BEFORE THE METRO COUNCIL

FOR THE PURPOSE OF ADDING OR AMENDING)	RESOLUTION NO. 18-4897
EXISTING PROJECTS TO THE 2018-21)	
METROPOLITAN TRANSPORTATION)	Introduced by: "Chief Operating Officer
IMPROVEMENT PROGRAM (MTIP) INVOLVING)	Martha Bennett in concurrence with
SEVENTEEN PROJECTS IMPACTING METRO,)	Council President Tom Hughes"
ODOT, PORTLAND, SMART, TRIMET, AND	,	
WASHINGTON COUNTY (IN18-11-IUN)		

WHEREAS, the Metropolitan Transportation Improvement Program (MTIP) prioritizes projects from the Regional Transportation Plan (RTP) to receive transportation related funding; and

WHEREAS, the Joint Policy Advisory Committee on Transportation (JPACT) and the Metro Council approved the 2018-21 MTIP via Resolution 17-4817 on July 27, 2017; and

WHEREAS, JPACT and the Metro Council must approve any subsequent amendments to add new projects or substantially modify existing projects in the MTIP; and

WHEREAS, the U.S. Department of Transportation (USDOT) has issued clarified MTIP amendment submission rules and definitions for MTIP formal amendments and administrative modifications that both ODOT and all Oregon MPOs must adhere to which includes that all new projects added to the MTIP must complete the formal amendment process; and

WHEREAS, the Oregon Transportation Commission (OTC) approved ODOT's request to transfer funding from four illumination and lighting projects including the I-5 - N Denver Ave NB Tunnel Illumination, OR217 – SW Allen Blvd & Denny Rd Interchanges, I-5 at I-205 Interchange, and the I-205 at OR43 project to fully fund the I-5 – Marquam Bridge Electrical & Lighting System Replacement project; and

WHEREAS, higher than expected construction phase bids for the OR99E Rockfall – Oregon City Tunnel to Old Canemah Park project requires and approximately an additional \$400,000 to be added to the project to address both construction and PE phase funding shortfalls; and

WHEREAS, ODOT's US30BY (Lombard) Safety Extension project is required to address additional American Disability Act program requirements resulting in a cost increase and a limits adjustment to be North Fiske Ave to North Wilbur for the project, and a decision to split the project in two projects with the second one being US30BY (Lombard) at Fenwick project which will be locally funded and completed by the city of Portland; and

WHEREAS, ODOT has secured funding for the construction phase for the OR224 at I-205 westbound third through-lane project, but will also adjust the limits to be I-205 to Pheasant Court plus needs to obligate the construction phase before the end of federal fiscal year 2018; and

WHEREAS, ODOT has approved PBOT's request to down-scope the Connected Cully project by removing four of six main scope elements to keep the project within the federal grant funding award limits, but must also complete a second locally funded project consisting of the removed scope elements and will consist of and be in parallel to a Metro Regional Flexible Funding Allocation (RFFA) award project in the Cully neighborhood area to ensure the main scope elements are delivered as promised; and

WHEREAS, PBOT has received ODOT's approval to re-scope their Highway Safety Improvement Program (HSIP) funding award to address their highest safety upgrades and needs, plus will add \$318,186 of local funds to complete the required safety upgrades; and

WHEREAS, Metro, DEQ, and the State CMAQ Manager have approved Portland's re-scoped Red Electric Trail project to be an off-street bike/ped trail between Bertha Blvd to Capitol Highway and have determined it to be a satisfactory Transportation Control Measure (TCM) suitable substitute, and have evaluated the new air quality emission reduction project analysis and determined the re-scoped project to be acceptable for the continued use of Congestion Mitigation Air Quality (CMAQ) improvement funds; and

WHEREAS, Metro has authorized the annual Regional Travel Options (RTO) funding allocation to SMART and TriMet in the amount of \$81,306 of federal STP for SMART and \$502,626 of federal STP for TriMet for both agencies to assist Metro in the continue efforts to promote and achieve RTO program goals and objectives; and

WHEREAS, continuing preliminary engineering assessments have revealed that the Beef Bend Culvert Replacement Emergency Relief project requires additional environmental mitigation requirements to be added to the scope of work which has impacted the project delivery schedule and required formal FHWA approval to slip the construction phase to 2019, but also will be covered by an approved increase in federal Emergency Relief funds in the amount of \$1,611,551; and

WHEREAS, all amended projects were evaluated against six revised MTIP review factors to ensure all requested changes and additions can be accomplished legally through the MTIP amendment process; and

WHEREAS, the MTIP review factors included project eligibility/proof of funding, RTP consistency with the financially constrained element, consistency with RTP goals and strategies, determination of amendment type, inclusion in the Metro transportation regional models, determination of Regional Significance, fiscal constraint verification, and compliance with MPO MTIP federal management responsibilities; and

WHEREAS, the MTIP's financial constraint finding is maintained as all projects proof of funding has been verified; and

WHEREAS, no negative impacts to air conformity will exist as a result of the changes completed through the June 2018 Formal MTIP Amendment; and

WHEREAS, all projects included in the June 2018 Formal MTIP Amendment successfully completed a required 30-day public notification/opportunity to comment period without any significant issues raised; and

WHEREAS, TPAC received their notification and recommended approval on June 1, 2018 and approved the amendment recommendation to JPACT; now therefore

BE IT RESOLVED that the Metro Council hereby adopts the recommendation of JPACT on June 21, 2018 to formally amend the 2018-21 MTIP to include the June 2018 Formal Amendment bundle consisting of seventeen projects.

ADOPTED by the Metro Council this 28 day of June 2018.

om Hughes, Council President

Approved as to Form:

Alison R. Kean, Metro Attorney

2018-2021 Metropolitan Transportation Improvement Program Exhibit A to Resolution 18-4897

Proposed June 2018 Formal Amendment Bundle
Amendment Type: FORMAL, JN18-11-JUN
Total Number of Projects: 17

ODOT Key	Lead Agency	Project Name	Required Changes
----------	-------------	--------------	------------------

Note: The below project Key numbers 18760, 18761, 20450, and 20475 are part of a larger requirement to transfer funding from these projects to Key 19652 enabling Key 19652 to be completely funded. This represents a fund leveraging effort that identifies certain projects which can be delayed while others need to address a funding shortages, and must keep moving forward. Fund leveraging efforts occur frequently to maximize the use of the federal and state funds ensuring they do not lapse, or are redacted when issues impact projects resulting in unforeseen delays. The funding adjustments made to Keys 18760, 18761, 20450, and 20475 in support of Key 19652 required OTC approval which occurred during their May 2018 meeting. Additional details will be included in the Staff Report for Metro's June 1, 2018 Transportation Policy Alternatives Committee (TPAC) agenda.

