COMMUNICATION

ADJOURN

AN EXECUTIVE SESSION WILL BE HELD IMMEDIATELY FOLLOWING THE PUBLIC MEETING PURSUANT TO ORS 192.660(2)(h), TO CONSULT WITH LEGAL COUNSEL IN REGARD TO CURRENT LITIGATION OR LITIGATION THAT IS LIKELY TO BE FILED.

Metro respects civil rights

Metro fully complies with Title VI of the Civil Rights Act of 1964 and related statutes that ban discrimination. If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit www.oregonmetro.gov/civilrights or call 503-797-1536. Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1890 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. For up-to-date public transportation information, visit TriMet's website at www.trimet.org.

Thông báo về sự Metro không kỳ thị của

Metro tôn trọng dân quyền. Muốn biết thêm thông tin về chương trình dân quyền của Metro, hoặc muốn lấy đơn khiếu nại về sự kỳ thị, xin xem trong www.oregonmetro.gov/civilrights. Nếu quý vị cần thông dịch viên ra dấu bằng tay, trợ giúp về tiếp xúc hay ngôn ngữ, xin gọi số 503-797-1890 (từ 8 giờ sáng đến 5 giờ chiều vào những ngày thường) trước buổi họp 5 ngày làm việc.

Повідомлення Metro про заборону дискримінації

Меtro з повагою ставиться до громадянських прав. Для отримання інформації про програму Metro із захисту громадянських прав або форми скарги про дискримінацію відвідайте сайт www.oregonmetro.gov/civilrights. або Якщо вам потрібен перекладач на зборах, для задоволення вашого запиту зателефонуйте за номером 503-797-1890 з 8.00 до 17.00 у робочі дні за п'ять робочих днів до зборів.

Work Session Worksheet

PRESENTATION DATE: November 24, 2015 TIME: 2:00 P.M. LENGTH: 40 minutes

PRESENTATION TITLE: Solid Waste Roadmap: Landfill Capacity Policy

DEPARTMENT: Property and Environmental Services

PRESENTER(s): Paul Slyman (503-797-1510, paul.slyman@oregonmetro.gov) Bryce Jacobson

(503-797-1663, bryce.jacobson@oregonmetro.gov); Ken Ray (503-797-1508,

ken.ray@oregonmetro.gov)

WORK SESSION PURPOSE & DESIRED OUTCOMES

- **Purpose:** To provide Council with a staff recommendation for the primary definition of landfill capacity and an update on other elements of the project.
- **Desired outcomes:** Input from Council on the recommended landfill capacity definition and other project elements.

TOPIC BACKGROUND & FRAMING THE WORK SESSION DISCUSSION

This project was initiated by Council Resolution 14-4589 adopted on Dec. 4, 2014, which directs staff to "evaluate the disposal capacity of waste at new, existing, or expanded landfills and to recommend changes to the Metro code to implement the policy." The purpose of this Metro Council-directed project is to develop a complete and explicit policy to guide Metro's future decisions about which landfills shall be eligible to receive the region's waste.

The Landfill Capacity Policy project includes three major phases that will be completed by June 30, 2016: 1) Research, 2) Stakeholder and public engagement and 3) Developing policy and code changes.

Landfill Capacity Definition:

Metro Resolution 14-4589 estimates the existence of over 100 years of future capacity at active landfills that are accessible to Metro. The resolution directs staff to develop a policy that keeps Metro region waste from contributing to the expansion of any existing landfill or the creation of a new landfill. To be able to develop a policy that meets Council's direction, staff first needs to develop a working definition of landfill capacity that can be used to distinguish between those landfills that have future capacity to receive Metro region waste and those that would need to expand. Staff developed two options for Metro's definition of landfill capacity, one that is based on the "years of landfill life remaining" and a preferred option that determines capacity through the Site Development Plan amendment process. Staff will present these to Council along with a staff recommendation for the one that provides the clearest direction and the best fit with the objectives of this project.

Additional Planned work:

At a work session on Aug. 4, staff described how this project would include both a capacity definition and an additional set of evaluation criteria that Metro Council can use to prioritize all

eligible landfills against each other to determine which landfills provide maximum benefit on important criteria like the environment, value to the rate payer and employment. Staff will engage Council in a criteria weighting exercise in early 2016 using a new solid waste modeling tool being developed to support Solid Waste Roadmap work to demonstrate some of the impacts of different criteria. For the purpose of providing a small preview of the types of data associated with different criteria, at today's work session staff will share some of the impacts from the model related to transportation emissions and rate impacts.

