#### METROPOLITAN EXPOSITION-RECREATION COMMISSION

#### **RESOLUTION NO.118**

The Metropolitan Exposition-Commission Finds:

1. That Commission Resolution No. 58, passed by the Commission on April 11, 1990, authorized a salary compensation study for all parttime and full-time non-represented employees.

2. That following a competitive RFP process the Commission salary study committee recommended that Ralph Andersen & Associates be awarded the contract for a fixed cost of \$25,000.

3. That at the Commission's June 13, 1990 meeting, the Commission approved Resolution No. 69 authorizing the General Manager to enter into contract negotiations with Ralph Andersen & Associates to develop an agreement to conduct a classification and compensation study of the full-time and part-time non-represented classes for the Metropolitan Exposition-Recreation Commission.

4. That the Ralph Andersen Study was to be completed in late September 1990, and later revised to be completed by mid December 1990.

5. That the salary study committee members were dissatisfied with the documentation provided for the compensation portion and several times requested additional documentation from Ralph Andersen & Associates.

6. That Commission Staff finally then collected market survey data to enable the salary study committee to confirm the compensation recommendations made by the firm.

7. That the Salary Study Committee recommends approval of the modified compensation and classification plan. The Committee further recommends that implementation of the plan begin immediately and be retroactive to January 1, 1991 for full-time, non-represented employees, at a cost of \$48,608 for labor and fringes in this fiscal year's budget. In addition, the Commission recognizes that several positions will require reclassification and/or redefinition.

8. That the Salary Study Committee also recommends that executive management staff be evaluated separately, and any salary adjustments will be determined by the Commission in conjunction with recommendations from the General Manager.

9. That the Salary Study Committee also recommends that the salary plan be implemented as of July 1, 1991 for part-time, non-represented employees.

10. That adequate funds exist in the FY 1990-91 Budget contingency funds and the budget adjustments will be made by resolution at the Commission's April, 1991 meeting.

#### BE IT THEREFORE RESOLVED:

1. That the Commission approves adoption of the modified compensation and classification plan covering all full-time and parttime non-represented employees.

2. That implementation of the plan begin immediately and be retroactive to January 1, 1991 for full-time, non-represented employees and July 1, 1991 for part-time, non-represented employees.

3. That adequate funds exist the Commission's FY 1990-91 Budget contingency funds to cover the \$48,608 for labor and fringes for the full-time, non-represented employees salary adjustments.

4. That executive management staff be evaluated separately, and any salary adjustments will be determined by the Commission in conjunction with recommendation from the General Manager. In addition, the Commission recognizes that several positions will require reclassification and/or redefinition.

Passed by the Commission on March 12, 1991.

SUBJECT: Salary Classification and Compensation Study Recommendations

#### Background

-----

Commission Resolution No. 58, dated April 11, 1990, authorized a salary compensation study for all part-time and full-time nonrepresented employees. A commission salary committee developed a request for proposals for the project; the project was appropriately advertised; and seven proposals were received. The salary committee met to review all proposals and selected a short list for interviews (Ralph Andersen & Associates, Hay Management Consultants, and Kenny Consulting Group). The Commission salary study committee recommended that Ralph Andersen & Associates be awarded the contract for a fixed cost of \$25,000. At the Commission's June 13, 1990 meeting, the Commission approved Resolution No. 69 authorizing the General Manager to enter into contract negotiations with Ralph Andersen and Associates to develop an agreement to conduct a classification and compensation study of the full-time and part-time non-represented classes for the Metropolitan Exposition-Recreation Commission.

Update

Phase I (August-September, 1990)

The work plan was finalized with the salary study committee and appropriate Commission staff. Management conferences were held with executive level staff and representatives from Ralph Andersen to obtain information about the Commission's structure and organization. Representatives from Ralph Andersen also met with employees to clarify the project goals and objectives and distribute job analysis questionnaires. Historical compensation policies and practices were also discussed during this phase.

### Phase II (October-November, 1990)

Employees completed job analysis questionnaires and forwarded them to supervisors for review and input. Ralph Andersen then conducted a classification job analysis including interviews with employees who were invited to meet individually or in small groups with representatives from Ralph Andersen. A draft classification manual was prepared from this information and included class concepts, career ladders and position allocations. Employees again had an opportunity to review their prepared job descriptions and talk to representatives of Ralph Andersen if they felt the description contained inaccuracies. In this phase, labor market employers were identified and surveyed. The data was then analyzed and salary recommendations and pay structures were developed and shared with the committee.

