RIVERBEND YOUTH CENTER

I. WRITTEN SUMMARY

A. SUMMARY OF INITIAL ACTIVITIES - JULY 10, 2000

Riverbend Youth Center's Environmental Program began in the fall of 1999. At the time, our goal was to add a science class to our school curriculum and to create an outdoor summer environmental program. After receiving our environmental grant from Metro in the spring of 2000 our goals are gradually being realized.

Goal 1 - Add a science class to school curriculum.

Working with the Clackamas Education Service District (CESD) and our local school teacher, we have successfully integrated a science class with our regular school schedule. We have two classes that meet four days a week for 50 minutes. Each class averages 6-8 students. For curriculum we use textbooks and teacher materials provided by the CESD. Thus far we teach Biology and Earth Sciences.

Goal 2 - Create an environmental program for summer.

We are in the process of developing our school curriculum. With the help of Clackamas Community College's Environmental Learning Center Director, a naturalist was contracted to help develop material appropriate for our kids that would follow the "Investigating Your Environment" curriculum, but would allow more experiential learning and less classroom learning. The goal of our summer environmental program is to have kids learn something without realizing they're learning something.

Goal 3 - Introduce painted turtles to our pond.

Our first goal is to have the pond habitat inspected by a professional wildlife biologist. We expect this to be done by summer's end of 2000. Once we get the ok, we will transplant turtles with the help of a biologist.(1)

B. SUMMARY OF SUBSEQUENT ACTIVITIES - MARCH 24, 2003

Goal 1 - Add a science class to school curriculum.

The initial science class, which began during the 1999-2000 school year, has now been expanded to two science classes that meet each school day for fifty minutes and involve six to eight students in a wide variety of science activities that include: biology, earth science, plant and animal identification, and ecology. Many of the instructional materials and equipment purchased through Metro Grant funds continue to be used along with textbooks and curricular materials provided through the CESD.

As a follow-up, staff members from CESD, using funds from a recycling grant, established a recycling program at RiverBend Youth Center that includes paper, plastic containers, cardboard, newspaper and magazines. These discarded paper products are collected throughout the agency each week, sorted and deposited in the appropriate bins.

FINAL REPORT
GREENSPACES RESTORATION GRANT
RIVERBEND YOUTH CENTER

Students enrolled in a pre-vocational Careers class have established a “cottage industry” called the RE Paper Shop that uses the collected/sorted paper to create handmade recycled paper products to be marketed in the community. At this time, students are making bookmarks, journals, photo albums, and gift tags from recycled paper.

Goal 2 - Create an environmental program for summer.

Throughout the 2002 summer school program, a team of six students and two staff members participated in landscaping and restoration activities at RBYC as members of a work experience crew called the “Landscape Specialists.” Projects included: remove noxious plants, repair and improve paths, design landscaping plan, identify appropriate native plants, prepare planting sites, and plant and care for native plants. During the six week summer program, students invested over two hundred and forty hours to complete these projects. (2)

As a follow-up, during the summer of 2002, RiverBend Youth Center was granted Oregon Youth Conservation Corps funds to operate a Summer OYCC Work Project. Six students from RBYC worked six hours a day, four days a week, for six weeks at McIver State Park. Students participated in reclamation and reiteration projects that included: trail repair and noxious weed removal.

Goal 3 - Introduce painted turtles to our pond.

This goal was not accomplished.

II. WRITTEN EVALUATION AND COMMENTS

A. ENVIRONMENTAL WORK PROJECTS (Attachment One)

This document shows the number of students involved in environmental work projects between November of 1999 and November of 2000, the projects they were involved with, the number of hours worked, rate of pay, and the salaries paid for these activities.

B. METRO GRANT - MATCHING FUNDS (Attachment Two)

This document shows the number of students involved in the 2000 Summer School Program - “Landscaping Specialists,” the number of hours worked, and projects completed.