Public engagement efforts related to the landfill capacity project will take place in the first few months of 2016 and will aim to raise public awareness of considerations about the choices Metro faces for where to send garbage. These engagements will also aim to solicit comments and feedback from interested members of the public on the criteria for choosing landfills in the future. These engagement efforts may include public meetings, an Opt In survey, or other engagement methods.

QUESTIONS FOR COUNCIL CONSIDERATION

- Does the landfill capacity definition recommended by staff meet the council objectives for this project?
- Do you have any other input on the next steps with this project?

PACKET MATERIALS

- Would legislation be required for Council action? ☐ Yes ☒ No
- If yes, is draft legislation attached? ☐ Yes ☒ No
- What other materials are you presenting today? None

SOLID WASTE ROADMAP: TRANSFER SYSTEM CONFIGURATION PROJECT

Metro Council Work Session Tuesday, November 24, 2015 Metro Regional Center, Council Chamber

METRO COUNCIL

PRESENTATION DATE: November 24, 2015 **LENGTH:** 45 Minutes

PRESENTATION TITLE: Solid Waste Roadmap: Transfer System Configuration Project

DEPARTMENT: Finance and Regulatory Services

PRESENTER(s): Tim Collier, 503-797-1913, tim.collier@oregonmetro.gov

Dan Pitzler, CH2M

WORK SESSION PURPOSE & DESIRED OUTCOMES

 Purpose: To inform councilors of project status and progress since the last Work Session in July.

• Outcome: Councilors give input on progress and direction.

TOPIC BACKGROUND & FRAMING THE WORK SESSION DISCUSSION

Project Background. The Transfer System Configuration Project is one of the six planning elements of the Solid Waste Roadmap Program. The purpose of the project is to determine what model of the public-private transfer system best serves the public interest. "Public interest" is defined as delivering on the six public benefits previously presented to the Metro Council, as follows:

- 1. Protect people's health
- 2. Protect the environment
- 3. Get good value for the public's money
- 4. Keep the commitment to the highest and best use of materials
- 5. Be adaptive and responsive in managing materials
- 6. Ensure services are available to all types of customers

The objectives of the project are:

- To determine what services the system should provide, to whom and how
- To ensure that Transfer system serves the needs of the Metro region for materials generated in the Metro region.

Since the last engagement with the council, staff has been working independently and with stakeholders – including an 11-member Task Force whose members represent facilities that handle over 95 percent of the region's tonnage and over two-thirds of the hauling interests – on background, history, assessment, critical issues, and evaluation criteria. The Task Force has met eight times (as of this writing) has translated the 6 public benefits into alternatives evaluation criteria,, has considered various options for maximizing the public interest, and has developed an industry preferred alternative. Metro staff are continuing to evaluate other alternatives.

As the project is in the alternatives-evaluation phase, staff is seeking council's guidance on the policy direction for that work. There are also some services that we have come to recommendations for (Household Hazardous Waste, for example).

Proceeding with more intentionality on services delivered by the system

For the last 25 years, tonnage handled by private-sector facilities has grown, while tonnage through the Metro stations has declined. As a result of its shrinking operating footprint, Metro has found it increasingly difficult to deliver public benefits through its transfer stations – either by direct provision or by influencing the market.

Staff, with input from the task force, have developed a set of criteria with which to evaluate various approaches to service deliveryin the system.

The primary services that staff is looking for the system to provide, in a manner most consistent with the six public benefits are:

- Self- tipping vehicles (commercial haulers)
- Light vehicles without tippers(Self-haul)
- Household hazardous waste collection and disposal
- Dry waste recovery (Post-collection recovery)
- Wet waste transfer (Organics processing both residential and commercial)

The alternatives analysis process has led us to 5 major alternatives that demonstrate a wide range of approaches to maximizing public benefits. At the Work Session, staff will describe these alternatives, as follows: Status Quo, Operators Choice, Geographic Equity, Minimum Prescribed Services and Prescribed Services and Zones. We will share these alternatives with the Council to receive additional input.