### Phase III (December-February, 1991)

The compensation portion of the report was completed and shared with the committee during this phase. Committee members were dissatisfied with the documentation provided for the compensation portion of the survey and requested additional documentation from Ralph Andersen and Associates. The principal consultant for the project left the firm, causing even further delay in completion of the survey. When additional salary compensation data arrived from Ralph Andersen the committee again expressed dissatisfaction with the materials and requested that staff collect market survey data to enable the committee to confirm the compensation recommendations made by the firm. The market survey data was collected and assembled by staff and reviewed by the salary study committee on Monday, March 11, 1991.

#### Recommendation

The Committee recommends approval of the modified compensation and classification plan. The committee further recommends that implementation of the plan begin immediately and be retroactive to January 1, 1991 for full-time, non-represented employees. The effect on this fiscal year's budget will be \$48,608 for labor and fringes. In addition, the Committee recognizes that several positions will require reclassification and/or redefinition. Staff has been instructed to deal with those positions separately.

Executive management staff will be evaluated separately, and salary adjustments will be determined by the Commission in conjunction with a recommendation from the General Manager.

The Committee further recommends that the salary plan be implemented as of July 1, 1991 for part-time, non-represented employees.

Project Overview

# CHAPTER I PROJECT OVERVIEW

Ralph Andersen & Associates was retained by the Metropolitan Exposition-Recreation Commission to conduct a comprehensive classification and compensation study of all nonrepresented classes. Specifically, the classification and compensation study included:

• The review and analysis of compensation philosophies and goals

- Review meetings and interviews with MERC staff to gain a full understanding of the duties and responsibilities assigned to each position
- The development of a revised classification plan based on current job duties and responsibilities (provided under separate cover)
- An analysis of current compensation practices, internal relationships, and salary structures
- The collection and analysis of labor market base salary data
- The development of salary ranges and pay structures based upon the results of the labor market survey and the analysis of internal salary relationships
- The development of a comprehensive implementation and maintenance plan.

This Executive Summary presents the findings and recommendations of the classification and compensation study. To facilitate review, this report is organized as follows:

- Chapter I-Project Overview
- Chapter II-Classification
- Chapter III-Compensation
- Chapter IV-Salary Structures & Cost Implementation.

### STUDY OBJECTIVES

Based on the identified needs of MERC, this study was designed to achieve the following overall objectives:

- The development of a classification plan including the development of career ladders, updated class specifications, qualification guidelines, and the application of consistent titling conventions
- Compilation and analysis of base salary market data to ensure the competitiveness of MERC salaries
- Development of specific salary recommendations for all jobs included within the scope of the study, accounting for external labor market data and internal salary relationships
- Development of administration guidelines to ensure that the implemented plan can be properly maintained over time.

To achieve these objectives, project consultants completed a number of different work tasks including the following:

- Meetings with MERC staff to identify concerns and issues regarding MERC's current classification and compensation plans
- Review and analysis of supporting documentation including current salaries, job descriptions, organization charts, and current salary administration policies and practices
- Employee briefings to ensure that all of MERC's employees understood the project scope and methodologies
- Distribution and analysis of job analysis questionnaires for all study positions
- Conduct of job analysis interviews with a high percentage of employees to ensure a thorough understanding of duties, responsibilities, and classification concerns
- Development of a comprehensive and up-to-date classification plan
- Identification of an appropriate labor market from which to gather compensation data
- Collection and analysis of base salary market data
- Development of appropriate internal salary relationship guidelines including a detailed analysis of existing internal salary relationships

Page 2

- Development of specific salary recommendations based upon external labor market data and internal salary relationships
- The identification and development of cost implementation strategies, cost estimates, and maintenance guidelines.

The completion of the tasks has resulted in draft classification and compensation recommendations which are discussed in Chapters II - IV of this Executive Summary.

# CHAPTER II CLASSIFICATION

A significant amount of project time was devoted to the classification phase of the study. The recommended classifications were developed based upon the following information:

- A review of organizational charts, current job descriptions and other background documentation
- A thorough analysis of the job analysis questionnaires
- Information provided by employees, supervisors and managers during the classification interviews.

Using the results of these analyses, the positions were grouped into tentative classes based upon similar job duties and responsibilities. After the class definitions were developed for these classes, the overall classification concepts were prepared to ensure the consistent application of class titles and levels. The classification concepts were then reviewed by MERC representatives to allow for additional input and clarification.

Once the revisions to the classification concepts were complete, draft class specifications were developed for each recommended classification. The result of this process is an updated classification plan which is fully documented in the Classification Manual. This manual will be submitted under separate cover once all final classification revisions have been incorporated. Specifically, this manual contains:

- A summary of the classification process
- Definitions of technical terms used and titling conventions
- Career ladders for selected job families
- A list of all classification titles
- The allocation of each position to the appropriate classification
- Class specifications for all classes involved in the study.