Project #1 ODOT Key 18760 MTIP ID 70759	ODOT	I-5: N Denver Ave NB Tunnel Illumination	TRANSFER FUNDING: Construction phase funding of \$246,000 is being removed from the project. Prior obligated \$75k is left in the PE phase. The \$246k of funding will be transferred to the I-5 Marquam Bridge Lighting Project in Key 19652. This transfer is occurring as a result from the initial design of the project determined insufficient funding would exist to complete the project. The replacement conduit and fixtures will require LED upgrades which will reduce long term maintenance costs, but will be more expensive to construct. The project is now in the prior obligated MTIP section as a PE only project until the funding situation is resolved.
---	------	--	--

Project #2 ODOT Key 18761 MTIP ID 70760	ODOT	OR217: SW Allen Blvd & Denny Rd Interchanges	TRANSFER FUNDING: A total of \$180k from this project is being transferred to Key 19652 to fully fund that project. Only \$24k of obligated PE phase funding was determined required to remain with the project. The remaining \$24,000 and \$157,000 from the construction phase is being transferred to Key 19652. The project is left programmed with only PE funds at \$24,000. The funding in this project (Key 18761) was to be combined with the SB OR217 Aux Lane project. However, the budget was insufficient to support illumination scope elements. The illumination scope elements were removed from the SB OR217 Aux Lane project. When HB2017 was passed, it included major funding for work on the SB OR217 Aux Lane project. ODOT has determined the original funding for OR217 illumination (this project) can be applied to a higher priority on the S Marquam bridge project in Key 19652. This amendment completes the transfer of \$181k to Key 19652. Key 18761 now becomes a prior obligated project no longer in the active 2018 MTIP.					
Project #3 ODOT Key 20450 MTIP ID 70995	ODOT	I-5 at I-205 Interchange	TRANSFER FUNDS/CANCELED PROJECT: A total of \$500,000 is being transferred from this project to Key 19652 through this amendment. As a result this project, (Key 20450) is ca2,938,120nceled. Key 20450 currently does not have enough funds for illumination tower upgrades. ODOT has determined that lighting on the Marquam bridge is a higher priority, so funds are to being-allocated to Key 19652.					
Project #4 20475 MTIP ID 71003	ODOT	I-205 at OR43	TRANSFER FUNDING/CANCEL PROJECT This project is currently not funded for construction and it has been determined that lighting on the Marquam bridge is a higher priority, so funds are to be re-allocated. This amendment cancels the project.					
Project #5 ODOT Key 19652 MTIP 70833	ODOT	I-5: Marquam BR Electrical & Lighting System Replace	COMBINED/FUND TRANSFER: Through this amendment funding from above ODOT project Keys 18760,18761m 20450, and 20475 is transferred and combined into Key 19652 as stated above. The added funding supports lighting requirements for the I-5 Marquam Bridge					

Project #6 ODOT Key 18769 MTIP ID 70801	ODOT	OR99E:Rockfall - Oregon City Tunnel to Old Canemah Park	COST INCREASE: The amendment adds funding to the construction phase to address higher than expected construction phase bids.
Project #7 ODOT Key 20413 MTIP ID 70969	ODOT	US30BY (Lombard) Safety Extension US30BY (Lombard) North Fiske Ave to North Wilbur	COST INCREASE: During initial design of this project, funding shortfalls were identified primarily attributed to Americans with Disabilities Act (ADA) requirements and the number of signal upgrades identified within the project extent. Cost increase if \$2,147,896 = a 25.6% increase and is greater than the 20% threshold for Administrative Modifications.
Project #8 ODOT Key 20415 MTIP ID: 70971 NEW	ODOT Portland	US30BY (Lombard) at Fenwick	ADD NEW PROJECT/REACTIVATE IN 2018 MTIP: This amendment completes a funding transfer that actually began back last November to shift the funds to Key 20413 above. While the cost issues with Key 20413 were evaluated Key 20415 was suspended with the funding held in abeyance until the updated costs were determined for Key 20413. Upon agreement between ODOT and Portland, Portland will locally fund the \$1.2 million needed to complete Key 20415 as now shown above. The transfer of funding to 20413 is now complete and is part of this amendment bundle. Key 20415 is now a regionally significant locally funded project. Since the funds were previously removed, adding local funds back to the project reactivates the project in the 2018 MTIP.

Project #9			ADD NEW PROJECT:
ODOT Key			PE activities began in 2016 as part of the 2015-18 MTIP. The construction
19720		OR224 (Milwaukie Expressway): SE Rusk Rd - I	phase funding picture was not resolved at that time. The project was not
	ODOT	205 -	carried over into the 2018 MTIP, but remained an prior obligated project.
MTIP ID	0001	OR224 (Milwaukie Expressway): SE Pheasant	With the construction phase funding now available, the project is being
70845		Ct - I-205	brought forward to the 2018 active years as a fully funded project. The
			limits have been reduced and will now only proceed west from I-205 to
NEW			Pheasant Court.

NOTE:

The following two projects involve a scope reduction and adjustment to ODOT's Connected Cully project. As a result of removing 4 of 6 main scope elements from the project, Portland will complete them as a locally funded project which is being programmed in the MTIP in key 21340. The scope change occurs to Key 18814 which is the original Connected Cully project. Two new projects for Portland are being added through this amendment which represent the locally funded projects with the removed scope elements to the Connected Cully project. They are stated after Key 18814 below.

Project #10 ODOT Key 18814 MTIP ID 70771	Portland	Connected Cully	SCOPE CHANGE: The cost estimate for all project elements exceeds the available funding under the federal grant resulting in the removal of 4 of 6 approved location segments. Budget changes: ADA impacts impacting PE, the ROW estimate has been reduced and moves federal \$ off the ROW phase and onto PE & Construction to assist in delivery needs
Project #11 ODOT Key 21340 MTIP ID TBD NEW	Portland	Cully Neighborhood Bike & Pedestrian Connections (Portland)	ADD NEW PROJECT: Thos locally funded project by Portland represents the removed scope elements from Key 18814. The project will construct walking and biking improvements in the Cully neighborhood on three alignments 54th/56th, NE 60th, and NE 66th/67th

Project #12 ODOT Key 19723 MTIP ID 70840	Portland	HSIP 2016 Bike/Ped Improvements Portland	SCOPE CHANGE: The amendment adjusts the project name, scope and costs. Various locations are identified as part of the project for HSIP program safety upgrades. A review of the proposed locations and the priority of the available funding resulted in some locations being removed. Other locations require upgrades. The net result is the number of HSIP funded sites are reduced while the project cost increased. An additional \$318,186 has been committed to the project to complete the proposed safety upgrades.
Project #13 ODOT Key 17268 MTIP ID 70005	Portland	Red Electric Trail SW Bertha SW Vermont SEC Red Electric Trail: SW Berth Blvd - SW Capitol Highway	SCOPE CHANGE: Portland removed multiple original scope elements from the project and requested a scope change to keep the project within budget limits. The scope change required a new CMAQ air quality emission reduction analysis to be completed. AS a Transportation Control Measure, the scope change was reviewed as a eligible suitable substitute. The project now will construction an off-street bike trail between SW Bertha Blvd and SW Capitol Highway. The project is also required to relocate a water line as part of the new approved scope.

Projects 14-16 involve splitting off FY 2018 Metro Regional Transportation Options (RTO) and allocating them to SMART and TriMet to complete RTO activities. Note: This split is a regular RTO annual allocation to SMART and TriMet

Project #14 ODOT Key 19292 MTIP ID 70672	DDOT Key 19292 Metro Regional Travel Options Program (2018)		SPLIT FUNDING: Key 19292 represents Metro FY 2018 RFFA Step 1 STP allocation in support of RTO activities. This amendment splits \$583,932 of STP to TriMet and \$81,306 of STP to SMART for FY 2018 RTO activities				
Project #15 ODOT Key TBD MTIP ID TBD	SMART	SMART Regional Travel Options Program (FY 2018)	ADD NEW PROJECT: The formal amendment splits \$81,306 of STP from Key 19292 and commi it (with match) in support of SMART's FY 2018 RTO activities				
Project #16 ODOT Key TBD MTIP ID TBD	TriMet	TriMet Regional Travel Options Program (FY 2018)	ADD NEW PROJECT: The formal amendment splits \$502,626 of STP from Key 19292 and commits it (with match) in support of TriMet's FY 2018 RTO activities.				

