

AGENDA

December 10, 1997

4pm, Metro REM

Participants: Dennis O'Neil, Emily Roth, Jim Watkins, Mark Wilson

1. Definition of "native dominant vegetation" in work scope of Metro/Mark Wilson Contract - Emily Roth
2. Definition of "sustainable vegetation" - Mark Wilson - wide range, large spectrum
3. Revisions to Goals and Objectives in contract work scope

Alternatives and implications of each

- Jim - not going down an isolate path if only looking at native dominant
- Mark Wilson - done extensive research on other landfills being revegetated w/ natives
 - not certain he can establish native vegetation w/o herbicide in tool box.
- Adaptive management project. Need to do a thorough vegetation survey.
- Native dominant vegetation >50% cover of plot is native, other <49% will not outcompete natives in long-run.
- Also assoc. of mycorrhizal fungi assoc. w/ grasslands
