interstate Avenue in conjunction with Interstate MAX. Associated with that is the recent establishment of an urban renewal district by the City of Portland to provide a portion of the funding towards both the light rail and redevelopment. Under the FHWA Transportation and Community and System Preservation (TCSP) Pilot Program, funding could be provided to accelerate this redevelopment program.

It is expected that the urban renewal district will not provide sufficient funds to meet all the needs in the corridor and will not generate much revenue in the early years. As such, TCSP funds could be used to initiate several redevelopment projects, thereby serving as a catalyst for further redevelopment. As this creates new private investment, tax increment financing resulting from this investment will provide the funding for further redevelopment projects in the future and help establish the cash-flow for the funding contribution toward the light rail construction itself. Funding would be used for such activities as land acquisition and public street and pedestrian improvements that facilitate specific redevelopment projects.

- H. INTELLIGENT TRANSPORTATION SYSTEM: The region is supporting a single \$4.25 million "State of Oregon" earmark for the following ITS initiatives:
  - TransPort The TransPort project is a multi-agency project in the Portland region that is integrating each agency's transportation system into a regional system to enhance traffic and transit management and traveler information.
  - California-Oregon Advanced Transportation Systems (COATS) This rural ITS project is applying ITS technology to rural issues in a bi-state area covering Southern Oregon and Northern California.
  - Transit Trip Planning This project will begin integrating transit information from Oregon transit providers into a statewide transit trip planning system.
- I. STARK STREET BOULEVARD (181<sup>st</sup> 197<sup>th</sup>): The City of Gresham is seeking a \$1 million Congressional earmark for this endeavor.

Congress authorized \$1 million in TEA-21 "High Priority" funds for pedestrian improvements that support Gresham's revitalization of the Rockwood Town Center with transit-oriented development and access. The project retrofits a dangerous, auto-dominated arterial into a boulevard that safely accommodates pedestrians, bicyclists, and transit users. The project links the central commercial area with area employers and services, as well as three heavily used MAX stations. The TEA-21 funds provide full project design, but only fund construction from 181st to 190th.

Additional funds of up to \$2 million are needed to build the full project to 197<sup>th</sup> and address the massive, hazardous intersection of Stark/Burnside/MAX. Under the FHWA Transportation and Community and System Preservation (TCSP) Pilot Program, supplemental funding could be provided to complete the entire project within two years and an earmark of \$1 million is requested.

J. CENTRAL CITY STREETCAR: The City of Portland is seeking \$700,000 of HUD funding in FY 2002 for this project.

The 130-acre North Macadam District is the last major undeveloped area within the City of Portland's core. This largely unimproved area presents a unique opportunity to create a new neighborhood that will attract and accommodate jobs and housing in the Central City, furthering efforts to preserve our region's natural and agricultural resources. To take advantage of the opportunity presented, challenges to development posed by poor transportation access and circulation, inadequate infrastructure, and areas of soil contamination must be responded to and overcome.

The extension of the Central City Streetcar into this district is critical to provide the necessary transit service to accommodate the 8,500 to 10,000 jobs and 1,500 to 3,000 housing units expected to develop during the next 20 years. This 11/2 mile extension is from Portland State University where the ongoing streetcar project terminates into the North Macadam District. It is estimated to cost \$45 million, including rolling stock. Tax Increment Financing and private contributions through a Local Improvement District are identified to provide \$37.5 million leaving \$7.5 million as yet unfunded. Although this project is not intended to compete for FTA "New Starts" funding, it could qualify for other DOT, EPA or HUD categories. For FY 2002, \$700,000 of HUD funding is being sought to complete the final design to Riverplace.

#### **K.** C-TRAN TRANSIT PROJECTS:

- I-5 TRADE CORRIDOR PARK-AND-RIDE: C-Tran requests \$1.0 million of Section 5309 funding for the construction of the proposed 99<sup>th</sup> Street Transit Center/Park-and-Ride. Final design and construction are anticipated to commence in 2001.
- INTELLIGENT TRANSPORTATION SYSTEMS (ITS): Request \$1.5 million of Section 5309 planning funds for C-Trans's Automated Vehicle Locator (AVL) project. This system includes components of a computerized bus dispatch system, mobile data systems for both fixed route and paratransit operations, global positioning systems for the deployment of automated vehicle location technology, signal priority treatment for transit, and customer information systems such as real-time arrival kiosks at transit centers.

L. WILSONVILLE PARK-AND-RIDE – South Metro Area Rapid Transit (SMART) requests \$1.54 million of Section 5309 funding for the construction of a park-and-ride facility and transit center adjacent to the Commuter Rail terminus. Wilsonville is pursuing funding for land acquisition through the MTIP process.

Wilsonville's location along the I-5 Corridor between Portland and Salem makes it an important employment center for commuters traveling north and south. Increasing commuter traffic into and out of Wilsonville calls for improved access and connectivity to regional public transportation. Currently, Wilsonville lacks facilities that offer convenient transfer connections. A park-and-ride facility and transit center near Commuter Rail would allow access to regional bus and rail services from a centralized hub and thereby reduce vehicle trips into the city and metropolitan area.

M. JOBS ACCESS/REVERSE COMMUTE – The region requests \$1.8 million in FY 2002 Jobs Access/Reverse Commute funds to be earmarked for the Portland metropolitan region. This request equals the funding approved in the FY 2001 transportation appropriations act and will allow the continuation of Jobs Access/Reverse Commute projects initiated in Washington, Clackamas and Multnomah counties with the FY 2001 funds.

In its first two years, these funds were allocated through a competitive grant program administered by the Federal Transit Administration. The Portland region (through Tri-Met) received two annual allocations under the grant program totaling approximately \$1.8 million. In 2000, however, it became apparent that the program was moving rapidly from a grant allocation program to one allocated by congressional earmark. As a result, the region requested \$1.8 million in the FY 2001 transportation appropriations process and received its entire request. This request would repeat that request for FY 2002.