Purpose of Task Force

The task force consisting of industry members has been formed in an advisory capacity to help staff craft recommendations for Council to deliberate on. This task force has reviewed the overall criteria to help support the eventual recommendations and review the critical success factors important to the success of the project. This task force is in advisory form only and will be making recommendations to staff not directly to Council. When complete, staff will bring to Council one or more recommendations for improving service delivery in the transfer system. Transition for full implementation would be expected over the next few years, before Metro's landfill contract with Waste Management expires December 31, 2019.

QUESTIONS FOR COUNCIL CONSIDERATION

- Are these the right mix of alternatives for the Transfer System to provide?
- Is staff headed in the right direction? Any changes to criteria, methodology, etc.

PACKET MATERIALS

- Would legislation be required for Council action ☑ Yes ☐ No
- If yes, is draft legislation attached? ☐ Yes ☑ No
- Other materials (attached): None

Materials following this page were distributed at the meeting.

Transfer System Configuration Project

Update to Metro Council

Tim Collier, Director of Finance and Regulatory Services Dan Pitzler, CH2M November 24, 2015

Project overview

What model of the public-private system of waste transfer stations best serves the public interest?

Project Objectives:

- Determine what services the system should provide, by whom and how.
- Ensure the transfer system serves the needs of the region for materials generated within the region.

Questions for Council

 Does Council have any additional alternatives that should be explored?

 Is the current level of selfhaul service adequate?

 Does Council support roundups as the best method for household hazardous waste service at locations other than Metro facilities?

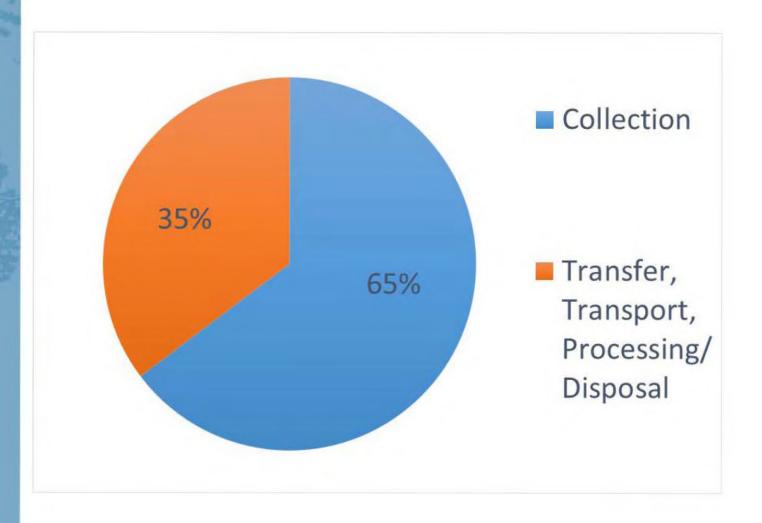

- Extensive interviews with internal staff, industry and local governments
- Formed industry task force
- Drafted evaluation criteria developed based on the six public benefits
- Developed alternatives and conducted initial evaluations

Public benefits

- Protect people's health
- Protect the environment
- Get good value for the public's money
- Keep our commitment to the highest and best use of resources
- Be adaptable and responsive in managing materials
- Ensure services are available to all types of customers
- Recognize prior and future public and private investment

Solid Waste System Economics

Note: Collection excludes commingled recycling

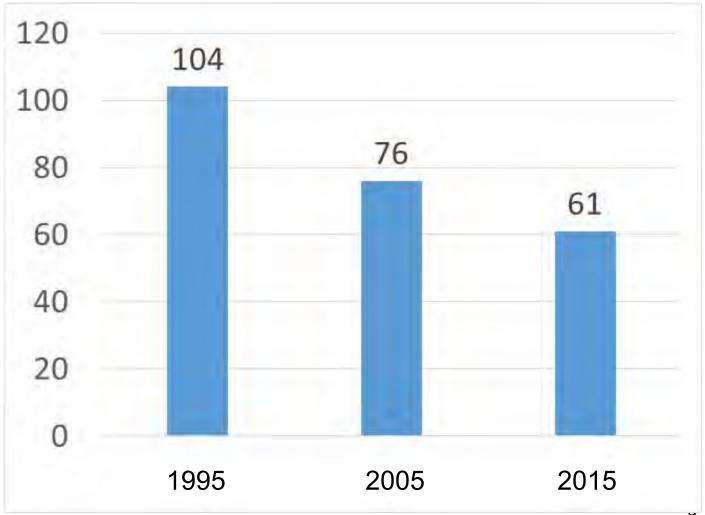

- Collection: in Portland commercial market only
 - Other collection occurs under exclusive franchise
- Rates in franchises regulated by local jurisdictions
- Cost of transfer, transport, and disposal is largely a pass-through cost to collection operations

