

Outline of Information Needs for St. Johns Landfill Discussion

- 1) Site history
- 2) Policy considerations and documents
 - a) NRMP
 - b) 1989 Revised Closure and Financial Assurance Plan for SJLF
 - c) 1998 Operations and Maintenance Manual for SJLF
 - d) 2001 Environmental Monitoring Plan for SJLF
- 3) Physical environment
 - a) Size and location, relation to landscape
 - b) Relation to surrounding surface and ground water
 - c) Soil conditions
 - d) Existing vegetation
- 4) Regulatory environment
 - a) Permitting authorities and their interests
 - b) Existing permits
 - c) Monitoring and reporting
 - d) Anticipated future work
 - i) Remedial investigation (Phase 2)
 - ii) Long-term monitoring
- 5) Current management
 - a) Operational infrastructure
 - i) Gas collection system
 - ii) Gas compressor station and pipeline to Ash Grove
 - iii) Motor blower flare facility
 - iv) Wastewater collection and discharge system (leachate & gas condensate)
 - v) Groundwater monitoring well network
 - vi) Leachate monitoring network
 - vii) Piezometer network
 - b) Vegetation management and lessons learned
 - c) Perimeter bank stabilization and management, including future needs
 - d) Public access
- 6) Potential uses
 - a) Wildlife
 - i) Potential guilds, current status of key species and their habitat needs
 - ii) Potential habitats and their current status in the landscape and region
 - b) Known recreation interests
 - i) Trails
 - (1) Alignment considerations
 - (2) Construction standards
 - ii) Model airplanes
 - iii) Revenue-generating activities
 - c) Other
- 7) Financial support
 - a) Environmental responsibilities
 - b) Other activities such as management and development