Project #17			
ODOT Key			COST INCREASE/PHASE SLIP:
19749	Washington County	Beef Bend Road Culvert Replacement	Additional environmental mitigation requirements are impacting the project. The construction phase increases by \$556,000 and is being slipped
MTIP ID			to 2019 (with FHWA approval) through this amendment.
70848

		\$ 122,550	\$ 6,402,384	\$	10,524,934										

Notes:

- 1. Red Font = Funding reductions made to the project phase. Blue font = Additions made to the project as part of the amendment.
- 2. HSIP = Federal Highway Safety Improvement Program funds. Under code ZS30, the funds are 100% federal, no match required.
- 3. State STBG-FLX = Federal Surface Transportation Block Grant funds allocated to ODOT
- 4. ADVCON = Federal Advance Construction fund type code used as a federal placeholder until the final federal fund code is committed to the project'
- 5. NHPP = Federal National Highway Performance Program funds pre FAST Act. 6. NHPP-FAST = Federal National Highway Performance Program funds.
- 7. State = General state agency funds used to provide the minimum match requirement to the federal funds.

Amendment Summary: During initial design of this project, funding shortfalls were identified primarily attributed to Americans with Disabilities Act (ADA) requirements and the number of signal upgrades identified within the project extent. This amendment adds funding to address the shortfalls.

2018-2021 Metropolitan Transportation Improvement Program Chapter 5 Tables Amendment Action: Amend the MTIP to increase or adjust required funding and scope, or add new projects

Amendment Summary

This amendment completes a funding transfer that actually began back last November to shift the funds to Key 20413 above. While the cost issues with Key 20413 were evaluated, Key 20415 was suspended with the funding held in abeyance until the updated costs were determined for Key 20413. Upon agreement between ODOT and Portland, Portland will local fund the \$1.2 million needed to complete Key 20415 as now shown above. The transfer of funding to 20413 is now complete. Key 20415 is now a regionally significant locally funded project. Since the funds were previously removed, adding local funds back to the project re-activates the project in the 2018 MTIP.

Amendment Summary

The project began PE activities in 2016 as part of the 2015-18 MTIP. The construction phase funding picture was not resolved at that time. The project was not carried over into the 2018 MTIP, but remained an prior obligated project. With the construction phase funding now available, the project is being brought forward to the 2018 active years as a fully funded project. The limits have been reduced and will now only proceed west from I-205 to Pheasant Court.

	5. Local = General	local funds pro	ovided by the lea	nd agency in suppor	t of t	he required	match to the federa	l funds.				

The amendment changes the project scope by removing 4 of 6 elements due to budget constraint issues. The phases are adjusted for needed budget adjustments. PE and construction increase with ROW decreasing. Federal funds are removed from the ROW phase which now will be locally funded. Budget cost issues emerged from ADA compliance requirements.

Amendment Summary

Key 18814, Connected Cully is being amended with a major scope change as part of the June 2018 Formal MTIP Amendment which includes the removal of 4 of 6 main scope elements due to budget constraints. Portland has agreed to locally fund the removed scope elements as a separate project. This is the first locally funded project of two related to Connected Cully. (The second project is the new Metro 2019-21 RFFA awarded Connected Cully project)

2018-2021 Metropolitan Transportation Improvement Program Chapter 5 Tables Amendment Action: Amend the MTIP to increase or adjust required funding and scope, or add new projects

				PROJECT #12 E	XIST	ING MTIP P	ROGRAMMING

	3. Local = General	l local funds pro	ovided by the lea	nd agency in suppor	t of t	he required i	match to the feder	al funds.				

Amendment Summary

Changes made to the project are shown on the next page.

				PROJECT #12 P	ROP	OSED AMEI	NDED CHANGE	S			
ODOT Key	MTIP ID	Lead Agency			F	Project Nan	ne		Project Type		Project Cost
19723	70840	Portland				•	vements Port Id Bikeped	and	Local Road	\$	1,782,126
	Project	Description:		t various location fuge island, curb e		-	-	provements including pon	pavement markings	and	signs,
				Amended MTII	P Fur	d Program	ming by Phase				
Fund Code	Fund Code	Туре	Year	Planning		eliminary gineering	Right of Wav	Other (Utility Relocation)	Construction		Total
HSIP	MS3E	Federal	2016		\$	432,689				\$	432,689
Local	Match	Local	2016		\$	36,503				\$	36,503
Other	Overmatch	Local	2016		\$	97,153				\$	97,153
HSIP	MS30	Federal	2018						\$ 852,411	\$	852,411
Local	Match	Local	2018						\$ 71,912	\$	71,912
Other	Overmatch	Local	2018						\$ 291,458	\$	291,458
										\$	-
			Total:	\$ -	\$	566,345	\$	- \$ -	\$ 1,215,781	\$	1,782,126
Notes:	1. Red Font = Fund	ding reductions	made to the pr	oject phase. Blue fo	ont =	Additions ma	ide to the projec	t as part of the amendme	ent.		
	2. HSIP = Federal H	Highway Safety	Improvement P	rogram funding allo	ocate	d to ODOT fo	or roadway relate	ed safety improvements.			
	3. Other = Local of funds in place of a		•	ead agency in suppo	rt of	ohase scope	elements. Norm	ally not considered match	ning funds, but overn	natch	or simply local
	4. Local = General	local funds pro	ovided by the lea	ad agency in suppor	t of t	ne required i	match to the fed	eral funds.			

The amendment adjusts the project name, scope and costs. Various locations are identified as part of the project for HSIP program safety upgrades. A review of the proposed locations and the priority of the available funding resulted in some locations being removed. Other locations require upgrades. The net result is the number of HSIP funded sites are reduced while the project cost increased and required an additional \$318,186 to be committed to it to complete the proposed safety upgrades.

									\$ -
			Totals:	\$ -	\$ 910,914	\$ -	\$ 130,000	\$ 3,095,378	\$ 4,136,292

Notes:

- 1. Red Font = Funding reductions made to the project phase. Blue font = Additions made to the project as part of the amendment.
- 2. CMAQ = Federal Congestion Mitigation Air Quality improvement funds. CMAQ funds are allocated annually to Metro and are for projects that provide air quality benefits.
- 3. STP>200K = Federal Surface Transportation Program funds allocated to regions where the population is greater than 200,000
- 4. Other = Additional local funds the lead agency commits to the project phase above the required match to the federal funds.
- 5. Local = General local funds provided by the lead agency in support of the required match to the federal funds.

Amendment Summary

The amendment represent a significant scope change to the project. The Red Electric trail project will now construct an off-street trail between SE Bertha and SW Capitol, The scope will include a water line relocation that is now required to be included in the project. Because the scope change was significant, a new air quality emission reduction analysis was required for the project to keep its CMAQ funds eligible on the project.

	3. Local = General	l local funds pro	ovided by the lea	ıd agency in suppor	rt of the required	match to the federa	l funds.					

Amendment Summary

Through this amendment SMART will receive their FY 2018 RTO allocation to complete activities and strategies to help diversify trip choices, reduce pollution and improve mobility. RTO includes all of the alternatives to driving alone, such as carpooling, vanpooling, riding transit, bicycling, walking and telecommuting. The STP funding is split off of Key 19292 also part of this amendment bundle. The funding will be flex transferred to FTA and converted into FTA Section 5307 funds enabling SMART to expend them.

Notes:	Notes: 1. Red Font = Funding reductions made to the project phase. Blue font = Additions made to the project as part of the amendment.												
	2. EM-REL = Federal Emergency Relief funds allocated to ODOT for emergency road repair needs. Funds are allocated to specific projects if they meet the federal requirements												
	3. Local = Genera	Local = General local funds provided by the lead agency in support of the required match to the federal funds.											

