

BEFORE THE METRO COUNCIL

FOR THE PURPOSE OF AMENDING THE
EMPLOYMENT AND INDUSTRIAL AREAS MAP
OF TITLE 4 OF THE URBAN GROWTH MANAGE-
MENT FUNCTIONAL PLAN UPON APPLICATION
BY THE CITY OF PORTLAND

Ordinance No. 10-1246
Introduced by Councilor
Robert Liberty

WHEREAS, subsection 3.07.450H of Title 4 of the Urban Growth Management Functional Plan provides for amendment of the Employment and Industrial Areas Map by the Metro Council at the request of a city or a county and sets forth criteria for amendments; and

WHEREAS, the city of Portland applied to amend the map to change the designation of 53.4 acres in northwest Portland from Industrial Area to Employment Area; and

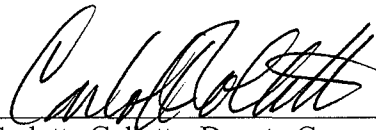

WHEREAS, the Council held a public hearing on the application on September __, 2010; and

WHEREAS, the Council reviewed the city's application and finds that the proposed changes to the Title 4 map meet the criteria in subsection 3.07.450H, as indicated in Exhibit B; now, therefore,

IT IS ORDERED THAT:

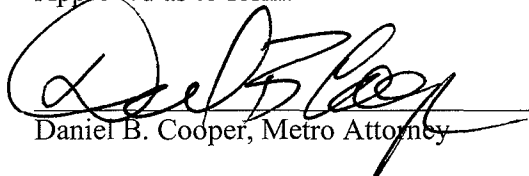

1. The Employment and Industrial Areas Map of Title 4 of Metro's Urban Growth Management Functional Plan is hereby amended as shown on Exhibit A, attached to this ordinance.
2. The Council adopts the findings of fact and conclusions of law in Exhibit B, incorporated into this ordinance, to explain how the map amendment complies with state and regional laws.

ENTERED this 16 day of September, 2010

Carlotta Collette, Deputy Council President

Approved as to form:

Daniel B. Cooper, Metro Attorney

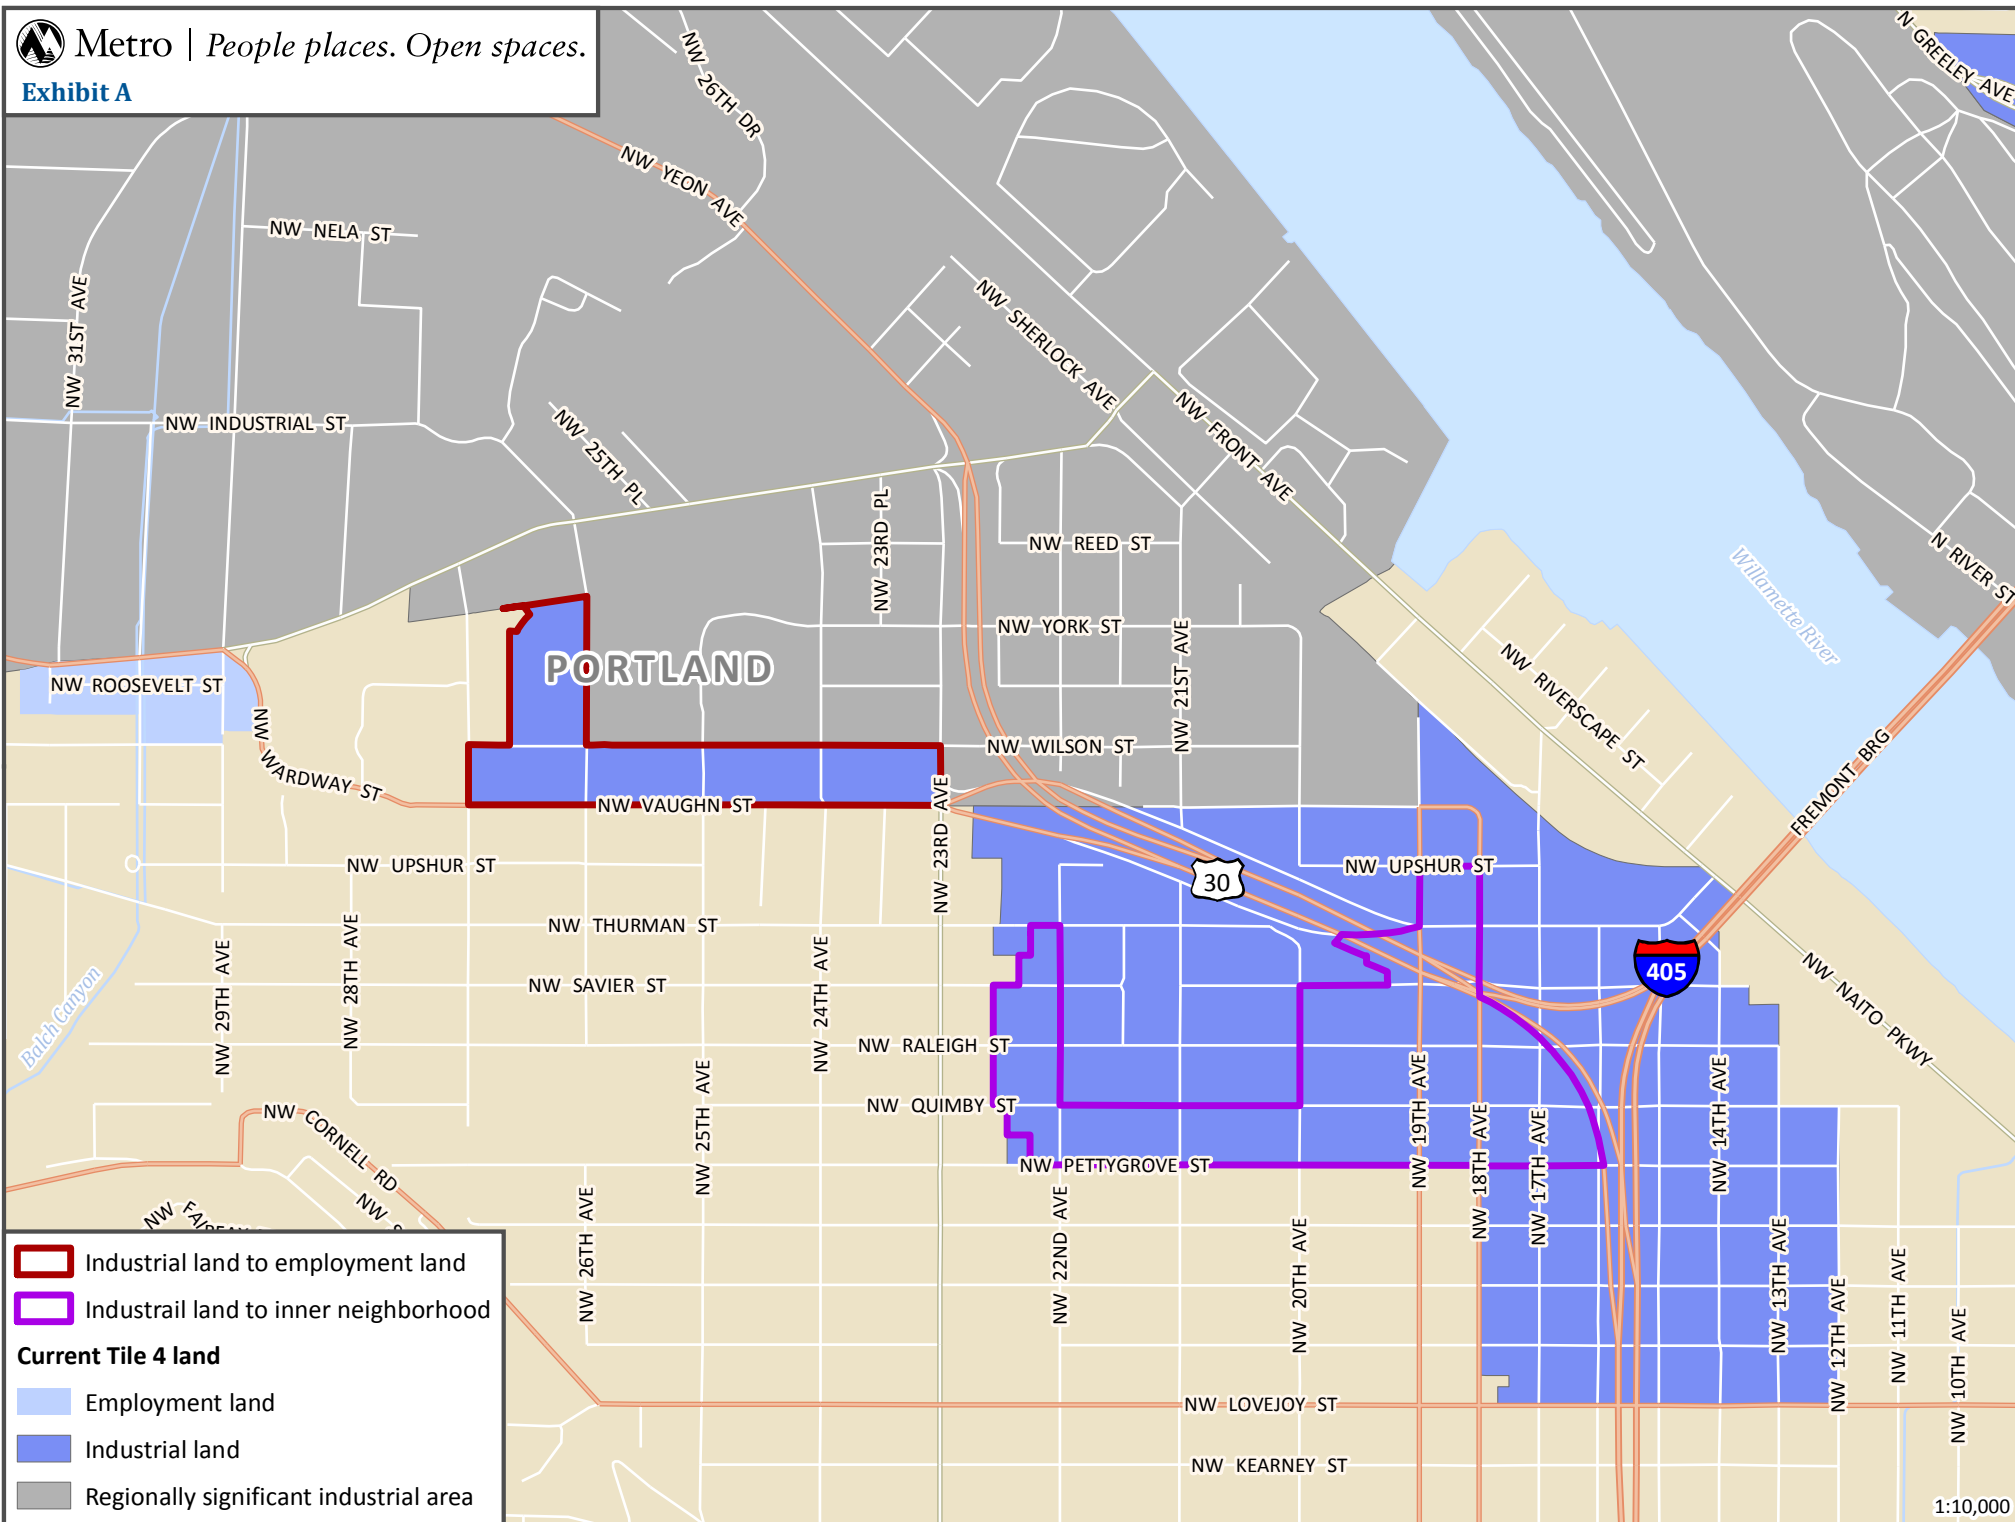

Exhibit A

1:10,000

Exhibit B to Ordinance No. 10-1246

Findings of Fact and Conclusions of Law

Title 4 of the Urban Growth Management Functional Plan (UGMFP) authorizes local governments to seek amendments to Title 4's map of industrial and other employment areas. Title 4 prescribes criteria that local governments must satisfy for an amendment to the map. The Metro Council makes the following findings and reaches the following conclusions to address the criteria, found at Metro Code 3.07.450H:

Criterion A: the amendment would not reduce the jobs capacity of the city below the number shown on Table 3.07-1 of Title 1 of the UGMFP

The Council accepts the analysis of city compliance with this criterion in the Staff Report dated August 30. The Council concludes that the amendment complies with Criterion A

Criterion B: the amendment would not allow uses that would reduce off-peak performance on Major Roadway Routes and Roadway Connectors shown on Metro's 2004 Regional Freight System Map below standards in the Regional Transportation Plan, or exceed volume-to-capacity ratios on Table 7 of the 1999 Oregon Highway Plan for state highways, unless mitigating action is taken that will restore performance to RTP and OHP standards within two years after approval of uses.

The Council accepts the analysis of city compliance with this criterion in the Staff Report dated August 30. The Council concludes that the amendment complies with Criterion B.

Criterion C: the amendment would not diminish the intended function of the Central City or Regional or Town Centers as the principal locations of retail, cultural and civic services in their market areas

The Council accepts the analysis of city compliance with this criterion in the Staff Report entitled dated August 30. The Council concludes that the amendment complies with Criterion C.

Criterion D: the amendment would not reduce the integrity or viability of a traded sector cluster of industries

The Council accepts the analysis of city compliance with this criterion in the Staff Report entitled dated August 30. The Council concludes that the amendment complies with Criterion D.

Criterion E: the amendment would not create or worsen a significant imbalance between jobs and housing in a regional market area

The Council accepts the analysis of city compliance with this criterion in the Staff Report entitled dated August 30. The Council concludes that the amendment complies with Criterion E.

Criterion F: if the subject property is designated Regionally Significant Industrial Area, would not remove from that designation land that is especially suitable for industrial use due to the availability of specialized services, such as redundant electrical power or industrial gases, or due to proximity to freight transport facilities, such as trans-shipment facilities

Because the amendment applies to parcels that are not designated Regionally Significant Industrial Areas on the Title 4 map, this criterion does not apply.

Regional Framework Plan: Title 4 of the UGMFP implements the policies of the RFP. Because the proposed amendment complies with Title 4, the Council concludes that it also complies with the RFP. Metro Code 3.07.450I.

Statewide Planning Goals

Goal 1: Metro followed the procedures for map amendments in Title 4, the Metro charter and the post-acknowledgment plan amendment process. The Council held a public hearing following publication of the agenda and materials, including the staff report at the Metro website. These actions provided opportunities for public involvement in the process of amendment of the Title 4 map and complied with Goal 1.

Goal 2: This matter came before the Metro Council on application of the city of Portland. Coordination with the city has been accomplished through the process. As noted above, the proposed amendment is consistent with the Regional Framework Plan and the Urban Growth Management Functional Plan.

Goal 3: The proposed amendment involves land inside the regional UGB. Goal 3 does not apply.

Goal 4: The proposed amendment involves land inside the regional UGB. Goal 4 does not apply.