Specific recommendations and a summary of significant changes are presented below.

## **CLASSIFICATION RECOMMENDATIONS**

The Draft Classification Manual developed for the Metropolitan Exposition-Recreation Commission incorporates some changes to MERC's current classification plan. Each change, as well as the overall plan, has been thoroughly reviewed by MERC staff. The review of the draft documents ensures that the recommended changes are consistent with MERC's classification goals and objectives as described in Chapter I. Significant changes to the current plan include:

- Identification of conceptual levels of work including entry, journey, and advanced journey classes
- Allocation standards to assist MERC in the maintenance of the classification plan
- Consistently applied job titles throughout MERC based on the scope of duties and the level of responsibility
  - Clerical, Maintenance, Technical, and Professional
    - .. Senior
    - .. II
    - . . 1
  - Supervisory and Management
    - .. Director
    - .. Manager
    - .. Assistant Manager
    - .. Supervisor
- Definitions of levels of management and supervisory positions
- The development of potential career ladders for advancement for MERC employees.
- Class specifications which provide an updated description of each classification including a class definition, supervisory responsibilities, examples of duties, and qualification guidelines

All of these changes result in a classification plan which:

- Provides an improved basis for recruiting, testing, and selecting employees
- Improves the framework for evaluating employee performance during probationary and continuing periods of employment
- Serves as a foundation for establishing and identifying areas that are basic to employee training programs
- Provides a basis for establishing a compensation program that is related to the nature of the work performed

Page 6

Page 7

• Improves implementation and maintenance capabilities by providing MERC with a defensible and conceptually defined classification plan.

The development of the classification plan, and the supporting documentation, provides a foundation for the compensation recommendations which are presented in the following chapter.

# CHAPTER III COMPENSATION

To establish a competitive and effective compensation plan for the Metropolitan Exposition-Recreation Commission's staff, a thorough understanding of market pay practices is necessary. This Chapter of the Executive Summary identifies the parameters of the labor market analysis including the conduct of an independent labor market salary survey. Overall objectives of the compensation analysis, including the role of labor market data in the salary setting process, are likewise presented.

To facilitate review, this Chapter is organized into the following sections:

- Compensation Analysis Objectives
- Selection of Labor Market Agencies
- · Identification of an Appropriate Labor Market
- Selection of Survey Classifications
- Results of the Labor Market Survey
- Salary Recommendations.

Each of these topics are presented below.

#### **COMPENSATION ANALYSIS OBJECTIVES**

The Metropolitan Exposition-Recreation Commission's compensation plan is one of the most important elements of its personnel system and should accomplish the following objectives:

- Ensure that MERC has the ability to attract and retain well-qualified personnel
- Ensure that MERC's compensation practices are competitive with those of comparable employers
- Ensure that appropriate internal relationship differentials are used to provide an equitable and sound compensation plan.

The results of the compensation analysis were used to anchor MERC's compensation plan to the market place in order to ensure the ability of MERC to recruit and retain quality employees. The role or primary objective of the compensation data analysis is to determine how MERC compares to other similar employers in terms of base salary. It is important to remember, however, that the results of the compensation survey are but one component used in setting salaries and establishing MERC's compensation plan. Other components include internal salary relationships, the ability of the organization to pay, and any specific recruiting and retention problems that MERC may be experiencing.

As a starting point, parameters for conducting the compensation analysis included the selection of survey employers to be used in collecting labor market data. The factors considered and the steps taken in the selection of the survey employers are presented below.

## **SELECTION OF LABOR MARKET AGENCIES**

The general objective in selecting survey agencies was to define as accurately as possible MERC's "labor market". A labor market is generally that group of agencies with which MERC competes in terms of recruiting and retaining personnel.

There are typically three important criteria utilized in identifying those employers which comprise an agency's labor market. They are:

• <u>Employer Size</u>--As a rule, the more similar employers are in size and complexity, the greater the likelihood that comparable positions exist within both organizations. Specifically, facilities of a size and complexity similar to that of the Metropolitan Exposition-Recreation Commission are more likely to have a service structure and organization of positions more similar to that of MERC than are facilities significantly smaller or larger in size.

Two specific indicators of size for meeting, convention and performance facilities include capacity and number of employees. For general public sector agencies the key indicator of size in comparison to the Metropolitan Exposition-Recreation Commission is number of employees.