- Managing materials throughout the full management cycle
- Stated objective of larger, national firms
- More than half of tons collected delivered to landfills owned by collector
- Difficult competitive landscape for small, local firms without landfills

Number of Collection Companies in Metro Region

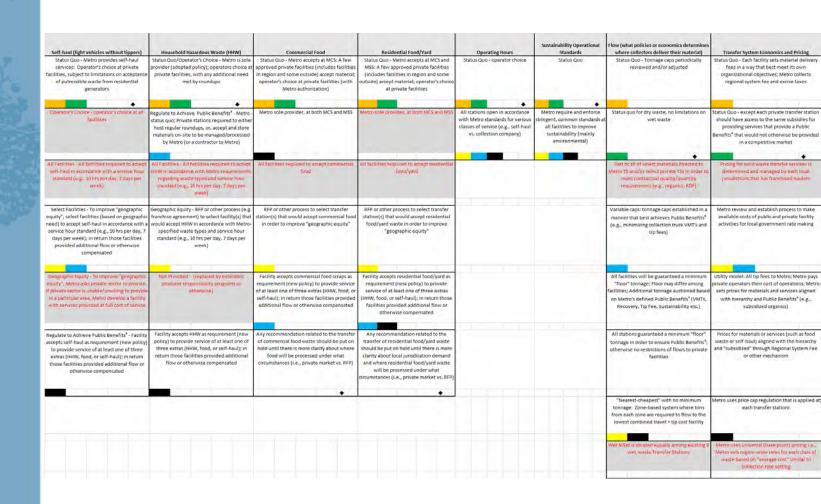

- Economies of scale in transfer operations
- Caps ensure flow and Metro tip fee as a "benchmark" for private stations
- Removing caps:
 - Initial impact of removing caps might be relatively minor
 - Long-term risk of further industry consolidation and higher per-ton costs at Metro stations

- Self-haul
- Household hazardous waste
- Commercial food scraps
- Residential food/yard waste
- Mixed dry waste recovery
- Operating hours
- Sustainability operational standards
- Number and location of stations
- Flow to stations
- Economics and pricing

Options for Each System Element

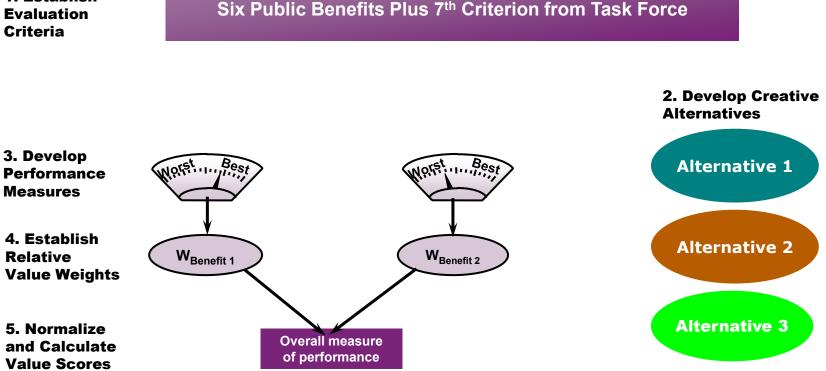

Five System Alternatives

- Status quo
- 2. Operator's choice
- 3. Geographic equity
- 4. Minimum prescribed services, variable caps, and pricing clarity
- 5. Prescribed services, zone-based flow, and rate regulation

Multi-Objective Decision Analysis (MODA)

Initial Conclusions: Status Quo

- Self-haul
- Household hazardous waste
- Commercial food scraps
- Residential food/yard waste
- Mixed dry waste recovery
- Operating hours
- Sustainability operational standards
- Number and location of stations
- Flow to stations
- Economics and pricing