Goal 5: The Council relies upon the findings and conclusion on Goal 5 and city implementation measures made by the city of Portland in its order approving amendments to its comprehensive plan and land use regulations prior to its application for an amendment to the Title 4 map. The proposed map amendment complies with Goal 5.

Goal 6: The Council relies upon the findings and conclusion on Goal 6 and city implementation measures made by the city of Portland in its order approving amendments to its comprehensive plan and land use regulations prior to its application for an amendment to the Title 4 map. The proposed map amendment complies with Goal 6.

Goal 7: The Council relies upon the findings and conclusion on Goal 7 and city implementation measures made by the city of Portland in its order approving amendments to its comprehensive

plan and land use regulations prior to its application for an amendment to the Title 4 map. The proposed map amendment complies with Goal 7.

Goal 8: The Council relies upon the findings and conclusion on Goal 7 and city implementation measures made by the city of Portland in its order approving amendments to its comprehensive plan and land use regulations prior to its application for an amendment to the Title 4 map. The proposed map amendment complies with Goal 8.

Goal 9: The Council relies upon the findings and conclusion on Goal 9 and city implementation measures made by the city of Portland in its order approving amendments to its comprehensive plan and land use regulations prior to its application for an amendment to the Title 4 map. Goal 9 does not apply to Metro. Nonetheless, the proposed map amendment complies with Goal 9.

Goal 10: The Council relies upon the findings and conclusion on Goal 10 and city implementation measures made by the city of Portland in its order approving amendments to its comprehensive plan and land use regulations prior to its application for an amendment to the Title 4 map. The proposed map amendment complies with Goal 10.

Goal 11: The Council relies upon the findings and conclusion on Goal 11 and city implementation measures made by the city of Portland in its order approving amendments to its comprehensive plan and land use regulations prior to its application for an amendment to the Title 4 map. The proposed map amendment complies with Goal 11.

Goal 12: The Council relies upon the findings and conclusion on Goal 12 and city implementation measures made by the city of Portland in its order approving amendments to its comprehensive plan and land use regulations prior to its application for an amendment to the Title 4 map. The proposed map amendment complies with Goal 12.

Goal 13: The Council relies upon the findings and conclusion on Goal 13 and city implementation measures made by the city of Portland in its order approving amendments to its comprehensive plan and land use regulations prior to its application for an amendment to the Title 4 map. The proposed map amendment complies with Goal 13.

Goal 14: The proposed amendment to the Title 4 map does not involve the regional UGB. Nor does it involve the use of “urbanizable” land as described in the statewide planning goals. Goal 14 does not apply to the proposed amendment.

Goal 15: The properties involved in the proposed Title 4 map amendment do not lie within the Willamette River Greenway. Goal 15 does not apply to the proposed amendment.

STAFF REPORT

IN CONSIDERATION OF ORDINANCE NO. 10-1246, FOR THE PURPOSE OF AMENDING THE EMPLOYMENT AND INDUSTRIAL AREAS MAP OF TITLE 4 OF THE URBAN GROWTH MANAGEMENT FUNCTIONAL PLAN UPON APPLICATION BY CITY OF PORTLAND

Date: August 30, 2010

Prepared by: Ted Reid
503-797-1768
ted.reid@oregonmetro.gov

BACKGROUND INFORMATION

PETITIONER:

City of Portland

APPLICABLE REVIEW CRITERIA:

Metro Code section 3.07.450 H

The Regional Framework Plan calls for a strong regional economy. To improve the regional economy, Title 4 of the Urban Growth Management Functional Plan (“Industrial and Other Employment Areas”) seeks to provide and protect a supply of sites for employment by limiting the types and scale of non-industrial uses in Regionally Significant Industrial Areas (RSIAs), Industrial and Employment Areas. Title 4 also seeks to provide the benefits of "clustering" to those industries that operate more productively and efficiently in proximity to one another than in dispersed locations. Title 4 further seeks to protect the capacity and efficiency of the region’s transportation system for the movement of goods and services and to encourage the location of other types of employment in Centers, Employment Areas, Corridors, Main Streets and Station Communities. Title 4 is implemented through city and county comprehensive plans and zoning.

The City of Portland requests that the Metro Council amend the Employment and Industrial Areas Map to authorize uses not allowed under Title 4. The proposed map amendment would apply to 53.4 acres in the City of Portland’s Northwest District, including two sites totaling 16.9 acres and 36.5 acres. These sites are currently developed. Both sites are designated Industrial on Metro’s Employment and Industrial Areas Map. The City of Portland has requested that the 16.9-acre site be designated Employment and that the 36.5-acre site be designated as Inner Neighborhood. The proposed changes to the Title 4 map are shown in Attachment 1. These proposed changes would allow additional commercial retail and professional service uses on these sites. The zoning proposed by the City would also allow residential uses.

On June 17, 2010, the Portland City Council adopted Ordinance 183915, which amended the Portland Comprehensive Plan Map and the city’s Official Zoning Map to reflect the designations that prompt this request for a Title 4 Map amendment. The City’s June 17, 2010 ordinance was not appealed and so has, by default, been acknowledged as compliant with Statewide Planning Goals pursuant to ORS 197.625(1). The City’s ordinance appropriately contains a condition making the June 17, 2010 re-designation contingent upon an amendment by the Metro Council to the Title 4 map.

The City of Portland’s application for the proposed Title 4 Map amendment is included as Attachment 2.

APPLICABLE REVIEW CRITERIA

The criteria for amendments to the Employment and Industrial Areas Map are contained in Metro Code 3.07.450 H. The criteria (**in bold**), petitioner responses to the criteria (*in italics*), and staff analysis follow. Petitioner references to exhibits pertain to exhibits in the City’s application, included as Attachments 2 and 3 to this staff report.

Criterion A: Would not reduce the jobs capacity of the city or county below the number shown on Table 3.07-1 of Title 1 of the Urban Growth Management Functional Plan

Petitioner Response

Both changes are to zones or Comprehensive Plan designations that allow a higher employment density than the current zoning/Comprehensive Plan designations. Therefore this criterion is met.

Metro Staff Analysis

Metro staff concurs with the petitioner’s assessment that the proposed zoning and comprehensive plan changes would result in capacity for more jobs. The proposed change to the Title 4 map would not have the effect of reducing the jobs capacity of the City of Portland below the number shown on Table 3.07-1 of Title 1 of the Urban Growth Management Functional Plan.

Metro staff believes that this criterion is met.

Criterion B: Would not allow uses that would reduce off-peak performance on Major Roadway Routes and Roadway Connectors shown on Metro’s 2004 Regional Freight System Map below standards in the Regional Transportation Plan ("RTP"), or exceed volume-to-capacity ratios on Table 7 of the 1999 Oregon Highway Plan ("OHP") for state highways, unless mitigating action is taken that will restore performance to RTP and OHP standards within two years after approval of uses

Petitioner Response

Metro’s RTP Table 2.4, Regional Mobility Policy designates level of service (LOS) “E” as the standard for off-peak hours performance. Interstate 405 is classified as a Main Freight Roadway and NW Nicolai Street is identified as a Freight Road Connector. In April 2010 traffic analysis was conducted for three intersections: NW Nicolai at NW Wardway St., NW Nicolai at US 30, and NW Vaughn at NW 23rd Ave. The intersections performed at Level of Service C, B and D, respectively, in 2010. The analysis showed that in 2030, all three intersections would continue to perform at the same level of service with the proposed zoning in place. This is above the LOS E standard criterion required by Title 4 (see Exhibit 2, Traffic Analysis for Title 4).