• <u>Geographic Proximity</u>--Geographic proximity of potential employers is another major factor utilized in identifying an organization's labor market. This factor is particularly important because it identifies those employers that directly compete with MERC to recruit and retain personnel. Furthermore, by selecting employers within close geographic proximity, the resulting labor market will be generally reflective of the region's cost of living, housing costs, growth rate, and other demographic characteristics.

<u>Nature of Services Provided</u>--The final criterion typically utilized in identifying an organization's labor market is the nature of services provided. This criterion is important for the following reasons:

- Employers who make similar products or provide similar services are most likely to compete with one another for employees
- These employers are most likely to have comparable jobs
- These employers are most likely to have similar organizational and economic characteristics.

Each of these factors has been taken into consideration in identifying an appropriate labor market for the Metropolitan Exposition-Recreation Commission.

## **IDENTIFICATION OF AN APPROPRIATE LABOR MARKET**

Since the Metropolitan Exposition-Recreation Commission competes at a local level for clerical, security, and some technical classes, it was recommended that MERC establish a local set of labor market agencies to compare compensation data. These local agencies better reflect the specific recruiting practices of MERC for the non-management classes. Agencies that were included in the local labor market analysis are presented in Exhibit III-A. In summary these agencies include:

- Three large counties in the State of Oregon
- Four local cities in the State of Oregon
- One county and one city in the State of Washington

- Metro

Recognizing that the Commission will recruit professional and management positions at a regional level and encompassing more facility related organizations, it was recommended that the Commission expand the agencies in the local labor market to include the agencies listed in Exhibit III-B. These agencies include:

- Facilities in the Seattle, Tacoma and Spokane areas in Washington
- Facilities in the Oakland, Long Beach and San Diego areas in California
- Facilities in major metropolitan areas of Colorado, Utah and Arizona.

The selection of survey employers was reviewed with MERC prior to the collection of survey data.

| City of Tigard                                 |                              |       | . 168                      |  |  |
| <u>Washington</u>                              |                              |       |                            |  |  |
| Clark County                                   |                              |       | 919                        |  |  |
| City of Vancouver                              |                              |       | 450                        |  |  |
|  |                              |       |                            |  |  |
| <b>Metropolitan Exposition</b> 1               | <b>Recreation</b> Commission |       | 150                        |  |  |

## SURVEY CLASS SELECTION

The second step in undertaking the compensation survey was the selection of survey classifications for comparison purposes. Survey classifications are a representative sample of all classifications contained in MERC's classification plan and provide a reference point for the extrapolation of salary recommendations for nonsurvey classes. Three important criteria are generally utilized in selecting survey classifications. They are:

- Survey classes should have a clear and identifiable relationship to other classes in their occupational group. This assures that they will make good references in relating and establishing salaries for other classes.
- They should be reasonably well known, and clearly and concisely described.
- They should be commonly used classes such that counterparts may readily be found in other agencies in order to ensure that sufficient compensation data will be compiled.

Based on these factors, the survey classes are identified in Exhibit III-C.

These agencies and survey classes provided MERC with a foundation on which to base the compensation recommendations.

#### **RESULTS OF THE COMPENSATION SURVEY**

Based upon the compensation analysis, general salary trends in the market place have been identified. Labor market trends serve as the foundation for establishing an equitable and effective plan that will allow MERC to effectively recruit, retain and reward its employees. Upon comparing MERC's relative position to the labor market, it is recommended that the median be used as a reference point for market trends. The median is a very stable statistical measure and will not be skewed significantly by single high or low paying market employers.

In analyzing the question of "market relationship", the survey jobs were ranked from high-to-low in terms of the each survey classification's salary relationship to the market (i.e. percent above/below the labor market median). A summary of the labor market survey results is presented in Appendix A which reveals that of the 15 jobs surveyed in the local market:

- MERC is below the market in four instances ranging from -0.20% to 6.96%
- MERC is above the market for two classes, one at 6.84% and one at 9.86%
- Insufficient data was available for analysis in 8 classes.

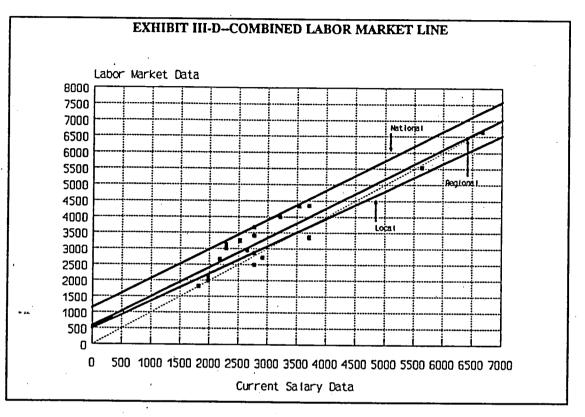

In the expanded market 17 classes were surveyed with the following results:

- Four MERC classes are above the market in a range of 0.18% to 9.70%
- MERC is below the market in 10 classes ranging from -11.33% to -36.80%
- Four classes do not have sufficient data for analysis.

