&gt;

I was so pleased to think that Metro still had my grant money available. However, the project that I was working on had to terminate. The money was to be used to purchase boots, shovels, pruning shears and other items to help the students in cleaning up our small wetland. Clackamas County put a stop to the project and I was asked not to pursue the project. The wetland was covered by mounds of dirt that was stored on top of the area for more than a year. The dirt was distributed to help build the access road that runs parallel to I-205 just above the west side of Mount Scott. I had no choice but to abandon this project after two years of planning. Please place the money back into the Metro grant monies to be used by future grant recipients. I thank you for all your time, energy, and support that Metro gave me during the past two years. I hopefully will come up with another green space project and will be knocking on your door step for help. Thanks again!

Sincerely,

Lacey Vogel