III. COMMENTS AND HELPFUL HINTS

A. SUMMARY LETTER FROM MR. GEORGE B. REX (Attachment Three)

B. SUMMARY LETTER FROM MR. RUSS BRANSON (Attachment Four)

FINAL REPORT

RIVERBEND YOUTH CENTER

III. PHOTO DOCUMENTATION

A. PHOTO JOURNAL OF ACCOMPLISHMENTS (Attachment Five)

IV. LANDSCAPING PLOT MAP

A. PLOT MAP (Attachment Six)

V. MAINTENANCE PLAN AND FOLLOW UP ACTIVITIES

A. GOAL 1 - ADD A SCIENCE CLASS

It is the intent of RiverBend Youth Center to continue to offer at least one Science Class throughout the regular school year. These four academic classes will be offered each school day: Language Arts, Mathematics, Science, and Social Studies.

B. GOAL 2 - ADD A SUMMER ENVIRONMENTAL PROGRAM

It is the intent of RiverBend Youth Center to continue to offer a summer school program. The curriculum will offer these classes: Language Arts, Mathematics, and Work Experience. The work experience class will operate at least one work crew dedicated to environmental and recycling activities.

VI. NUMBER/SPECIES OF TREES AND SHRUBS PLANTED

A. INVOICE TO METRO GRANT PROGRAM (Attachment Seven)

B. INVOICES TO RIVERBEND YOUTH CENTER (Attachment Eight)

VII. ACTUAL PRODUCTS OF THE GRANT

A. ACTUAL PRODUCTS

There were no "actual products" such as curriculum, video, guide, brochure, etc. created as a result of this grant.

April 15, 2003

Dear Metro Regional Parks and Greenspaces,

RiverBend Youth Center was awarded a Greenspaces Environmental Education Grant in the fall of 1999 which ended in the fall of 2002.

This grant benefited RiverBend residents immensely. Through this grant RiverBend was able to purchase science and lab equipment and develop a science and lab school curriculum. This grant also provided opportunities for experiential education to our kids through environmental planning and care. We found that working with their environment translated directly into self-care skills and having a sense of ownership and responsibility for the land. Finally, this grant allowed for environmental improvement to the RiverBend campus. Areas of erosion were repaired and non native plant species (especially ivy) were removed and replaced with native species.

This project certainly was a success.

Sincerely,

A handwritten signature in black ink that reads "G. B. Rex".

MS. DEB SCRIVENS

Metro Regional Parks and Greenspaces
Portland, Oregon

Dear Ms. Scrivens,

On behalf of the instructional staff and students at RiverBend Youth Center, please accept our sincere "Thank You" for awarding us a Greenspaces Environmental Education Grant in the fall of 1999. Reading through the Final Report, you will learn how these funds were used effectively and appropriately to establish a science class and offer summer environmental programs for our students.

More than four years after the funds were awarded, the Metro Grant continues to have a positive impact on students and programs at RBYC. I would like to share three outstanding examples of how our students continue to benefit from efforts begun during the 1999-2000 school year.

1. Last year we received a small grant that allowed us to design and implement a paper recycling program on the campus of RiverBend Youth Center. Each week students collect discarded paper products from over twenty-five sites on the agency. They sort these materials and place them in the appropriate recycling bins.

2. Through a generous grant from Oregon Youth Conservation Corps, we were able to sponsor a summer work program last year that gave six RBYC students the opportunity to work at McIver State Park, learn new vocational skills, earn high school credit, improve and restore recreational facilities, and earn up to \$1,000 for their efforts.

3. Finally, through yet another grant, we were able to use some of the paper collected in the recycling program to make handmade paper products from recycled paper. The eventual goal of this project is to establish a "cottage industry" that markets these student-made products in the community.

While these three activities are not directly related to the initial goals of the Metro grant, there is little doubt in my mind that they are a direct result of the environmental and ecological educational activities made possible through this grant. In my opinion, the funds from Metro Regional Parks and Greenspaces were the seed, RBYC was the soil, and these continuing environmental activities benefiting students at RiverBend Youth Center is the healthy, living plant. Thank you once again.

Sincerely,

A handwritten signature in black ink that reads "Russ Branson". The signature is written in a cursive, slightly slanted style.

Russ Branson
Special Education Teacher

Re: Contract #921695

Dear Deb:

I am enclosing in duplicate the final report for the above listed contract.

Thank you for all your assistance. Please let me know if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Diana M. Gill". The signature is written in a cursive style.

Diana M. Gill
Office Manager