As indicated in the data, the relationship of MERC classes to comparable jobs in the labor market agencies varies significantly from class to class. This inconsistency is primarily due to the following factors:

- The number of comparable classes found in the labor market agencies is not consistent. For some classes, only five comparable classes were analyzed while for others up to ten comparable classes were analyzed.
- There is a distinct difference in the salary data between jobs which can be found in local agencies in contrast to classes that can only be found in other large stadium, coliseum, performing arts, and convention center facilities.
- Current salary levels for MERC classes are not based on the same market as that utilized in the salary survey.
- There was insufficient data for 12 survey classes.

In order to minimize the effects of the data inconsistency, three trend lines were developed to provide a better and more consistent indicator of labor market salary trends. These trend lines were developed using the statistical process of linear regression which compared selected MERC salaries to market median salaries. Using the salary data presented in Appendix A, three trend lines were developed to best represent local, regional, and national labor market trends as presented in Exhibit III-D below.

These trend lines provide a basis for establishing salary levels for all benchmark classes as discussed in the following section.

#### SALARY RECOMMENDATIONS

Based on an analysis of the Metropolitan Exposition-Recreation Commission's current compensation plan and an analysis of market trends, a revised compensation plan has been developed. Key components of this compensation plan include:

- An equitable and structured salary plan
- Consistent and equitable internal salary relationship differentials
- Salary ranges which are competitive with the labor market trend line
- Compensation structures which are easily integrated with MERC's compensation system.

The first step in building the recommended compensation plan included the selection of benchmark classifications. Benchmark jobs are those jobs that are tied directly to a market trend line during the salary setting process. These jobs are used as a means of anchoring MERC's overall compensation plan to the market, and are used as a reference point for establishing salary levels for all other classes within MERC's personnel system.

Based upon a detailed analysis of the labor market data which accounted for labor market relationships and the strength of the market data in terms of comparabilities identified, a total of 19 benchmarks were selected from the classes used in the labor market analysis. These classes are indicated in the salary recommendations by the word "benchmark".

Building from the salary levels established for identified benchmark jobs, internal salary relationships were developed and used to set salaries for all other nonbenchmark jobs. Recognizing the job levels established in MERC's classification plan and the general labor market trends, the following internal salary relationship guidelines have been established and consistently applied in order to develop specific salary recommendations for each job. Using the top step (maximum) salary of each proposed salary range as a consistent point of reference, it is recommended that:

- Salaries for entry level classes be set 10 to 15 percent below journey level classes
- Salaries for technical and professional jobs be set approximately 10 to 15 percent apart
- Salary levels for management jobs be set approximately 15 to 25 percent above the highest paid subordinate.

Where possible, current salary relationships were maintained, unless the results of the classification analysis or labor market data indicated a change was necessary. The guidelines presented above have been applied along with the labor market salary data to construct a salary plan that is internally equitable while maintaining a competitive relationship with the external market place.

Appendix B presents the draft salary recommendations for each classification recommended in revised classification plan for the Metropolitan Exposition-Recreation Commission. The appendix includes the identification of:

- Recommended class title
- Current class title
- Current minimum and maximum monthly salary for each class
- Specific labor market high and low salary data, if utilized

- A recommended salary range and minimum and maximum top step
- Dollar and percentage change between current monthly maximum salary and the recommended salary maximum
- Rationale for the salary recommendation.

The rationale for the salary recommendation identifies the reliance placed upon labor market data, internal salary relationship guidelines, and/or internal ties between other jobs in developing each specific recommendation. This information provides MERC with the necessary tools in order to maintain the internal equity of the plan over time.

# CHAPTER IV RANGE STRUCTURES & COST IMPLEMENTATION

This final chapter of the Executive Summary provides the Metropolitan Exposition-Recreation Commission with recommendations regarding MERC's compensation structures. In addition, this chapter provides a summary of the implementation strategies that were analyzed as well as specific recommendations for implementation. Each of these topics are discussed separately below.

## SALARY RANGE STRUCTURES

Currently, most of MERC's full-time nonrepresented classes utilize a five step salary range with approximately five percent increments between steps. Employees are generally hired at the minimum of the salary range and can progress to the maximum step through annual merit increases. For MERC's part-time classes the salary range structure can vary from a flat salary up to three steps depending on the specific class. Executive management classes are paid a flat salary without a range structure.