The three intersections studied in April 2010 also met the volume-to-capacity ratios on Table 7 of the 1999 Oregon Highway Plan (OHP) for state highways. The standard listed in Table 7 is .99 volume/capacity (v/c). According to Exhibit 3, Supplement to Traffic Analysis for Title 4, in 2030, the v/c for the three intersections are .56, .76 and .93.

Therefore this criterion is met.

Metro Staff Analysis

The applicable freight routes in the vicinity are NW Nicolai Street and US 30. Metro staff asked the City to review the following intersections for determining compliance with this criterion in Title 4:

- NW Nicolai St. at US 30
- NW Nicolai St. at NW Wardway St. / NW 29th Ave.
- NW Vaughn St. at NW 23rd Ave. / US 30 (I-405) ramps

Off-peak hours are assessed since those are the times when freight transport is most likely to occur in order to avoid delays from commute hour traffic. As part of their petition, the City conducted a traffic analysis to address this criterion, which can be found as Attachment 3 to this staff report. As indicated in a memo included as Attachment 4 to this staff report, Metro's transportation engineer believes that the City has demonstrated to a reasonable extent that the proposed changes would not reduce off-peak performance on either facility below standards contained in the RTP or OHP. As documented in the City's analysis, the proposed land use changes are expected to have a negligible off-peak traffic impact.

Metro staff believes that this criterion is met.

Criterion C: Would not diminish the intended function of the Central City or Regional or Town Centers as the principal locations of retail, cultural and civic services in their market areas

Petitioner Response

Because Area 2 (north of Pettygrove) already has a high concentration of residential and commercial uses, changing the zoning and designation for this area will actually be an expansion of the Central City, reinforcing the role of the Central City as the principal location of retail, cultural, and civic services in the region. Area 1 (directly north of Vaughn) will become a buffer zone between the industrial sanctuary and the Central City. Therefore this criterion is met.

Metro Staff Analysis

Currently, there is no formally-adopted boundary for the Central City. However, as a practical matter, if the proposed Title 4 map amendment is adopted, the area under consideration, especially the area north of NW Pettygrove, would function as part of the Central City. This is because the proposed uses and densities are consistent with development found in the Central City. The proposal presents a unique opportunity to encourage greater levels of urban activity in a central location. Consequently, staff believes that the proposed change to the Title 4 map reinforces, and does not diminish, the intended function of the Central City as the principal location of retail, cultural and civic services in this market area.

Metro staff believes that this criterion is met.

Criterion D: Would not reduce the integrity or viability of a traded sector cluster of industries

Petitioner Response

First, the resulting reduction in available land for industry-related clusters in the Working Harbor (primarily metals manufacturing and distribution) will be offset by expansion of developable land for office-related clusters in the NW portion of the Central City (particularly creative services and software). This shift is consistent with office growth trends in the River District. Area 2 (north of Pettygrove) has a mix of distribution facilities, residential, retail, and office uses.

Second, the changes will reinforce a functional boundary along the Vaughn corridor between the Working Harbor's Regionally Significant Industrial Area to the north and the higher density, mixed use development in the expanding Central City to the south, encouraging long-term investments in both areas. This Vaughn corridor boundary (Area 1) was jointly developed in the Guild's Lake Industrial Sanctuary Plan (2001 and 2003) and Northwest District Plan.

Third, the change to Area 1 (north of Vaughn) will reinforce the metals cluster, because it will establish a transition buffer between the expanding Central City and a major steel manufacturer on the north side of Vaughn (ESCO), and ease expansion of ESCO's headquarters offices. Having headquarters offices in proximity to the manufacturing functions creates significant efficiencies for companies. Additionally, Area 1 (north of Vaughn) will become a transitional buffer to keep housing and most retail uses from conflicts with the industrial uses, and the buffer will help resist market pressures for residential and retail uses pressing northward.

Therefore this criterion is met.

Metro Staff Analysis

Traded-sector industries are those in which member firms sell their goods or services into markets for which national or international competition exists. Firms in these sectors are important to the regional economy since they bring wealth into the region by exporting goods or services. The subject location is home to firms in the metal manufacturing and freight and logistics sectors, both of which are traded sectors. Metro staff believes that the proposed Title 4 map amendment responds to evolving economic conditions in the area and does not, in itself, reduce the integrity or viability of a traded-sector cluster of industries. The petitioner has indicated that the proposed change would provide headquarter office expansion opportunities for at least one traded-sector firm (ESCO) and would buffer remaining industrial uses in the vicinity. Likewise, the proposed changes may attract to the area firms in other traded-sector industries, which may favor higher-density office formats. Metro staff concludes that the proposal does not reduce the integrity or viability of a traded sector cluster of industries.

Metro staff believes that this criterion is met.

Criterion E: Would not create or worsen a significant imbalance between jobs and housing in a regional market area

Petitioner Response

There is currently no significant imbalance. Area 1 (north of Vaughn) is changing from a Comprehensive Plan designation of IS (Industrial Sanctuary) to ME (Mixed Employment). Both designations are designed to foster jobs, and housing is severely limited in both. Although the new designation may result in more jobs in the area, the increase will not be significant enough to cause a significant imbalance in the region.

Area 2 (north of Pettygrove) is changing from the IGI zone with an IS (Industrial Sanctuary) Comprehensive Plan designation to the EXd zone with an EX (Central Employment) Comprehensive Plan designation. While both the Industrial and Employment zones and designations allow jobs, the EXd zone also allows residential development. Because both uses are allowed—and because it is a relatively small area—the changes will not be enough to cause a significant imbalance in the region.

Therefore this criterion is met.

Metro Staff Analysis

The area under consideration is part of the Central City regional market area. According to the Regional Framework Plan, the Central City is intended to act as a regional employment hub. Currently, the Central City fills this role with a high concentration of employment. In the context of the wider market area, the proposed change would represent a relatively small increase in job capacity. Even with high concentrations of employment in the Central City, staff believes that the jobs-to-housing balance of the wider market area is healthy since the Central City is surrounded by many residential areas that are well-connected with multiple transportation modes. Additionally, the residential uses contemplated for this area would help to balance any new employment.

Metro staff believes that this criterion is met.

Criterion F: If the subject property is designated Regionally Significant Industrial Area, would not remove from that designation land that is especially suitable for industrial use due to the availability of specialized services, such as redundant electrical power or industrial gases, or due to proximity to freight transport facilities, such as trans-shipment facilities.

Petitioner Response

Because the Site is not designated RSIA, this criterion does not apply.

Metro Staff Analysis

No portion of the site is designated as RSIA. Therefore, this criterion does not apply to the proposed Title 4 Map amendment.

Metro staff believes that this criterion is met.

ANALYSIS/INFORMATION

Known Opposition [identify known opposition to the proposed legislation]

There is no known opposition.

Legal Antecedents [identify legislation related to the proposed legislation, including federal, state, or local law and Metro Code, using appropriate resolution or ordinance numbers, ballot measure numbers, etc.]

Statewide Planning Goals 2 (Land Use Planning) and 9 (Economic Development); Metro Code section 3.07.450 (Employment and Industrial Areas Map).

Anticipated Effects [identify what is expected to occur if the legislation is adopted]

Proposed changes to the City’s zoning map and comprehensive plan map would become effective, allowing additional commercial uses in these two areas.

Budget Impacts [identify the cost to implement the legislation]

There is no significant budget impact. Implementation would consist of updating the Employment and Industrial Areas Map.

RECOMMENDED ACTION

The petitioner seeks to amend the Title 4 Employment and Industrial Areas Map. Metro Staff believes that the petitioner has provided sufficient evidence to demonstrate that the criteria are satisfied.

