I. MINUTES

The following pages contain minutes of the last two MSD Board meetings of October 12, and October 26, 1973. The staff recommends approval of the minutes.

II. STATUS OF THE SOLID WASTE IMPLEMENTATION PROGRAM, PHASE II  
GRANT APPLICATION

Representatives of MSD met with the Oregon Statewide Solid Waste Citizens Advisory Committee (CAC) on October 31, 1973, to discuss the MSD Solid Waste Implementation Program Phase II Grant Application. As you remember the MSD Board authorized staff to seek planning grant funds of \$350,000 for the following five programs:

- |             |   |   |
|-------------|---|---|
| Priority I  | { | Program 1. Processible Solid Waste including preliminary design |
|             | { | Program 2. Tire Processing and Disposal                         |
| Priority II | { | Program 3. Non-Processible Solid Waste Program                  |
|             | { | Program 4. Recycling Management Program                         |
|             | { | Program 5. Columbia County Solid Waste                          |

The Statewide CAC Planning Sub-Committee and full Committee unanimously supported the MSD funding request with the stipulation that CAC review and DEQ approval of the Phase I Plan would be necessary before disbursement of Phase II funds. The DEQ staff also supported our request for funds and will direct a letter to the Emergency Board for that purpose. Further, the DEQ will provide copies of the grant application and other supportive information to the Emergency Board.

It is recommended the MSD Board be available to support presentation of the Grant Application before the Emergency Board on November 28 and 29, 1973. The MSD Board should also discuss and agree on the strategy for the Emergency Board presentation.

III. STATUS OF SOLID WASTE PRE-FINAL SUBMITTAL OF COR-MET SOLID  
WASTE REPORT

At the October 12, 1973 MSD Board meeting, COR-MET presented their pre-final submittal of portions of Volumes I and III. The remaining portions of these volumes by COR-MET and Volume II by Bartle-Wells are scheduled for submittal to MSD on December 14, 1973. The pre-final submittal received on October 12, 1973 has been dispersed for review and comment to approximately 50 groups. It is planned that summary comments on these reports will be presented to the Board on December 12, 1973.

No action is required on this item.

IV. STATUS OF JOHNSON CREEK FLOOD CONTROL DISTRICT

As directed by the Board at the October 12, 1973 meeting, the staff has directed letters requesting transfer of funds from Multnomah and Clackamas County General Funds to MSD for control of surface runoff along Johnson Creek. As you remember, these funds were dispersed to those counties after dissolution of the Johnson Creek Water Control District. If these funds become available for MSD use, the staff will propose a budget and workscope to improve flooding conditions within the Johnson Creek Basin. For your information, the Corps of Engineers study for this basin is near completion.

No action is required on this item.

V. FUTURE AREAS OF INTEREST FOR MSD

A memorandum on this agenda item is being sent to you by Chairman Lloyd Anderson for your review and for consideration at the Board meeting.