For MERC's full-time, nonrepresented and non-executive classes, it is recommended that MERC implement a six step range. It is further recommended that MERC implement the use of a squared table with 5 percent between steps and 2.5 percent between salary ranges.

For part-time non-represented classes, it is recommended that MERC adopt a five step range with 5 percent between steps and 2.5 percent between salary ranges. The top step of each range on the part-time table should correspond with the fourth step of the full-time table for the same range number.

These salary structure will better enable MERC to manage its compensation plan over time and would be administered as follows:

• New employees would enter the salary range at the minimum (step 1) of the salary range

Range Structures & Cost Implementation

- After completion of their probationary period, the employee would be eligible for a one step (5 percent) pay increase
- Thereafter, the employee would receive a one step merit increase annually, assuming the employee is performing at a satisfactory level
- These merit increases would continue until the employee reaches the top of the salary range (step 5 or 6 depending on full- or part-time status).

For MERC's executive management employees, it is recommended that MERC establish open salary ranges with a range spread from salary minimum to maximum of 50 percent. This range structure will allow more flexibility in the administration of the management salary ranges. Guidelines for administering this type of pay plan include:

- Salaries for new employees would be set to the salary range minimum, unless specific recruitment needs require a salary level above the range minimum but not to exceed the midpoint of the range.
- Movement through the salary range should be based upon performance and should be closely tied to a pay for performance plan, thereby ensuring a meaningful correlation between merit pay increases and the level of job performance.
- Increases for current executive staff could be implemented at least equal to that of the overall percentage payroll increase (3.0%) plus any other cost of living increases received by the other class.

In addition to merit increases, the entire salary table would be adjusted annually to account for cost of living (COLA) increases. These increases would normally be determined based on cost of living indicators such as the Consumer Price Index. Both merit and COLA increases would be subject to MERC's ability to pay.

In order to ensure that MERC maintains equity with the labor market, the salary plan should be updated through a salary survey every third year. It is <u>not</u> necessary for MERC to conduct annual salary surveys, unless specific data is needed for a new position.

Range placement tables for all of MERC's non-represented classes are provided in Appendix C.

### COST IMPLEMENTATION

In order to provide MERC with a clear understanding of the costs for implementing the salary recommendations, cost analyses were prepared for all

Page 20

employees included in the scope of the study. The implementation cost figures represent the dollar and percentage increase in MERC's base salary expenditures, not including benefits, cash add-ons or retirement costs. Based on these parameters the first year implementation cost for the salary recommendations will result in at least a 3.0 percent increase in MERC's base salary payroll expenditure for those positions included in the study.

For those employees recommended for an increase of greater than 10% it is suggested that MERC phase-in the amount of increase above 10% at 5% increments on a quarterly or semi-annual basis until the compensation objective has been met.

The intent of this implementation option is to provide MERC with a compensation plan that is competitive with the labor market while meeting MERC's ability to pay. This approach will further help to ensure that MERC is able to provide employees annual merit increases and appropriate cost of living adjustments in future years.

+ + +

In summary, the recommended compensation plan and the corresponding administration guidelines will effectively eliminate any compensation inequities in MERC's current compensation plan. Specifically, the recommended plan addresses a variety of compensation issues including the use of consistent internal relationship differentials, the development of sound compensation structures, and a more equitable linkage with labor market compensation trends.

ME MORANDUM

TO: Ralph Andersen Range Placement Tables

FROM: Salary Survey Committee

SUBJECT: Adjustments to Salary Recommendations (Appendix B) and Salary Range Placement Tables (Appendix C)

The following adjustments were made by the Salary Survey Committee on March 11,1991 to the Ralph Andersen Salary Recommendations (Appendix B) and Range Placement Tables (Appendix C):

### **Full-Time Classes**

Oregon Convention Center Director, Portland Center for the Performing Arts Director, Stadium/Coliseum Director and Finance & Administration Director have been retitled as manager positions.

Personnel Assistant position was retitled as a Clerical Assistant, and was placed in Range 29 to correct internal alignment and reflect revised job description duties. This position is currently placed in the G & A budget and not one of the personnel positions which is reimbursed by the Metropolitan Exposition-Recreation Commission to Metro.

The Secretary position at the Oregon Convention Center who reports to the Oregon Convention Center Director was placed in Range 33 and retitled Administrative Secretary to correct internal alignment and properly reflect the duties of the position.

Assistant Special Services Manager-Admissions was moved from Range 39 to Range 41 to correct internal alignment.

