This Metro-led project includes three planning tasks and one task to purchase ITS Network equipment to continue the flow of information among regional operations agencies. ODOT is in a better position to facilitate this task. TransPort action is requested to make the ITS Network equipment a separate project, to be facilitated by ODOT with support from ITS Network partners.	Caleb Winter (Metro) / Kate Freitag (ODOT) / All
1:50 p.m.	LiDAR Helps Determine Pass/No-pass Zones Washington County and the City of Vancouver have been developing a method to determine pass/no pass zones using point cloud data. Light Detection and Ranging (LiDAR) is the use of lasers to obtain point cloud data. The method includes converting point cloud data to a Computer Automated Design (CAD) surface, exporting northing/eastings from that surface, and then automating the calculation of pass/no pass zones with a spreadsheet tool. The process will be demonstrated with an example corridor.	Cadell Chand and Galong Yan (Washington County) / Richard Gamble (City of Vancouver) / All