Staff recommends, therefore, that the Metro Council approve this ordinance.

ATTACHMENT 2 TO STAFF REPORT

City of Portland
Application for Amendments to
Metro's Employment and Industrial Areas Map

BACKGROUND INFORMATION

History: The requested changes to Metro's Employment and Industrial Areas Map are based on changes originally adopted by the Portland City Council in 2003 as part of the Northwest District Plan. At that time, Title 4 did not require Metro approval for industrial land map changes.

The Northwest District Plan was appealed to the Land Use Board of Appeals (LUBA). LUBA remanded the plan back to the City for additional information about the impacts of these zone changes on certain transportation facilities. The Portland Bureau of Transportation analyzed the impacts and summarized their findings to specifically address LUBA's remand items.

On June 17, 2010, the Portland City Council re-approved the original Comprehensive Plan and Zone map changes, based on these new findings. The changes approved by City Council will not take effect until Metro has considered our requested amendments to the Title 4 map.

Site Information: We are requesting changes to two areas on Metro's Employment and Industrial Areas Map. These are:

- **Area 1** (north of NW Vaughn between NW 27th and NW 23rd Avenues): 16.9 acres currently designated for industrial will change to employment. This is currently zoned IG1 (General Industrial 1) with a Comprehensive Plan designation of IS (Industrial Sanctuary), and will change to the IG1 zone with a Comprehensive Plan designation of ME (Mixed Employment). This change will allow possible zone map changes, upon further review, to EG (General Employment).
- **Area 2** (north of NW Pettygrove between NW 23rd and NW 16th Avenues): 36.5 acres currently designated for industrial will be removed from the industrial designation. This is currently zoned IG1 with a Comprehensive Plan designation of IS (Industrial Sanctuary) will change to EXd (Central Employment with a Design overlay) zone with a Comprehensive Plan designation of EX.

The sites and the proposed amendments are shown in the attached Exhibit 1.

Proposal Description: The City of Portland requests that Metro's Employment and Industrial Areas Map be amended so the 16.9 acres described as Area 1 above are redesignated from Industrial to Employment. This will allow the area to change from an Industrial Sanctuary (IS) Comprehensive Plan Map designation to Mixed Employment (ME). The Mixed Employment designation would allow potential zone map changes to General Employment. The General Employment zones (EG1 and EG2) permit commercial uses that are more sharply limited or prohibited in Industrial zones, in part due to the requirements of Title 4 ("Industrial and Other Employment Areas") of the Urban Growth Management Functional Plan. The General Employment zones also allow a range of institutional uses that are prohibited in the Industrial zones, and limit or prohibit some of the more intense uses allowed in Industrial zones.

ORDINANCE NO 10-1246
ATTACHMENT 2 TO STAFF REPORT

The City of Portland also requests that Metro's Employment and Industrial Areas Map be amended so that the 36.5 acres described as Area 2 above is removed from the industrial designation. This will allow the Comprehensive Plan designation to change from Industrial Sanctuary (IS) to Central Employment (EX), and the zoning for the area to change from General Industrial (IG1) to Central Employment with a design overlay zone (EXd). The EX zone allows a variety of residential and commercial uses that are more sharply limited or prohibited in Industrial zones, in part due to the requirements of Title 4 ("Industrial and Other Employment Areas") of the Urban Growth Management Functional Plan.

Local Government Statement: This Title 4 map amendment is being requested by the City of Portland. On June 17, 2010, the Portland City Council approved Ordinance No. 183915, amending the Comprehensive Plan and Zoning maps described above. At the time of this application, the City's ordinance has not yet been acknowledged as being in compliance with Statewide Planning Goals pursuant to ORS 197.625(1). However, Portland expects such acknowledgement prior to the hearing before the Metro Council. The amendments to the Comprehensive Plan and Zoning maps will not take effect until Metro Council has considered Portland's requested amendments to the Employment and Industrial Areas Map.

APPLICABLE REVIEW CRITERIA

The criteria for an amendment of the Employment and Industrial Areas Map are contained in Metro Code 3.07.450 H. The criteria (**in bold**) are followed by our response (*in italics*).

- A. **These changes to zoning and Comprehensive Plan designations will not reduce the jobs capacity of the city below the number shown on Table 3.07-1 of Title 1 of the Urban Growth Management Functional Plan (209,215 jobs) because both changes are to zones or Comprehensive Plan designations that allow a higher employment density than the current zoning/Comprehensive Plan designations. Therefore this criterion is met.**
- B. **These changes to zoning and Comprehensive Plan designations will not allow uses that reduce off-peak performance on Major Roadway Routes and Roadway Connectors shown on Metro's 2004 Regional Freight System Map below standards in the Regional Transportation Plan (RTP), or exceed volume-to-capacity ratios on Table 7 of the 1999 Oregon Highway Plan (OHP) for state highways, unless mitigating action is taken that will restore performance to RTP and OHP standards within two years after approval of uses.**

Metro's RTP Table 2.4, Regional Mobility Policy designates LOS "E" as the standard for off-peak hours performance. Interstate 405 is classified as a Main Freight Roadway and NW Nicolai Street is identified as a Freight Road Connector. In April 2010 traffic analysis was conducted for three intersections: NW Nicolai at NW Wardway St., NW Nicolai at US 30, and NW Vaughn at NW 23rd Ave. The intersections performed at Level of Service C, B and D, respectively, in 2010. The analysis showed that in 2030, all three intersections would continue to perform at the same level of service with the proposed zoning in place. This is above the LOS E standard criterion required by Title 4 (see Exhibit 2, Traffic Analysis for Title 4).

The three intersections studied in April 2010 also met the volume-to-capacity ratios on Table 7 of the 1999 Oregon Highway Plan (OHP) for state highways. The standard listed in Table 7 is .99 volume/capacity (v/c). According to Exhibit 3, Supplement to Traffic Analysis for Title 4, in 2030, the v/c for the three intersections are .56, .76 and .93.

Therefore this criterion is met.

- C. These changes to zoning and Comprehensive Plan designations will not diminish the intended function of the Central City or Regional or Town Centers as the principal locations of retail, cultural, and civic-services in their market areas** because Area 2 (north of Pettygrove) already has a high concentration of residential and commercial uses; changing the zoning and designation for this area will actually be an expansion of the Central City, reinforcing the role of the Central City as the principal location of retail, cultural, and civic services in the region. Area 1 (directly north of Vaughn) will become a buffer zone between the industrial sanctuary and the Central City.

Therefore this criterion is met.

- D. These changes to zoning and Comprehensive Plan designations will not reduce the integrity or viability of a traded sector cluster of industries for three reasons:**

First, the resulting reduction in available land for industry-related clusters in the Working Harbor (primarily metals manufacturing and distribution) will be offset by expansion of developable land for office-related clusters in the NW portion of the Central City (particularly creative services and software). This shift is consistent with office growth trends in the River District. Area 2 (north of Pettygrove) has a mix of distribution facilities, residential, retail, and office uses.

Second, the changes will reinforce a functional boundary along the Vaughn corridor between the Working Harbor's Regionally Significant Industrial Area to the north and the higher density, mixed use development in the expanding Central City to the south, encouraging long-term investments in both areas. This Vaughn corridor boundary (Area 1) was jointly developed in the Guild's Lake Industrial Sanctuary Plan (2001 and 2003) and Northwest District Plan.