Senior House Manager was moved from Range 47 to Range 44 to correct internal alignment.

Systems Administrator was moved from Range 53 to Range 50 to correct internal alignment.

Operations Manager was moved from Range 50 to Range 53 to correct internal alignment.

## Part-Time Classes

Elevator Operator was added to Range 9. (Omitted in the Ralph Andersen study).

Seat Marker was added to Range 11. (Omitted in the Ralph Andersen study).

Checkroom Attendant was added to Range 15. (Omitted in the Ralph Andersen study).

Event Receptionist was moved from Range 15 to Range 18 to correct internal alignment.

Merchandising Supervisor was correctly placed in Range 18, however, "the 1% of gross merchandising sales, whichever is greater, per event" description of the salary was omitted in the Ralph Andersen study and the Committee has included the statement to the position.

It should also be noted that the annual salary rates listed in the range placement tables are based on 2,075 hours and will require adjustment to 2,080 hours. The result of making this adjustment will be that yearly rates will remain the same as listed on the Ralph Andersen study, but hourly rates will be slightly lower. Appendix

#### ME MORANDUM

#### TO: Ralph Andersen Range Placement Tables

FROM: Salary Survey Committee

SUBJECT: Adjustments to Salary Recommendations (Appendix B) and Salary Range Placement Tables (Appendix C)

The following adjustments were made by the Salary Survey Committee on March 11,1991 to the Ralph Andersen Salary Recommendations (Appendix B) and Range Placement Tables (Appendix C):

#### Full-Time Classes

Oregon Convention Center Director, Portland Center for the Performing Arts Director, Stadium/Coliseum Director and Finance & Administration Director have been retitled as manager positions.

Personnel Assistant position was retitled as a Clerical Assistant, and was placed in Range 29 to correct internal alignment and reflect revised job description duties. This position is currently placed in the G & A budget and not one of the personnel positions which is reimbursed by the Metropolitan Exposition-Recreation Commission to Metro.

The Secretary position at the Oregon Convention Center who reports to the Oregon Convention Center Director was placed in Range 33 and retitled Administrative Secretary to correct internal alignment and properly reflect the duties of the position.

Assistant Special Services Manager-Admissions was moved from Range 39 to Range 41 to correct internal alignment.

Senior House Manager was moved from Range 47 to Range 44 to correct internal alignment.

Systems Administrator was moved from Range 53 to Range 50 to correct internal alignment.

Operations Manager was moved from Range 50 to Range 53 to correct internal alignment.

#### Part-Time Classes

Elevator Operator was added to Range 9. (Omitted in the Ralph Andersen study).

Seat Marker was added to Range 11. (Omitted in the Ralph Andersen study).

Checkroom Attendant was added to Range 15. (Omitted in the Ralph Andersen study).

Event Receptionist was moved from Range 15 to Range 18 to correct internal alignment.

Merchandising Supervisor was correctly placed in Range 18, however, "the 1% of gross merchandising sales, whichever is greater, per event" description of the salary was omitted in the Ralph Andersen study and the Committee has included the statement to the position.

It should also be noted that the annual salary rates listed in the range placement tables are based on 2,075 hours and will require adjustment to 2,080 hours. The result of making this adjustment will be that yearly rates will remain the same as listed on the Ralph Andersen study, but hourly rates will be slightly lower.

SUBJECT: Salary Survey Implementation Options

Following is a list of options to consider in implementing the Ralph Andersen Salary Survey findings:

- 1. Authorize a 3 1/2% increase for non-represented employees making over \$30,000 retroactive to January 1, 1991. Implement the new salary plan for all non-represented employees on July 1, 1991.
- 2. Implement the plan for all non-represented employees retroactive to January 1, 1991. No increase for employees \$30,000 + .
- 3. Implement the plan for all non-represented employees on April 1, 1991. No retroactive provision. No increase for employees \$30,000 +.
- 4. Implement the plan for all non-represented employees on April 1, 1991. No retroactive provision. No increase for employees \$30,000 + .

#### ME MORANDUM

TO: Salary Survey Committee

FROM: Staff

SUBJECT: Recommended Adjustments to Ralph Andersen Range Placement Tables

The following adjustments are recommended in the Ralph Andersen Range Placement Tables:

#### Full-Time Classes

Volunteer Coordinator should be added to the full-time schedule in Range 35. (Fulltime position omitted in the Ralph Andersen study).

Systems Administrator should be moved from Range 53 to Range 50 to correct internal alignment.

Operations Manager should be moved from Range 50 to Range 53 to correct internal alignment.

Part-Time Classes

Elevator Operator should be added to Range 9. (Omitted in the Ralph Andersen study).