Additional environmental mitigation requirements are impacting the project. The construction phase increases by \$556,000 as a result to address the new requirements, and is being slipped to 2019 (with FHWA approval) through this amendment.

Memo

Date: June 14, 2018

To: Metro Council and Interested Parties

From: Ken Lobeck, Funding Programs Lead, 503-797-1785

Subject: June 2018 MTIP Formal Amendment plus Approval Request of Resolution 18-4897

STAFF REPORT

FOR THE PURPOSE OF ADDING OR AMENDING EXISTING PROJECTS TO THE 2018-21 METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM (MTIP) INVOLVING SIXTEEN PROJECTS IMPACTING METRO, ODOT, PORTLAND, SMART, TRIMET, AND WASHINGTON COUNTY (JN18-11-JUN)

BACKROUND

What this is:

The June 2018 Formal Metropolitan Transportation Improvement Program (MTIP) Amendment bundle contains required changes to sixteen projects. The changes are required in order for the federal funding to be obligated before the end of the 2018 federal fiscal year. The sixteen projects included in the June 2018 bundle are summarized in the below table:

		May 2018 Formal MTIP Amendment Amendment Type: Formal Name: JN18-11-JUN									
	Number of Projects: 16										
ODOT Key MTIP ID	Lead Agency	Project Name & Description	Required Changes								
Project #1 ODOT Key	ODOT	I-5: N Denver Ave NB tunnel illumination On I-5 at MP 306.85 to 306.87, Upgrade the illumination system by replacing the electrical system including the replacement of the existing obsolete fixtures to current standard.	TRANSFER FUNDING: Construction phase funding of \$246,000 is being removed from the project. Prior obligated \$75k is left in the PE phase. The \$246k of funding will be transferred to the I-5 Marquam Bridge Lighting Project in Key 19652.								
Project #2 ODOT Key 18761 MTIP ID 70760	ODOT	OR217: SW Allen Blvd & Denny Rd Interchanges On OR217 at MP 2.26 to 2.60 and 2.79 to 3.23, Illumination upgrades	TRANSFER FUNDING: A total of \$180k from this project is being transferred to Key 19652 to fully fund that project. Only \$24k of obligated PE phase funding was determined required to remain with the project. The remaining \$24,000 and \$157,000 from the construction phase is being transferred to Key 19652. The project is left programmed with only PE funds at \$24,000.								
Project #3 ODOT Key 20450 MTIP ID 70995	ODOT	I-5 at I-205 Interchange On I-5 at MP 288.40 to 288,9, Upgrade illumination towers up to amount of available budget and coordinate work with pavement preservation project in area.	TRANSFER FUNDS/CANCELED PROJECT: A total of \$500,000 is being transferred from this project to Key 19652 through this amendment. As a result this project, (Key 201450) is canceled.								

Project #4			TRANSFER FUNDING/CANCEL
ODOT Key 20475		I-205 at OR43	PROJECT This project is currently not funded for construction and it has been determined
MTIP ID 71003	ODOT	On I-205 at MP 8.70 to 8.90 and On OR43 at MP 11.20 to 11.40, Design for full illumination rebuild.	that lighting on the Marquam bridge is a higher priority, so funds are to be re- allocated. This amendment cancels the project.
Project #5 ODOT Key 19652 MTIP ID 70833	ODOT	I-5: Marquam BR Electrical & Lighting System Replace On I-5 at MP 300.28 to 300.48, Replace electrical & lighting system; bridge #08328	COMBINED/FUND TRANSFER: Through this amendment funding from above ODOT project Keys 18760 ,18761, 20450, and 20475 is transferred and combined into Key 19652 as stated above. The added funding supports lighting requirements for the I-5 Marquam Bridge
Project #6 ODOT Key 18769 MTIP ID 70801	ODOT	OR99E:Rockfall - Oregon City Tunnel to Old Canemah Park On OR99E at MP 12.62 to 12.87, 13.15 to 13.36, and 13.82 to 14.06, Inspect and repair mesh. Scale slope behind mesh removing loose rock and vegetation. Rock bolting as needed and clear catchment area / roadside ditch	COST INCREASE: The amendment adds funding to the construction phase to address higher than expected construction phase bids.
Project #7 ODOT Key 20413 MTIP ID 70969	ODOT	US30BY (Lombard) Safety Extension US30BY (Lombard) North Fiske Ave to North Wilbur On US30BY at MP 3.32 to 4.59, Road reconfiguration between MP 3.50 and N Wilbur. Signal upgrades at Fiske, Woolsey, Chautauqua, Wabash, Peninsular, and Greeley. Remove half signal at Drummond. Install Rectangular Rapid Flashing Beacon (RRFB) with pedestrian island near Drummond. ADA improvements and access management as needed.	COST INCREASE: During initial design of this project, funding shortfalls were identified primarily attributed to Americans with Disabilities Act (ADA) requirements and the number of signal upgrades identified within the project extent. Cost increase if \$2,147,896 = a 25.6% increase and is greater than the 20% threshold for Administrative Modifications.
Project #8 ODOT 20415 MTIP ID 70971 NEW	ODOT Portland	US30BY (Lombard) at Fenwick On US30BY in northeast Portland at MP 5.00 to 5.02, Full signal upgrade, ADA improvements, and access management.	ADD NEW PROJECT/REACTIVATE IN 2018 MTIP: This amendment completes a funding transfer that actually began back last November to shift the funds to Key 20413 above. While the cost issues with Key 20413 were evaluated Key 20415 was suspended with the funding held in abeyance until the updated costs were determined for Key 20413. Upon agreement between ODOT and Portland, Portland will locally fund the \$1.2 million needed to complete Key 20415 as now shown above. The transfer of funding to 20413 is now complete and is part of this amendment bundle. Key 20415 is now a regionally significant locally funded project. Since the funds were previously removed, adding local funds back to the project reactivates the project in the 2018 MTIP.
ODO1- No.,		OR224 (Milwaukie Expressway): SE Rusk Rd 1-205	PE activities began in 2016 part of the 2015-18 MTIP. The construction phase funding course was not resolved at that

		NOTE	Court.

NOTE
Key 19720 has been removed as part of the June 2018 Formal MTIP Amendment per ODOT's request

