

**Analytical Results for Surface Water
Metals and Volatile Organic Compounds**

**Smith-Bybee Lakes Wildlife Area
(1993-2002)**

Notes

Sort Order: Parameter / Sampling Station / Sample Date

Station Code:

K = Columbia Slough at Lombard Bridge

J = Columbia Slough N. Portland Rd. Bridge

H = East End North Slough

BL = Bybee Lake

SL = Smith Lake

All stations sampled since 1993; sampled 6 times per year since 1997

Apparent gaps in data generally indicate loss of sampling opportunity due to lack of standing water (i.e., dry season conditions)

Lombard Bridge station sampled at high tide to reflect Willamette R. conditions
N. Portland Rd. Bridge and E. North Slough stations sampled at low tide to reflect worst case (i.e. low water) conditions

Analytical limit is method-reporting limit

“< limit” indicates that parameter was not detected above method reporting limit

Beginning in Aug. 1995, VOC were no longer tested, due to the disproportionate number of non-detects

Beginning in Sept. 1996, metals have been analyzed in dissolved form to provide a more realistic indicator of water quality

Surface Water Monitoring Results (mg/l)
Metals (Total and Dissolved)
and Volatile Organic Compounds
(1993-2002)

Parameter	Station	Date	Result	Anal. Limit	Class
1,1,1-trichloroethane	BL	10/22/1993	< Limit	0.001	VOC

Analytical Results for Surface Water Leachate Indicators

Smith-Bybee Lakes Wildlife Area (1993-2002)

Notes

Station Code:

K = Columbia Slough at Lombard Bridge

J = Columbia Slough N. Portland Rd. Bridge

H = East End North Slough

BL = Bybee Lake

SL = Smith Lake

All stations sampled since 1993; sampled 6 times per year since 1997

Apparent gaps in data generally indicate loss of sampling opportunity due to lack of standing water (i.e., dry season conditions)

Lombard Bridge station sampled at high tide to reflect Willamette R. conditions
N. Portland Rd. Bridge and E. North Slough stations sampled at low tide to reflect worst case (i.e. low water) conditions

Beginning in Sept. 1996, metals have been analyzed in dissolved form to provide a more realistic indicator of water quality

Analytical limit is method-reporting limit

"< limit" indicates that parameter was not detected above method reporting limit

Sort Order: Parameter / Sampling Station / Sample Date

Surface Water Monitoring Results
Chloride (mg/l)
