Juno Pandian

- Water rights travel w/ the land - we can get permit transferred to us
- Permit allows us to store 4,100 ac/ft of water. If permit not exercised once every 5 years, we lose it. Our season of use is Nov. → June 30.
- No need to re-do these permits - they have priority dates in 1981.
- Juno & her dam safety engineer are meeting Morgan & me @ S&B.

Dwight French

Subject: Phone call from Juno Pandian

Juno Pandian, local Watermaster, called me after not being able to reach you directly and asked me to convey this message. She looked in the Salem office files and found that the 1993 Proposed Certificate for storing 3100 acre-feet remains valid. This volume was calculated by the WRD engineer. It needs to be officially issued, at which time you can adjust the volume, if needed. She recommends this process for clarity and speed, rather than filing for a new permit. Metro can shake the Proposed Certificate loose by bugging WRD, namely Dwight French, administrator of water rights.

→ 1-503-378-8455 x268 x268

If we want all the information in their Salem files, she recommends going to Salem.

ap. permit
62601 = R8298
62601 = 45974
Dwight pulled the files.

Permits have been issued. Proof was made, site surveyor visited 8/93, draft certificate was prepared. Probably not mailed out.

Dwight will ask senior tech. review person tomorrow whether there's any reason not to issue the certificate.

To get it assigned to Metro, I and OSFW fill out paperwork w/ \$25 - fee.

He suggests writing a letter - why I need it down now rather than later. Submit letter and assignment info. together. (They have a backlog of 6,000 certificates; when he gets a letter, he puts it in a pile and batches the requests every few months.)