Third, the change to Area 1 (north of Vaughn) will reinforce the metals cluster, because it will establish a transition buffer between the expanding Central City and a major steel manufacturer on the north side of Vaughn (ESCO), and ease expansion of ESCO's headquarters offices. Having headquarters offices in proximity to the manufacturing functions creates significant efficiencies for companies. Additionally, Area 1 (north of Vaughn) will become a transitional buffer to keep housing and most retail uses from conflicts with the industrial uses, and the buffer will help resist market pressures for residential and retail uses pressing northward.

Therefore this criterion is met.

- E. These changes to zoning and Comprehensive Plan designations will not create or worsen a significant imbalance between jobs and housing in a regional market area.**

There is currently no significant imbalance. Area 1 (north of Vaughn) is changing from a Comprehensive Plan designation of IS (Industrial Sanctuary) to ME (Mixed Employment). Both designations are designed to foster jobs, and housing is severely limited in both. Although the new designation may result in more jobs in the area, the increase will not be significant enough to cause a significant imbalance in the region.

Area 2 (north of Pettygrove) is changing from the IGI zone with an IS (Industrial Sanctuary) Comprehensive Plan designation to the EXd zone with an EX (Central Employment) Comprehensive Plan designation. While both the Industrial and Employment zones and designations allow jobs, the EXd zone also allows residential development. Because both uses

ORDINANCE NO 10-1246
ATTACHMENT 2 TO STAFF REPORT

are allowed—and because it is a relatively small area—the changes will not be enough to cause a significant imbalance in the region.

Therefore this criterion is met.