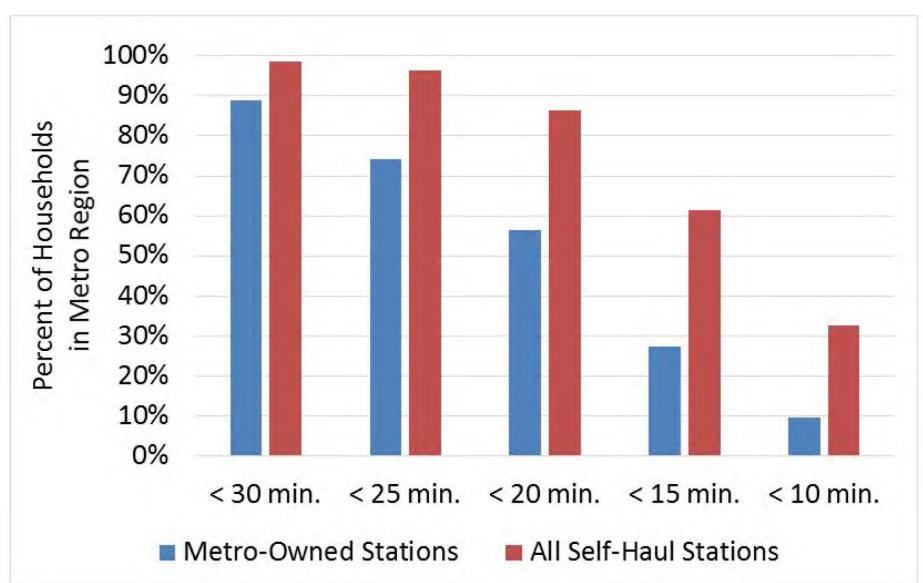

Self-Haul Characteristics

- Highly valued service high user satisfaction
- Metro stations and five private stations
- High-cost service: substantially higher than collection vehicle service
- Requires more queuing and unloading space
- Types and hours of service vary at different stations

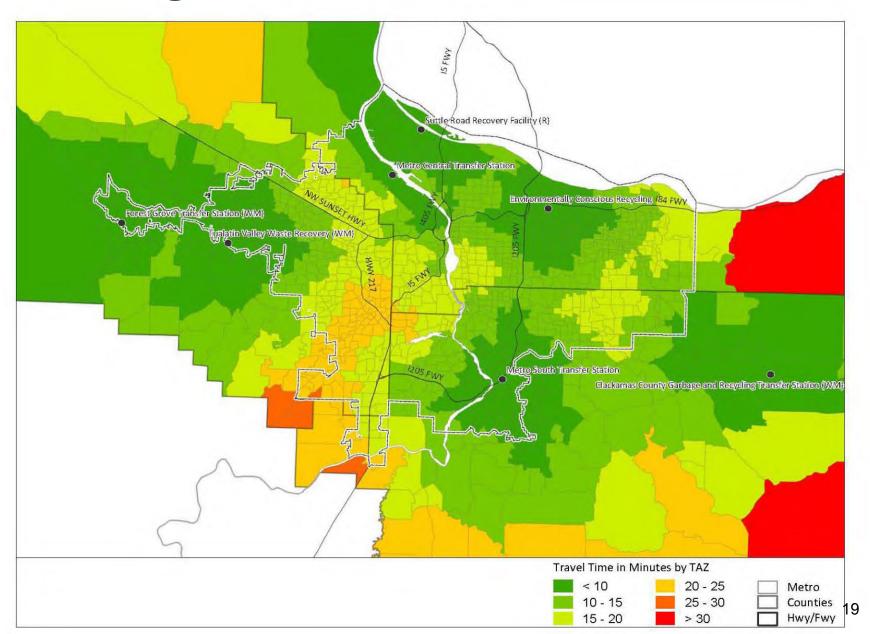

- Most common materials: mixed dry waste and C&D: accepted by 6 stations
- 94% at MCS and 87% for MSS, reported having garbage and recycling services at their home
- About 80% of residential customers deliver material 1-3 times annually
- 70% of business self-haulers reported visiting stations one or more times per month

Driving Time to Self-Haul Stations

Driving Time to Self-Haul Stations

- Most residential customers go 1-3 times per year and drive < 20 minutes
- Some difference in level of service provided
- Explored various alternatives
- Providing additional service costly compared to public benefits
- Staff and Task Force consensus:
 Existing system works well, no need for substantial new service

- Explored various alternatives
- Important but extremely high-cost program, particularly at stations
- Round-ups are cost effective
- Staff and Task Force consensus: If additional service is desired, use additional round-ups

Proposed Schedule

- Task Force to meet again (December 3)
- Finalize staff analysis of Alternatives:
 December 2015
- Council work session on proposals: January/February 2016
- Finalize Council action: Spring 2016

- Does Council have any additional alternatives that should be explored?
- Is the current level of selfhaul service adequate?
- Does Council support roundups as the best method for household hazardous waste service at locations other than Metro facilities?

