

Willamette Falls

LEGACY PROJECT

SAVE THE DATES

Riverwalk Transportation & Access Summits

The Willamette Falls Legacy Project is about to begin developing the Riverwalk Parking, Access and Transportation Plan for the first phase of the riverwalk.

You are invited to attend three (3) riverwalk transportation access summits to help the public partners think strategically how pedestrian, transit, bike and parking improvements can support current and future phases of the Willamette Falls riverwalk.

However, the project partners also understand that this is our opportunity to create a plan that can go further than just the first phase of the riverwalk, and guide the community through the many phases of private and public development onsite.

We are all in this together! It is critical that we look holistically at the site, downtown, and Canemah and McLoughlin Neighborhoods for both impacts and solutions.