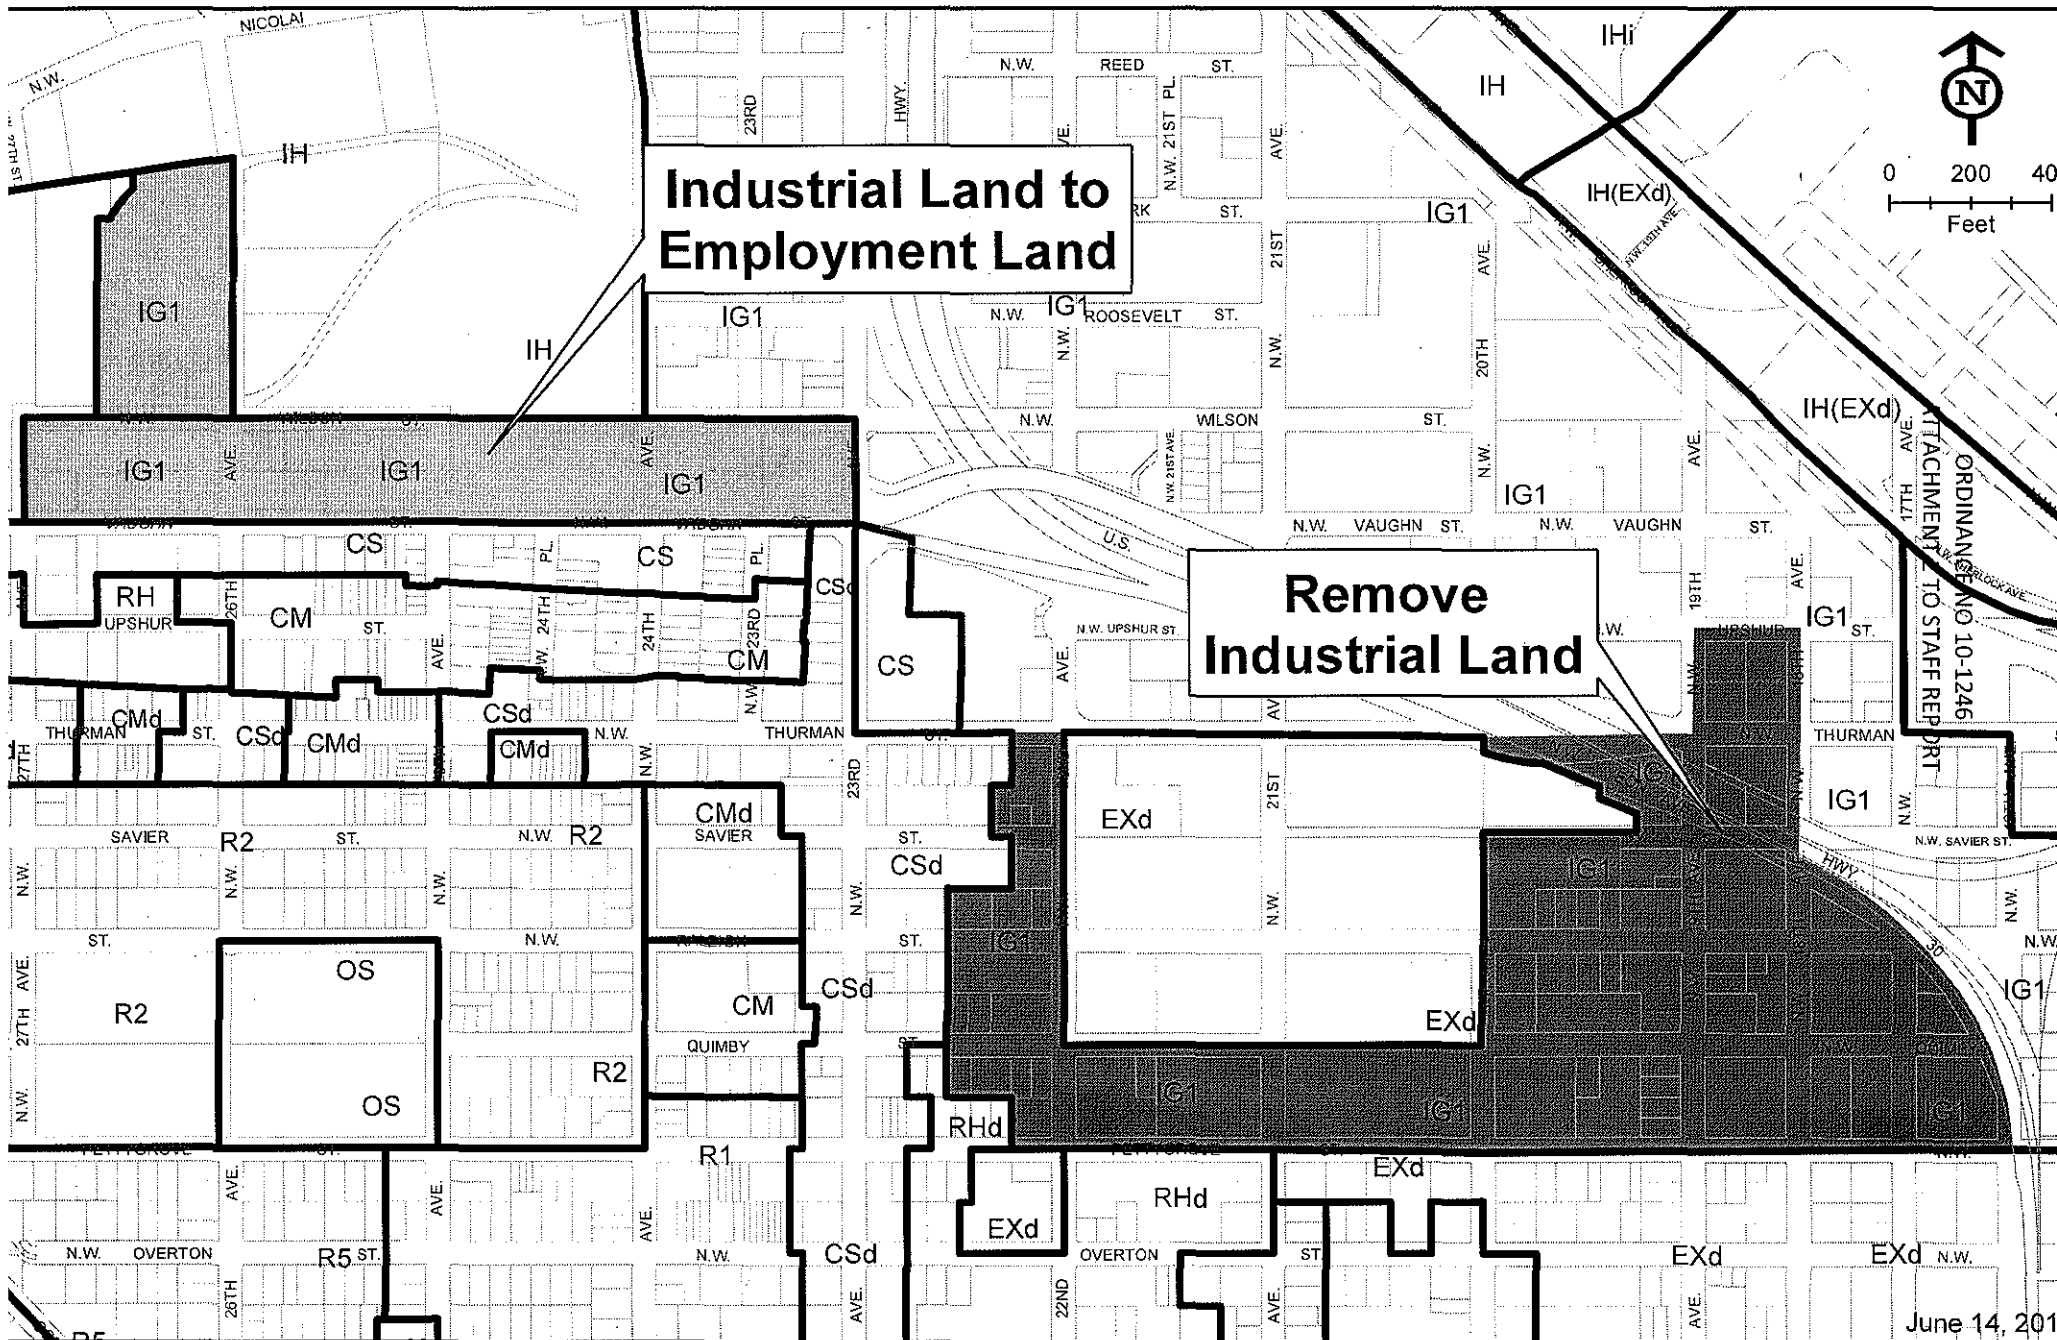

- F. These changes to zoning and Comprehensive Plan designations on lands that are designated as Regionally Significant Industrial Areas will not remove from that designation land that is especially suitable for industrial use due to the availability of specialized services, such as redundant electrical power or industrial gases, or due to proximity to freight transport facilities, such as trans-shipment facilities.**

Both Area 1 (north of Vaughn) and Area 2 (north of Pettygrove) are areas of industrial land where the zone or Comprehensive Plan designation is changing from Industrial to Employment. Neither area is classified by Metro as Regionally Significant.

Therefore this criterion is not applicable.

Exhibit 1

Requested Title 4 Industrial and Employment Land Map Revisions

Traffic analysis for Title 4 Map amendment

(Revised August 6, 2010)

By Ning Zhou, City of Portland

Portland Bureau of Transportation (PBOT) finished the Transportation Planning Analysis two years ago in supporting the NW Remand Plan by Portland Bureau of Planning and Sustainability (BPS).

This summary briefs the findings in responding to the requirements set by Metro's Urban Growth Management Function Plan (UGMFP), Title 4. I-405 is a Main Freight Roadway and NW Nicolai St is a Freight Road Connector in RTP (Regional Transportation Plan). Therefore, an analysis to demonstrate their off-peak hour traffic operational conditions is warranted.

The standards set by the Title 4 (3.07.450 C-4) are listed in Table 1. According to Title 4. 3.07.450 C-4, it is sufficient to satisfy the requirement if NW Remand Plan meets either criterion in Table 1.

Table 1. Off-Peak Performance Standards

| | | Standards |
|------------|---|-----------|
| Criteria 1 | Metro RTP Standards ¹ in LOS | E |
| Criteria 2 | ODOT 1999 OHP ² in V/C | 0.99 |

1. Metro's RTP Table 2.4, Regional Mobility Policy, LOS = Level of Service

2. ODOT's 1999 Oregon Highway Plan, Table 7. V/C = Volume / Capacity.

Three intersections are analyzed in this summary:

- NW Nicolai St at NW Wardway St / NW 29th Ave.
- NW Nicolai St at US 30
- NW Vaughn St at NW 23rd Ave / I-405 ramps

Findings

The analysis finds that all three intersections are projected to be continually operated at the conditions meet to better than the standards specified in Title 4 during off-peak hour in the plan year of 2030. No improvements are proposed by the off-peak traffic analysis¹.

Table 2. Off-Peak Operational Conditions in LOS

| | 2010 | | 2030 | |
|---|------|------|------|------|

| NW Vaughn St at NW 23 rd Ave | D | 0.80 | D | 0.93 |

¹ Although a re-configuration design at I-405 off-ramp is proposed by the NW Remand Plan to relieve the future PM peak congestion at the intersection of NW Vaughn St and NW 23rd Ave, no improvement is necessary based on the traffic conditions during noon hours.

Methodology

No off-peak TMC (turning movement counts) were collected two years ago when the NW Remand traffic analysis were performed. For this Title-4 analysis, fresh 2010 off-peak TMCs are collected² for evaluating the current conditions. City doesn't have off-peak demand model to produce the future off-peak demands for NW Remand traffic analysis. The future off-peak traffic demands are estimated from the projected future PM demands by the formula:

$$V_{2030\text{offpeak}} = V_{2010\text{off-peak}} + \Delta V_{\text{pm}2030\text{-pm}2007} \times (V_{\text{offpeak}} / V_{\text{pmpeak}})$$

Where Δ is the model projected PM traffic growth in turning movements from 2007 to 2030.

Synchro software is used in the operational analysis to derive the LOS and V/C data. All three signals are evaluated as the controller of Actuated & Uncoordinated, which are the specifications of current signal timing plans on the site. All other current signal settings are applied in the analysis. Intersection geometric configurations coded in the model are all as same as current street layouts.

The LOS and V/C readings are extracted from Synchro's HCM (Highway Capacity Manual) Signalized Intersection Capacity Analysis Reports.

Traffic Data

Table 3 lists the 2010 TMCs and projected 2030 traffic demands for the three intersections supporting the analysis.