Metro Transfer System Configuration - Draft Strategy Table Services, Flow, and Pricing

Alternatives	Self-haul (light vehicles without tippers)	Household Hazardous Waste (HHW)	Commercial Food	Residential Food/Yard	Operating Hours	Sustainability Operational Standards	Flow	Transfer System Economics and Pricing
Status Quo	Status Quo - Metro provides self- haul services: Operator's choice at private facilities, subject to	Status Quo/Operator's Choice - Metro is sole provider (adopted	Status Quo - Metro accepts at MCS: A few approved private facilities (includes facilities in region and some	Status Quo - Metro accepts at MCS and MSS: A few approved private facilities (includes facilities in region	Status Quo - operator choice	Status Quo	Status Quo - Tonnage caps periodically reviewed and/or adjusted	Status Quo - Each facility sets material delivery fees in a way that best meet its own organizational objectives; Metro collects regional system fee and excise taxes
Operator Choice	limitations on acceptance of putrescible waste from residential generators	policy); operators choice at private facilities, with any additional need met by roundups	outside) accent material:				Status quo for dry waste, no limitations on wet waste	Status Quo - except each private transfer station should have access to the same subsidies for providing services that provide Public Benefits that would not otherwise be provided in a competitive market
Geographic Equity	Select Facilities - To improve "geographic equity", select facilities (based on geographic need) to accept self-haul in accordance with a service hour standard (e.g., 10 hrs per day, 7 days per week); in return those facilities provided additional flow or otherwise compensated	Geographic Equity - RFP or other process (e.g. franchise agreement) to select facility(s) that would accept HHW in accordance with Metro-specified waste types and service hour standard (e.g., 10 hrs per day, 7 days per week)	RFP or other process to select transfer station(s) that would accept commercial food in order to improve "geographic equity"	RFP or other process to select transfer station(s) that would accept residential food/yard waste in order to improve "geographic equity"	All stations open in accordance with Metro standards for various classes of service (e.g., self-haul vs. collection company)	Metro require and enforce stringent, common standards at all facilities to improve sustainability (mainly environmental)	"Nearest-cheapest" with no minimum tonnage: Zone-based system where tons from each zone are required to flow to the lowest combined travel + tip cost facility	Metro review and establish process to make available costs of public and private facility activities for local government rate making
Minimum prescribed services, variable caps, and pricing clarity		Regulate to Achieve Public Benefits ^a - Metro - status quo; Private stations required to either host regular roundups, or, accept and store materials on-site to be managed/processed by Metro (or a contractor to Metro)	Facility accepts commercial food scraps as requirement (new policy) to provide service of at least one of three extras (HHW, food, or self-haul); in return those facilities provided additional flow or otherwise compensated	Facility accepts residential food/yard as requirement (new policy) to provide service of at least one of three extras (HHW, food, or self-haul); in return those facilities provided additional flow or otherwise compensated			Variable caps: tonnage caps established in a manner that best achieves Public Benefits ^a (e.g., minimizing collection truck VMT's and tip fees)	
Prescribed services, cone-based flow, and rate regulation		Facility accepts HHW as requirement (new policy) to provide service of at least one of three extras (HHW, food, or self-haul); in return those facilities provided additional flow or otherwise compensated	Metro sole provider, at both MCS and MSS				"Nearest-cheapest" with no minimum tonnage: Zone-based system where tons from each zone are required to flow to the lowest combined travel + tip cost facility	Metro uses price cap regulation that is applied at each transfer station

Note: VMT calculations would consider the location of the customer base, truck yard, and disposal / transfer. Allowed

^aPublic Benefits as Amended by the Task Force.

MSS - Metro Central Station

MSS - Metro South Station