			SCOPE CHANGE:
Project #9 ODOT Key 18814 MTIP ID 70771	Portland	Connected Cully Construct sidewalks and bike connections in the Cully Neighborhood	The cost estimate for all project elements exceeds the available funding under the federal grant resulting in the removal of 4 of 6 approved location segments. Budget changes: ADA impacts impacting PE, the ROW estimate has been reduced and moves federal \$ off the ROW phase and onto PE & Construction to assist in delivery needs
Project #10 ODOT Key 21340 MTIP ID TBD NEW	Portland	Cully Neighborhood Bike & Pedestrian Connections (Portland) Construct sidewalks and bike connections in the Cully Neighborhood	ADD NEW PROJECT: This locally funded project by Portland represents the removed scope elements from Key 18814. The project will construct walking and biking improvements in the Cully neighborhood on three alignments 54th/56th, NE 60th, and NE 66th/67th
Project #11 ODOT Key 19723 MTIP ID 70840	Portland	HSIP 2016 Bike/Ped Improvements Portland Pavement markings and signs. Pedestrian refuge island, curb extensions and rapid flash beacon.	SCOPE CHANGE: The amendment adjusts the project name, scope and costs. Various locations are identified as part of the project for HSIP program safety upgrades. A review of the proposed locations and the priority of the available funding resulted in some locations being removed. Other locations require upgrades. The net result is the number of HSIP funded sites are reduced while the project cost increased. An additional \$318,186 has been committed to the project to complete the proposed safety upgrades.
Project #12 ODOT Key 17268 MTIP ID 70005	Portland	Red Electric Trail: SW Bertha SW Verment SEC Red Electric Trail: SW Berth Blvd - SW Capitol Highway Provide east west route for pedestrians and cyclists in SW Portland with an off street trail, an on-street bike boulevard with sidewalks, and potentially a widened off street sidewalk around SW Bertha Blvd. Provide east-west route for pedestrians and cyclists in SW Portland with an off-street trail and relocate water line as part of project scope.	Portland removed multiple original scope elements from the project and requested a scope change to keep the project within budget limits. The scope change required a new CMAQ air quality emission reduction analysis to be completed. AS a Transportation Control Measure, the scope change was reviewed as a eligible suitable substitute. The project now will construction an off-street bike trail between SW Bertha Blvd and SW Capitol Highway. The project is also required to relocate a water line as part of the new approved scope.
Project #13 ODOT Key 19292 MTIP ID 70672	Metro	Regional Travel Options Program (2018) Region-wide. The Regional Travel Options (RTO) program implements strategies to help diversify trip choices, reduce pollution and improve mobility.	SPLIT FUNDING: Key 19292 represents Metro FY 2018 RFFA Step 1 STP allocation in support of RTO activities. This amendment splits \$583,932 of STP to TriMet and \$81,306 of STP to SMART for FY 2018 RTO activities
Project #14 ODOT Key TBD NEW MTIP ID TBD NEW	SMART	SMART Regional Travel Options Program (FY 2018) The FY 2018 RTO allocation to SMART from Key 19292 will implements strategies to help diversify trip choices, reduce pollution and improve mobility.	ADD NEW PROJECT: The formal amendment splits \$81,306 of STP from Key 19292 and commits it (with match) in support of SMART's FY 2018 RTO activities
Project #15 ODOT Key TBD NEW MTIP ID TBD NEW	TriMet	TriMet Regional Travel Options Program (FY 2018) The FY 2018 RTO allocation to TrIMet from Key 19292 will implements strategies to help diversify trip choices, reduce pollution and improve mobility.	ADD NEW PROJECT: The formal amendment splits \$502,626 of STP from Key 19292 and commits it (with match) in support of TriMet's FY 2018 RTO activities.

What is the requested action?

Staff is requesting JPACT approval recommendation to the Metro Council for resolution 18-4897 and then on to the Metro Council enabling the seventeen sixteen identified projects to be amended correctly into the 2018 MTIP, with final approval to occur from USDOT. As part of the approval recommendation, Key 19720 is being removed from the amendment bundle.

New Post TPAC Approval Recommendation Follow-On Details:

On June 13, 2018, Metro received a formal comment and request to pull project Key #19720, OR224 (Milwaukie Expressway): SE Pheasant Ct - I-205. ODOT is making the request based on the expectation that the construction phase funding request will not proceed to Oregon Transportation Commission (OTC) during their June meeting. OTC approval is required to authorize the commitment of funds for the construction phase. The construction phase funding request will proceed at a later date.

A key part of a formal MTIP amendment requires a demonstration of fiscal constraint as part of the amendment. In other words, as a result of the fiscal changes made in the amendment, proof that the MTIP is still fiscally constrained must be shown as part of the amendment review and approval process. OTC approval for any project provides the proof of funding verification for the project in question. If an ODOT project requires OTC approval and this does not occur, then the funding verification can't occur and fiscal constraint can't be demonstrated. Therefore, since Key 19720 will not proceed to OTC for final approval at their June 2018 meeting, Key 19720 must be removed from the June 2018 Formal MTIP Amendment. This reduces the total number of projects in the amendment bundle from 17 to 16.

Background: June 2018 Formal Amendment.

Federal transportation improvement funds are allocated to the states annually and usually include required obligation targets. They also arrive with shelf-life expiration timing. The annual obligation targets are determined by USDOT. They set the minimum obligation numbers the states and MPOs must reach each year. While USDOT establishes the obligation targets for each federal funding program, a general unwritten rule exists as a frame of reference. The basic obligation rule states that the DOT and MPOs need to annually obligate at least 80% of their allocated federal funds they programmed for that year. If the DOT and MPOs are obligating at least 80% of their annual federal allocations, then generally, the DOT and MPOs are programming and expending their federal allocations and appropriations sufficiently in a timely fashion. Note: There are exceptions to the 80% rule depending on the funding program and whether it originates from FHWA or FTA.

A key purpose of the MTIP and STIP is that it provides a four-year picture of where the region has committed its federal funding, who will be implementing the projects, and when the region will be obligating plus expending the federal funds. USDOT considers the MTIP a legal promise by the region to obligate and expend its allocated federal funds. Based on the annual programming, USDOT ensures the federal funds will be available at the time obligation.

Those who have received and implemented federally funded transportation projects clearly understand the complexities and difficulties in obligating their federal transportation funds, implementing the project, expending the federal funds, and seeking reimbursement all in a timely fashion. Much of the federal transportation delivery process is based on legal requirements to ensure the federal funds are used correctly. Unfortunately from pre-design through NEPA, final design, right-of- way acquisition, utility relocation, construction bid advertising to finally reaching construction implementation, enough hurdles, challenges, and unforeseen problems may exist that can easily derail a project's scope, funding, and schedule for delivery.

FROM: KEN LOBECK

Each year beginning around March, project assessments begin on the actual probability of a project phase's obligation by the end of the federal fiscal year. By June, decisions need to occur whether or not the current year federal programming amounts can be obligated by the end of the federal fiscal year, or should be slipped to the next federal fiscal year. Decisions need to occur to shift funding around projects to help fund leverage allocated funding and still meet obligation targets. Decisions have to occur to delay projects and reassess project schedules. Finally, decisions need to occur that decide the fate of cannibalizing the funding from one project to salvage another project. By far the state DOT has the most difficult task in making these decisions since the DOT has the greatest number of projects. Since the DOT and MPOs have annual obligation targets that must met in order not lose or receive future federal allocations, all usually are pretty motivated to see the current year phase programming obligated by the end of the federal fiscal year.

The monthly June formal amendment provides the Metro region the last guaranteed amendment where changes can be accomplished in time to still obligate the project's federally funded phase before the end of the federal fiscal year. The June formal amendment usually is large and complicated and results in numerous compromises, or painful decisions to help ensure the agency will meet their annual obligation targets.

A detailed summary of the seventeen projects being amended is provided in the below tables:

Projects #1-5				
Keys:				
18760	I-5: N Denver Ave NB Tu			
18761		& Denny Rd Interchanges		
20450	I-5 at I-205 Interchange	•		
20475	I-205 at OR43			
19652	I-5: Marquam BR Electr	ical & Lighting System Replace		
Lead Agency:	ODOT			
ODOT Key Numbers:	18760, 18761, 20450, 20475, and 19652 MTIP ID Numbers: 70759, 70760, 70995, 71003, & 70833			
Project Description:	The projects involve planned lighting/illumination improvements.			
What is changing?	 ODOT's review of the projects determined the I-5 Marquam Bridge Electrical & Lighting Systems Replacement project (key 19652) was short-funded, but the highest priority to complete. As a result of the review, project funding from the other projects is being transferred to the I-5 Marquam Bridge project as follows: Key 18760 I-5 N Denver Ave NB Tunnel Illumination: Moves \$246,000 to Key 19652 (I-5 Marquam). Key 18760 is left with only prior obligated PE funding of \$75,000. Key 18761 OR217 SW Allen Blvd & Denny Blvd Rd Interchanges: Moves a total of \$180,000 to Key 19652. \$24,000 of prior obligated PE funding remains with the 			

project.

