**Flag Status:** Flagged

Hi Jeff,

I put two copies of the S-B permit approvals in the mail for you today (one set for the contractor). Gus will have a copy as well.

Here's the short list of things that need to happen before / after construction:

1. Email USACE when construction starts – see "a" in their April 27 letter.
2. Sign Compliance Certification and mail back to USACE within 60 days of project completion (see form enclosed with USACE permits)
3. Provide ODFW with copy of as-builts after the project is complete.

Let me know if you need clarification on anything.

**Subject:** RE: NWP-2002-175-2 Smith and Bybee Lakes Corps permit (UNCLASSIFIED)

Hi April,  
Sorry for the delay...its salvage time and we had a couple of big projects past week that took me away from the office.

The Oregon Department of Fish and Wildlife fully supports your request for an extension to the established in water work period for the Lower Willamette River and Smith-Bybee Lakes. We do not feel any specific conditions are required due to the low risk posed by continuing work beyond September 15 and up to October 10, 2017. Please provide a weekly report of conditions at the site (including photos) and progress toward completion of all in-water work.

Let me know if the ACOE needs anything else to process your request...Thanks for your patience once again!

Todd

Hi Todd,  
Any update on your review of the Smith-Bybee in-water work window extension?  
Thanks!  
April

Hi Elgin,

I left you a voicemail but figured I'd follow up with an email as well. I met Jeremy Russell out at the Smith and Bybee water control structure today for the permanent erosion control inspection. He gave it an "approved" so I am just closing the loop with you to get the final approval on your end. Let me know if you need more information and also how you want to send final documentation - by email works fine for me, but mail would work as well. I also forgot to leave my cell number on the voice mail in case you want to call 503-312-0007.

Thanks!