Seat Marker should be added to Range 11. (Omitted in the Ralph Andersen study).

Checkroom Attendant should be added to Range 15. (Omitted in the Ralph Andersen study).

Event Receptionist should be moved from Range 15 to Range 18 to correct internal alignment.

It should also be noted that the annual salary rates listed in the range placement tables are based on 2,075 hours and will require adjustment to 2,080 hours.

#### ME MORANDUM

TO: Ralph Andersen Range Placement Tables

FROM: Salary Survey Committee

SUBJECT: Adjustments to Salary Recommendations (Appendix B) and Salary Range Placement Tables (Appendix C)

The following adjustments were made by the Salary Survey Committee on March 11,1991 to the Ralph Andersen Salary Recommendations (Appendix B) and Range Placement Tables (Appendix C):

#### Full-Time Classes

( )

Personnel Assistant position was retitled as a Clerical Assistant, and was placed in Range 29 to correct internal alignment and reflect revised job description duties. This position is currently placed in the G & A budget and not one of the personnel positions which is reimbursed by the Metropolitan Exposition-Recreation Commission to Metro.

A Personnel Assistant (Assistant Management Analyst under Metro's pay plan) has been requested for the 1991-92 fiscal year. Duties of the new position contain para-professional duties previously included when the Personnel/Office Assistant position was assessed in the Ralph Andersen study as well as adding newly-defined duties.

The Secretary position at the Oregon Convention Center who reports to the Oregon Convention Center Director was placed in Range 33 and retitled Administrative Secretary to correct internal alignment and properly reflect the duties of the position.

Assistant Special Services Manager-Admissions was moved from Range 39 to Range 41 to correct internal alignment.

Senior House Manager was moved from Range 47 to Range 44 to correct internal alignment.

Systems Administrator was moved from Range 53 to Range 50 to correct internal alignment.

Operations Manager was moved from Range 50 to Range 53 to correct internal alignment.

Part-Time Classes

1

Elevator Operator was added to Range 9. (Omitted in the Ralph Andersen study).

Seat Marker was added to Range 11. (Omitted in the Ralph Andersen study).

Checkroom Attendant was added to Range 15. (Omitted in the Ralph Andersen study).

Event Receptionist was moved from Range 15 to Range 18 to correct internal alignment.

Merchandising Supervisor was correctly placed in Range 18, however, "the 1% of gross merchandising sales, whichever is greater, per event" description of the salary was omitted in the Ralph Andersen study and the Committee has included the statement to the position.

It should also be noted that the annual salary rates listed in the range placement tables are based on 2,075 hours and will require adjustment to 2,080 hours. The result of making this adjustment will be that yearly rates will remain the same as listed on the Ralph Andersen study, but hourly rates will be slightly lower.

#### MEMORANDUM

( )

TO: Ralph Andersen Salary Recommendations

FROM: Salary Survey Committee

SUBJECT: Adjustments to Appendix B - Salary Recommendations

The following adjustments were made by the Salary Survey Committee on March 11, 1991 to the Ralph Andersen Salary Recommendations:

1. The recommended monthly salary range maximums for the executive management staff should reflect the maximums listed on the range placement table for executive management. Those maximums include:

| Position                            | <u>Maximum Salary</u> |
|-------------------------------------|-----------------------|
| General Manager                     | \$9,748               |
| Oregon Convention Center Dir.       | \$6,244               |
| Portland Center for Perf. Arts Dir. | \$5,657               |
| Coliseum/Stadium Director           | \$7,071               |
| Finance & Admin. Director           | \$8,000               |
| Assistant to the General Manager    | \$7,071               |

- 2. Personnel Assistant was retitled to Clerical Assistant and placed in Range 29 to correct internal alignment and revised job description duties.
- 3. Systems Administrator was moved from Range 53 to Range 50 to correct internal alignment.
- 4. Event Receptionist was moved from Range 15 to 18 to correct internal alignment.
- 5. Assistant Special Services Manager-Admissions was moved from Range 39 to Range 41 to correct internal alignment.
- 6. Operations Manager was moved from Range 50 to Range 53 to correct internal alignment.

- 7. Merchndising Supervisor was correctly place in Range 18, however, "the 1% of gross merchandising sales, whichever is greater per event" description of the salary was omitted in the Ralph Andersen study.
- 8. Elevator Operator was added to Range 9. This position was omitted from the Ralph Andersen study.
- 9. Seat Marker was added to Range 11. This position was omitted from the Ralph Andersen study.
- 10. Checkroom Attendant was added to Range 15. This position was omitted from the Ralph Andersen study.