- Key 20450 I-5 at I-205 Interchange: A total of \$500,000 is transferred to Key 19652. This represents the entire funding for Key 20450. As a result of the transfer, Key 20450 is canceled in the MTIP and STIP
- Key 20475 I-205 at OR 43: Moves the entire project funding of \$143,043 to Key 19652. As a result Key 20475 is canceled from the MTIP and STIP
- Key 19652 I-5 Marquam Bridge Electrical and Lighting System Replacement: As a results of the fund transfers, the project funding increases from \$1,848,076 to \$2.938.120.

From the OTC Staff Report:

Interstate 5: Marquam Bridge electric and lighting system replace – This project was originally added to the 2015-2018 Statewide Transportation Improvement Program (STIP) and funded by the Statewide Fix-It Bridge program. The purpose of the project is to replace the lighting and electrical systems on the upper deck of the Marquam Bridge.

Scoping efforts a few years ago revealed that existing conduit on both decks is starting erode and fail due to the natural oscillation that occurs on the structure. Over time, maintenance fixes have made the existing electrical system inaccessible for repairs and upgrade. When this project was originally funded, the intent was to prioritize the top deck and upgrade the bottom deck as funding allows.

If this request for added funds is approved, the added budget will allow for upgrading all conduit systems on the bridge and will upgrade lighting fixtures and bulbs to light emitting diode (LED) technology that will allow for easier maintenance and energy cost savings.

If the request to add funds to this project is not approved, the top deck conduit will be replaced and lighting upgraded as originally planned.

Additional Details:

Oregon Highway 217: Southwest Allen boulevard and Southwest Denny interchanges – This project was originally included in the 2015-2018 STIP as an operations project in the Fix-It program. The purpose is to upgrade electrical systems and illumination at interchanges of Oregon Highway 217 at Allen boulevard and Denney road. Since the initial programming of this project, funding has been identified for widening work on both the northbound and southbound sections of Oregon Highway 217. In addition, initial design determined that funds are likely not adequate for the upgrades originally scoped. Program managers have decided that cancelling this project and reallocating to the Marquam Bridge illumination project is a higher priority for these funds since design and construction of Oregon Highway 217 upgrades are likely to change the illumination needs at the Allen and Denny interchanges anyway. This project will be cancelled and remaining funds will be reallocated to the Marquam Bridge lighting project.

Interstate 5: North Denver avenue northbound tunnel illumination- This project was originally included in the 2015-2018 STIP as an operations project in the Fix-It program. The purpose of the project is to replace the existing fixtures and conduit to improve lighting in the tunnel and make maintenance of the luminaires safer and cheaper for maintenance. During initial design, it was determined that the budget for construction is insufficient to bring the tunnel lighting to current standards and implement the latest technology. The program managers have decided to cancel this project now and pursue funding in a future STIP cycle for more advance lighting technology that will meet standards, have lower energy consumption, and be much safer and easier for maintenance crews to maintain. Since the Marquam Bridge lighting updates are a higher priority and need, the remaining funds in this project will be re-allocated there.

	Interstate 5 at Interstate 205 Interchange and Interstate 205 at Oregon Highway 43 Illumination – Both of these projects were scoped, developed, and programmed as operations improvements in the Fix-It program for the 2018-2021 STIP. Concurrent with the transition to the 2018-2021 STIP, ODOT has been developing and implementing major projects on the Interstate 5 and Interstate 205 corridors that require intricate coordination with other projects in the area to avoid adverse impacts to the traveling public. Closer review of the two illumination projects determined that funds are not sufficient for a standalone project and that the specifications for these particular illumination upgrades my change due to the nature of the bigger interstate improvement projects. Program managers have decided that a better use of the funds would be to address the illumination upgrades needed on the Marquam Bridge project since it is still undetermined how the interstate improvements will influence the original intent of these two projects. Both projects are to be cancelled and funds transferred to the Interstate 5: Marquam Bridge electric and lighting system replace project.
Why a Formal	The net cost change to Key 19652 is \$1,090,044 which represents a 58.9% cost
amendment is	increase to the project which is above the 20% threshold for administrative
required?	modifications.
Total Programmed	The total project programming in key 19652 increases from \$1,848,076 to

Added Notes:	OTC approval was required and occurred during their May 2018 meeting

Project #6: OR99E:Rockfall - Oregon City Tunnel to Old Canemah Park				
Lead Agency:	ODOT			
ODOT Key Number:	18769 MTIP ID Number: 70801			
Project Description:	On OR99E near Oregon City, inspect and repair mesh. Scale slope behind mesh removing loose rock and vegetation. Rock bolting as needed and clear catchment area / roadside ditch			
What is changing?	Due to higher than anticipated construction phase bids, both the PE and construction phases are short-funded and need additional funding. In April 2018, Metro complete an administrative modification to the project to increase the construction phase funding to \$1,733,001. Although Metro completed the adjustment administratively, ODOT determined an additional cost increase was needed to the construction phase and held off increasing the construction phase until an accurate total was known For ODOT, the project cost increases from 1,889,000 to \$2,289,000 = a \$400,000 increase and is above the 20% threshold at 21%. At ODOT's request, the cost increase has proceeded as a formal amendment to the MTIP.			
Additional Details:	Per the Change Management Request (CMR) The bid for 99E Rockfall Project came in 32% over the engineer's estimate. PE also has a cost overrun, The deficit totals \$400,000. The reasons for the increase include: 1. The rockfall specific elements for the project came in \$217,000 over the engineer's estimate 2. Traffic Protection & Direction of Traffic (TP & DT) are a combined \$90,000 over the estimate. 3. Paving al came in substantially high likely due to the relatively small volume of work			
Why a Formal	Because the earlier administrative amendment to increase construction was not			
amendment is				
required?	the pre-admin mod cost for the construction phase.			
Total Programmed Amount:	I DE TOTAL DEGLET DEGLETAMMING AMOUNT INCEPASES TO \$7.788 990			
Added Notes:

what is changings project to be completed and locally funded by the city of Portland. The additional funding will address ADA design and construction requirements. From the OTC Staff Report: The original purpose of the U.S. Route 30 (Lombard) Safety Extension project is to improve safety for all modes on North Lombard Street in north Portland by using a mixture of treatments and funding opportunities. During initial design of the U.S. Route 30 (Lombard) Safety Extension project, funding shortfalls were identified primarily attributed to Americans with Disabilities Act (ADA) requirements and the number of signal upgrades identified within the project extent. Cost increases are due to the need to design and construct this significant safety improvement project as originally programmed. This includes hiring a consultant firm to complete the design, provide bid assistance, and provide construction-engineering services for the project. The current scope of the project proposes to rebuild seven traffic signals on North Lombard between North Fiske Avenue and North Wilbur Avenue. This includes an estimated 122 curb ramps that need to meet current ADA standards. The programmed budget for the U.S. Route 30 (Lombard) Safety Extension project is short an estimated \$1.2 million dollars which would require the project team to remove scope that amounts to the equivalent of one traffic signal rebuild. Since this is an important safety project in the region, DDOT has been exploring options to address cost increases. We have asked for and received a \$930,000 allocation from our ADA program funds and through negotiations with the City of Portland, we have freed up federal and state funds allocated to the U.S. Route 30 (Lombard) at Fenwick project. The summary of cost and name changes is as follows: • Oregon Department of Transportation (ODOT) will provide \$930,000 from ADA Program funds. • The U.S. Route 30 (Lombard) at Fenwick project will be completed by the City of Portland with all local funds. (See Key 201415 - this a

