

PROJECT REPORT

WILDLIFE DEMONSTRATION GARDENS

May 28, 1996

Project Report Wildlife Demonstration Gardens Metro Greenspaces Grant Program

I. PROJECT DESCRIPTION:

This project was proposed and carried out by City of Vancouver Parks & Recreation Department in partnership with NatureScaping, an all volunteer group whose mission it is to teach landscaping for wildlife. The purpose of the project involved the creation of a 2 acre demonstration area displaying plants attractive to wildlife and landscaping concepts that attract wildlife.

II. GOALS AND BENEFITS OF PROJECT:

The primary long term goal of the project was to increase the public's awareness of the loss of wildlife habitat and how they, in their own yards, could provide habitat by creating their own Backyard Wildlife Habitat Sanctuary. The creation of a demonstration area to show first hand how to landscape for wildlife and the plants that attract wildlife was our focus.

III. WORK TASKS AND TIMELINES:

This project experienced significant delays. First, due to unforeseen contractual problems with the Vancouver School District the project, the original grant approved by Metro in January of 1994, could not proceed till September of 1994. Once work began it became evident through experiences with another restoration project immediately adjoining the area that extensive vandalism would preclude a successful project. Volunteers spent the next four months searching for a more appropriate site where vandalism would not be such a problem. In February of 1995, the City of Vancouver requested and was granted a change of venue. The new location, CASEE (Center for Agricultural, Science & Environmental Education), is a 2 acre parcel. We were then forced to begin the planning process all over again, which put us farther back than we had calculated. By the time the planning process was completed (done by committee!) the planting season had been missed.

During the summer months the volunteer committee did site preparation and further planning. This planning identified several areas that we had under budgeted for - especially the Irrigation budget. We spent a great deal of time trying to locate a contractor to do the job pro bono. Finally, the original contractor agreed to do the job for a quarter of the price. This still left us several thousand dollars over our budgeted amount. So we spent the fall months of 1995 soliciting nurseries for donations for which we were extremely successful. See attached schedule of donations. We spent the winter and spring planting.

IV. PROJECT BUDGET: SEE ATTACHED SCHEDULE

V. PROJECT STAFF/ VOLUNTEERS:

This project was almost wholly completed by volunteers, including planning, budgeting, on the ground work and fundraising with supervision by Vancouver Parks & Recreation Department.

Dan George was project manager with Jeff Wittler as the Volunteer Project Manager. The project included over 200 different volunteers in excess of 7800 hours (these are supported by our volunteer log sheets - **see attached schedule**). These volunteers came from many different groups including NatureScaping, Master Gardeners, Sierra Club, Audubon, Boy Scouts etc.

VI. HOW THE PROJECT RELATES TO THE GREENSPACES PROGRAM:

This project is consistent with the objectives of the Greenspaces program by: Restoring or creating wildlife habitat in the urban area that will provide wildlife habitat and serve as a potential site for education and interpretation; Increasing the public's awareness of the importance of diversity in wildlife habitat; Using volunteers in project implementation; The use of native plants in the design of the project; And by providing an easily accessible site for wildlife viewing and enjoyment.

VII. WHAT WORKED/ WHAT DIDN'T/ HELPFUL HINTS:

Engaging area businesses & nurseries was by far the most successful part of the project which we feel will pay dividends far into the future - especially for continuing costs.

Partnerships with other volunteer groups was also instrumental in getting the work done.

VIII. ADVICE FOR OTHER PROJECT MANAGERS:

Allow for significant delays - especially if you are relying on donations from businesses. When vendors donate you cannot hold them accountable for timeliness.

IX. MONITORING AND MAINTENANCE:

Monitoring and maintenance will be carried out significantly past the year 2000. The demonstration area will be weeded on a monthly basis since the area will be used for public education and viewing.