Table 3. Off-Peak Hour Turning Movement Volumes in the Analysis

| | | eastbound | | | westbound | | | northbound | | | southbound | | | total |
|-------------------|------|-----------|-----|-----|-------------|-----|-----|------------|------|-----|------------|------|-----|-------|
| | | L | T | R | L | T | R | L | T | R | L | T | R | |
| Nicolai / US30 | 2010 | 85 | 15 | 305 | 40 | 25 | 70 | 150 | 885 | 45 | 45 | 985 | 115 | 2765 |
| | 2030 | 85 | 15 | 345 | 70 | 25 | 70 | 560 | 1090 | 85 | 45 | 1270 | 115 | 3775 |
| Nicolai / Wardway | 2010 | 5 | 220 | 225 | 20 | 185 | 20 | 210 | 45 | 15 | 25 | 55 | 5 | 1030 |
| | 2030 | 10 | 345 | 335 | 20 | 310 | 20 | 255 | 45 | 15 | 25 | 55 | 5 | 1440 |
| Vaughn / 23rd | 2010 | 0 | 495 | 85 | 165/ 305 | 475 | 155 | 100 | 65 | 420 | 120 | 60 | 25 | 2470 |
| | 2030 | 0 | 555 | 85 | 180/ 360 | 510 | 340 | 100 | 65 | 455 | 155 | 75 | 25 | 2905 |

It should be noted that the 2010 traffic counts at the intersection of NW Vaughn St and NW 23rd Ave / I-405 Ramp are taken at the hours between 10:00AM to 12:00PM, which doesn't cover the whole length of the required 6-hour from 9:00AM to 3:00PM. However,

² NW 29th Ave. n/ NW Nicolai St is closed to through traffic due to constructions currently, and it is a important leg of the intersection. Therefore, 24-hour link counts on all three other major approaching legs are collected and the existing TMC is estimated from the time of day factor and two AM / PM TMCs collected in 2007. The time of the day factor is calculated at approach level, and the formula of (am+pm)/2 is used to distribute the turn movements.

ORDINANCE NO 10-1246
ATTACHMENT 3 TO STAFF REPORT

the engineering analysis indicated that the data is sufficient in supporting the planning process:

- It is determined that the peak volume data used in the analysis is consistent with the real peak volume of the required 6-hour time span.
- It is reasonable to state that the turning movement pattern deriving from the data is similar to the traffic patterns of the real peak hour of the 6-hour period.
- It has been demonstrated that the intersection could be operated at the acceptable condition set by Title 4 with additional 5% of the total demands over the projected 2030 volumes.
- It is modeled that the proposed zoning change in NW Remand Plan would only add about 12 vehicles to this intersection during the noon peak hour, which accounts for only about 0.2% of its capacity, and should have little impact to its operation.

Supporting Analysis
for the intersection of NW Vaughn St and NW 23rd Ave.
(draft, 8/6/2010)
Ning Zhou, PE., PTOE

For conducting the Title 4 traffic analysis for NW Remand study, City has collected TMC (Turning Movement Count) at the intersection of NW Vaughn St and NW 23rd Ave. between 10:00AM to 12:00PM in April, 2010.

Apparently the TMC didn't cover the whole length of the required 6-hour span from 9:00AM to 3:00PM. Since Broadway Bridge and North Pearl area are currently under construction and it will not re-open to traffic until September, it is impossible to simply re-collect the TMC at the intersection to satisfy the Title 4 requirement.

However, the detailed traffic engineering studies indicate that the current counts are sufficient in supporting the planning application, and should be good for the Title 4 requirement. Followings are the findings.

- a. It is determined that the traffic at the site is relatively constant from 9:00AM – 3:00PM. City doesn't have the 6-hour turning count for this intersection, but the link 24-hour count from adjacent street (NW Vaughn St e/ NW 25th St) shows that the traffic volumes used in the analysis (11:00-12:00) is only 2% off the middle-day real peak. There is no noticeable trend that the traffic is tend to increase with the time moves before it reaches PM rush hours, and the 2% difference is well within the hourly fluctuation range of the normal hourly traffic.

Table 1. Middle day traffic counts on NW Vaughn St e/ 25th Ave (2006)

| | Volumes | Peak | % of peak |
|-------------|---------|------|-----------|
| 9 - 10AM | 1,031 | | |
| 10 - 11AM | 950 | | |
| 11AM - 12PM | 1,103 | | 98% |
| 12 - 1PM | 1,076 | | |
| 1 - 2PM | 1,129 | Peak | |
| 2 - 3PM | 1,106 | | |

*The peak hour volume might be varied slightly if use 15-minute interval method.

- b. It is reasonable to assume the analyzed peak hour traffic hold the same traffic pattern as the real peak hour of the 6-hour middle-day span. Without the 6-hour turning movement count, it is hard to declare that for sure. But by the same token, there is no reason to suspect the traffic pattern at the intersection during the middle day hours would significantly shift away from its 11:00-12:00 traffic. This intersection connects neighborhood collectors with a freeway ramp, its traffic pattern during the whole middle day hours should be relatively stabled. Table 2 lists the traffic patterns of AM, PM and off peak hours of this intersection. No noticeable traffic pattern changes between the counted 2 middle day hours either, see Table 3.

Table 2. The distribution pattern of approach traffic at the intersection

| | EB % | WB % | NB % | SB % |
|----------|------|------|------|------|
| AM Peak | 25 | 54 | 17 | 4 |
| Off Peak | 23 | 45 | 24 | 8 |
| PM Peak | 25 | 38 | 28 | 8 |

Table 3. Traffic pattern comparison between the two surveyed middle-day hours at the intersection

| | EB | | | WB | | | | NB | | | SB | | |
|-------------|----|-----|----|----|-----|-----|----|----|----|-----|----|----|----|
| | L | T | R | U | L | T | R | L | T | R | L | T | R |
| 10:00-11:00 | | 19% | 3% | 8% | 13% | 20% | 6% | 3% | 3% | 17% | 5% | 2% | 1% |
| 11:00-12:00 | | 20% | 3% | 7% | 12% | 19% | 6% | 4% | 3% | 17% | 5% | 2% | 1% |

- c. The Title 4's standards for approval are LOS E or V/C of 0.99 for this intersection. The analysis states that the intersection would be operated at LOS D or V/C = 0.93 in planning year of 2030, which is much lower than the approval criteria. The volumes used in 2030 analysis equal to about 18% growth from today in terms of total approach volumes. The test model run demonstrates that the intersection would be operated at an accepted condition even with another 5% additional traffic growth to every movement (LOS D and V/C 0.94). It is safe to assume that the 5% additional traffic will compensate well the impacts or doubts resulting from the imperfect traffic counts.
- d. It is estimated the proposed land use from NW Remand would add about 12 vehicles to this intersection (all 4-approaches) during 2030 noon peak hour. The capacity of the intersection is modeled at 5500+ based on current street layout and signal timing plan. The 12 additional vehicles represent only 0.2% of its total approach capacity. Therefore, the additional traffic from the proposed NW Remand project would have little to none effect to the operation condition of the intersection in projected 2030 noon peak hour, in either terms of total approach volumes or in individual movement traffic.

Date: Friday, August 6, 2010
To: Ted Reid, Regional Planner
From: Anthony Butzek, Metro Transportation Engineer; PE, PTOE
Subject: Portland Title 4 Amendment – NW Remand (internal)

I am able to sign off on Portland's compliance with Title 4 pertaining to traffic and freight movement.

Title 4 requires that the proposed change... *"would not allow uses that would reduce off-peak performance on Major Roadway Routes and Roadway Connectors shown on Metro's 2004 Regional Freight System Map below standards in the Regional Transportation Plan ("RTP"), or exceed volume-to-capacity ratios on Table 7 of the 1999 Oregon Highway Plan ("OHP") for state highways, unless mitigating action is taken that will restore performance to RTP and OHP standards within two years after approval of uses."*

The applicable freight routes in the vicinity are NW Nicolai Street and US 30. Specifically, Metro asked the City to review the following intersections for compliance with Title 4:

- NW Nicolai St. at US 30
- NW Nicolai St. at NW Wardway St. / NW 29th Ave.
- NW Vaughn St. at NW 23rd Ave. / US 30 (I-405) ramps

The City has demonstrated to a reasonable extent that the proposed changes would not reduce off-peak performance on either facility below standards contained in the RTP or OHP. The City's analysis was for year 2030 conditions.

The City produced a Traffic Analysis as a technical memorandum, which is available for review. As documented in the analysis, the proposed land use changes have a negligible off-peak traffic impact.