Project #8:	US30BY (Lombard) at F	enwick		
Lead Agency:	Portland			
ODOT Key Number:	20415	MTIP ID Number:	70971	
Project Description:	Full signal upgrade; ADA im	provements; and access managemen	t.	
What is changing?	The amendment adds a new locally funded project to the 2018 MTIP: The U.S. Route 30 (Lombard) at Fenwick project will be completed by the City of Portland with all local funds. The project is now separated from the US30BY (Lombard) North Fiske Ave to North Wilbur and is being to the 2018 MTIP and STIP as a stand-alone project.			
Additional Details:	The original purpose of the U.S. Route 30 (Lombard) at Fenwick project is to do a full signal upgrade, required ADA improvements, and implement access management at the intersection of Lombard and Fenwick. Negotiations with the City of Portland resulted in an alternative fund source and delivery method for the U.S. Route 30 (Lombard) at Fenwick project. Design and construction of the same project scope can now be accomplished by the City of Portland using their Transportation System Development Charge (TSDC) funds allowing for reallocation of federal and state ODOT Fix-It funds to be used on the Lombard Safety extension project.			
Why a Formal amendment is required?	New projects added to the MTIP or STIP require a full/formal amendment per the

governments and considered how to best allocate the remaining funds to priority elements of the larger sunrise project. The remaining ITA funds were programme as follows: Finalizing purchase of right-of-way from willing sellers to protect th Sunrise Corridor for future extensions. Oregon Route 224 (Milwaukie Expressway): Southeast Rusk rout to Interstate 205 project and the Interstate 205 Sunnybrook Exit Auxiliary lane projects were funded as design (shelf-ready) project to ad ress operations and capacity improvements needed on Interstate 205 and Highway 224 in the Sunrise corridor. March, 2018: The Oregon Transportation Commission (OTC) approved \$6 million in JTA to fund construction of the Interstate 205 Sunnybrook Exit Auxiliary lane project. ril 2018: OTC approved re-allocation of fost of the remaining Sunrise Cor idor ITA budget (\$15.4 million) to it crease design on the Interstate 205: Staffo, L Road to Oregon Route 99 East project. The Oregon Route 234 (Milwaukie Expressway): Southeast Rusk road to Interstate 205 project continues lesign while OD. T evaluated resources for funding construction. ODOT has now identified researces to fund a modified version of the Oregon Route 224 (Milwaukie Expressway). St. theast Rusk road to Interstate 205 project working with Region 2 and Statewise program managers. The revised proposal shortens the project by providing the third westboard lane through Johnson Road (by Lowes), then transitions back to two lanes befor Pheasant Court. The below summary provides a definition of the revised project. New to affic signal installations at Or you Highway 213 ramp terminal and Iohy on Road.

- Localitation of Intelligent Transportation vstems (ITS) interconnect between signals;
- Installation of signage, crosswalks, and curb rang upgrades;
- Installation of new guardrail;
- Necessary geotechnical, water quality, contaminated soils and retaining wall work; and,
- Pavement resurfacing.

Why a Fermal amend nent is equired?

Total rogrammed Amount:

New projects added to the MTIP or STIP require a full/formal amendment per the FHWA/FTA MTIP/STIP Amendment Matrix

The total project programmed amount is \$12,000,000.

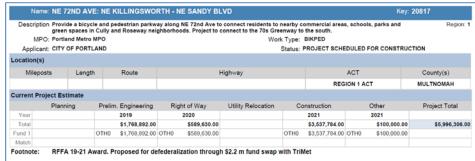

Added Notes:

Approval from the Oregon Transportation Commission (OTC) is required for this project OTC approval is scheduled for their June 2018 Meeting.

Projects #9 & 10:	Connected Cully +	es and Dadastrian Connections (Doubland)	
Lead Agency:	Portland	e and Pedestrian Connections (I	Portianaj	
ODOT Key Number:	18814 + 21340	MTIP ID Number:	70771 + TBD	
Project Description:	Construct sidewalks and bik	te connections in the Cully Neighborho	ood	
What is changing?	budget constraint issues. Th and construction increase w ROW phase which now will compliance requirements.	Construct sidewalks and bike connections in the Cully Neighborhood The amendment changes the project scope by removing 4 of 6 elements due to budget constraint issues. The phases are adjusted for needed budget adjustments. PE and construction increase with ROW decreasing. Federal funds are removed from the ROW phase which now will be locally funded. Budget cost issues emerged from ADA compliance requirements. Per agreement with ODOT, Portland will complete the remaining scope elements		

removed from 18814 as two separate projects. Key 21340 is the first of two locally funded project for Cully and Portland. The second is Metro's 2019-21 RFFA awarded project already programmed in Key 20817 as shown below.

FROM: KEN LOBECK

From the OTC Staff Report:

The Connected Cully Project was created to provide pedestrian and bicycle connections in the Cully Neighborhood of NE Portland.

The Cully neighborhood was incorporated into the City of Portland in 1985 with substandard infrastructure. Today, only 34% of the streets in Cully have sidewalks and the neighborhood has the second highest number of miles of unpaved streets in Portland. The lack of a dense grid further requires out-of-direction travel that deters walking and biking.

To address these deficiencies, the Connected Cully federal grant project proposed pedestrian and bike improvements on several streets to increase connectivity and access for people who walk, drive, bicycle or use a mobility device. This included sidewalk infill on NE Killingsworth Street, NE Prescott Street and NE $72^{\rm nd}$ Avenue, a pedestrian path on NE $60^{\rm th}$ Avenue, and establishment of two north-south Neighborhood Greenways. The project was scoped and received funding under the 2016-18 STIP.

Additional Details:

When PBOT began working on the project in 2016, project staff quickly realized that the programming amount for each phase was incorrect. In order to justify an amendment to the programming amounts, PBOT was required to provide updated cost estimates for each element of the federal project.

The estimating exercise revealed a significant funding shortfall for the overall project. PBOT worked with ODOT Region 1 staff to amend the project scope to more closely match the available funding under the federal grant. PBOT, still committed to constructing the scope elements removed from the federal project, has secured funding to deliver the rest of the project using local funds that become available starting FFY 2019. This locally funded project will be programmed into the STIP so that the public can be assured that all elements originally scoped under KN18814 will be delivered by the City of Portland.

Why a Formal amendment is required?

New projects added to the MTIP or STIP require a full/formal amendment per the FHWA/FTA MTIP/STIP Amendment Matrix

Total Programmed Amount:

The total programmed amount for Key 18814 increases from \$3,337,372 to \$3,917,499. The total programming for Portland's new locally funded project to address the removed scope elements is \$1,972,761

OTC approval is required and scheduled for their June 2018 meeting

Added Notes:

Droject #11.	HSIP 2016 Bike/Ped Impi	ovements Portland			
Project #11:	HSIP City of Portland Bi	keped			
Lead Agency:	Portland	Many No. No.			
ODOT Key Number:	19723	MTIP ID Number:	70840		
Project Description:	In Portland at various locations complete bike/ped safety improvements including pavement markings and signs, Pedestrian refuge island, curb extensions and rapid flash beacon.				
What is changing?	The amendment adjusts the project name, scope and costs. Various locations are identified as part of the project for HSIP program safety upgrades. A review of the proposed locations and the priority of the available funding resulted in some locations being removed. Other locations require upgrades. The net result is the number of HSIP funded sites are reduced while the project cost increased and required an additional \$318,186 to be committed to it to complete the proposed safety upgrades.

Project #12:	Red Electric Trail SW Bertha - SW Vermont SEC				
rioject #12.	Red Electric Trail: SW Berth Blvd - SW Capitol Highway				
Lead Agency:	Portland	Portland			
ODOT Key Number:	17268 MTIP ID Number: 70005				
	Provide east-west route for pedestrians and cyclists in SW Portland with an off-street				
	trail, an on-street bike boulevard with sidewalks, and potentially a widened off-street				
Project Description:	sidewalk around SW Bertha Blvd.				
	Provide east-west route for pedestrians and cyclists in SW Portland with an off-				
	street trail and relocate water line as part of project scope.				

DATE: JUNE 14, 2018

The amendment completes a required scope change to enable the project to move forward for construction. Due to revised project cost and a requirement to relocate a water line, Portland identified that two of three original awarded scope elements would need to be removed to keep the project within budgetary limits.

FROM: KEN LOBECK

Because a significant portion of the project was funded with CMAQ and that the project was identified as a Transportation Control measure, changing the scope became a complicated process. First, a revised scope option had to be identified that would satisfy the project's TCM status as a suitable substitute. Second, a new air quality emission reduction analysis would need to be completed that validated that revised project scope would equal or better air quality benefits. Metro, working with the State CMAQ manager and DEQ completed both requirements. Metro, the State CMAQ manager, and DEQ determined the revised project scope met the criteria as a TCM suitable substitute. The new air quality emission reduction analysis was also determined to be satisfactory.

What is changing?

The revised scope now provides a simplified off-street bike/ped trail between Bertha Blvd and Capitol Hwy running parallel to Beaverton Hillsdale Hwy as shown below.

Additional Details:

During PE, an additional scope element emerged which requires the relocation of a Portland Water Bureau water line. The water line relocation was mandated at the 60% design stage due to seven feet of fill of proposed for placement in that area and the cast iron pipe is highly likely to experience a brittle fracture due to the construction vibration compaction, and differential loading.

Why a Formal amendment is required?

Projects that require a major scope change STIP need a full/formal amendment per the FHWA/FTA MTIP/STIP Amendment Matrix

Total Programmed
Amount:
Added Notes:

The total programmed amount for the project increases from \$4,006,292 to \$4,136,292

ODOT Key Number:	19749	MTIP ID Number: 70971		
Project Description:	In Washington County on Beef Bend Road, culvert and embankment replacement			
What is changing?	Additional environmental mitigation requirements are impacting the project. The construction phase increases by \$556,000 as a result to address the new requirements, and is being slipped to 2019 (with FHWA approval) through this amendment.			
Additional Details:	As this project progressed it became clear that environmental regulation requirements were going to require this project to install major mitigation components. The additional mitigation required by Clean Water Services included vegetated swales, a LIDA swale, and a vegetated filter strip. The addition of these components impacts the CN budget and adds new R/W acquisitions to the project, which in turn triggered new funding requests, STIP amendments, contract amendments, and design changes. It became clear that this project did not have enough time to complete R/W clearances to meet the construction window for the 2018 period.			
Why a Formal	The cost increase to the project of \$550,500 equals a 27.9% which is above the 20%			
amendment is	administrative modification threshold for cost changes for project that cost \$1			
required?	million or greater.			
Total Programmed	The total programmed amount for the project increases from \$1,988,500 to			
Amount:	2,544,000			
Added Notes:	The construction phase slip to	2018 required FHWA approval.

Note: The Amendment Matrix at right is included as a reference the rules and justification for Formal Amendment and Administrative Modifications that the MPOs and ODOT must follow

METRO REQUIRED PROJECT AMENDMENT REVIEWS

In accordance with 23 CFR 450.316-328, Metro is responsible for reviewing and ensuring MTIP amendments comply with all federal programming requirements. Each project and their requested changes are evaluated against multiple MTIP programming review factors that originate from 23 CFR 450.316-328. The programming factors include:

- Verification as required to programmed in the MTIP:
 - Awarded federal funds and is considered a transportation project
 - Identified as a regionally significant project.
 - o Identified on and impacts Metro transportation modeling networks.
 - Requires any sort of federal approvals which the MTIP is involved.
- Passes fiscal constraint verification:
 - Project eligibility for the use of the funds
 - Proof and verification of funding commitment
 - Requires the MPO to establish a documented process proving MTIP programming does not exceed the allocated funding for each year of the four year MTIP and for all funds identified in the MTIP.
- Passes the RTP consistency review:
 - o Identified in the current approved constrained RTP either as a stand- alone project or in an approved project grouping bucket
 - o RTP project cost consistent with requested programming amount in the MTIP
 - o If a capacity enhancing project is identified in the approved Metro modeling network
- Satisfies RTP goals and strategies consistency: Meets one or more goals or strategies identified in the current RTP
- Determined the project is eligible to be added to the MTIP, or can be legally amended as required without violating provisions of 23 CFR450.300-338 either as a formal Amendment or administrative modification:
 - O Does not violate supplemental directive guidance from FHWA/FTA's approved Amendment Matrix.
 - o Adheres to conditions and limitation for completing technical corrections, administrative modifications, or formal amendments in the MTIP.
 - o Is eligible for special programming exceptions periodically negotiated with USDOT as well.
 - o Programming determined to be reasonable of phase obligation timing and is consistent with project delivery schedule timing.
- MPO responsibilities completion:
 - o Completion of the required 30 day Public Notification period:
 - Project monitoring, fund obligations, and expenditure of allocated funds in a timely fashion.

o Acting on behalf of USDOT to provide the required forum and complete necessary discussions of proposed transportation improvements/strategies throughout the MPO.

APPROVAL STEPS AND TIMING

Metro's approval process for formal amendment includes multiple steps. The required approvals for the June 2018 Formal MTIP amendment will include the following:

	<u>Action</u>	<u>Target Date</u>
•	Initiate the required 30-day public notification process	May 30, 2018
•	TPAC notification and approval recommendation	June 1, 2018
•	JPACT approval and recommendation to Council	June 21, 2018
•	Completion of public notification process	June 28, 2018
•	Metro Council approval	June 28, 2018* or
		July 19, 2018*

^{*}Note: If any significant public comments are received that are deemed necessary for review by JPACT, the impacted projects or complete amendment will be pulled from the Metro Council agenda and returned to JPACT for their review and direction. The revised Council would occur on July 19, 2018.

USDOT Approval Steps:

	<u>Action</u>	<u>Target Date</u>
•	Metro development of amendment narrative package	July 2, 2018
•	Amendment bundle submission to ODOT for review	July 3, 2018
•	Submission of the final amendment package to USDOT	July 6, 2018
•	ODOT clarification and approval	End of July, 2018
•	USDOT clarification and final amendment approval	End of July, 2018

ANALYSIS/INFORMATION

- 1. **Known Opposition:** None known at this time.
- 2. **Legal Antecedents:** Amends the 2018-2021 Metropolitan Transportation Improvement Program adopted by Metro Council Resolution 17-4817 on July 27, 2017 (For The Purpose of Adopting the Metropolitan Transportation Improvement Program for the Portland Metropolitan Area).
- 3. **Anticipated Effects:** Enables the projects to obligate and expend awarded federal funds.
- 4. **Metro Budget Impacts:** None to Metro

RECOMMENDED ACTION:

JPACT recommends the approval of the modified Resolution 18-4897 which consists of sixteen projects in the June 2018 Formal MTIP Amendment bundle

JPCT approval: 6/28/2018TPAC Approval: June 1, 2018
